It has come to my attention that this regained popularity in recent weeks. As the author, I'm deeply humbled by the support in the form of reblogs and likes even despite the crass language. I'm not Lakota or from the areas of these tribes. I'm from a Pueblo in New Mexico (shout-out to the Pueblo camp at standing Rock!) And Navajo Nation. I made this post at s tumultuous time in my life when I had accrued so much capital and privilege in the white man's world. Back when these were working links, I was a community organizer that went into a post traumatic stress disorder episode while this post was getting popular 2 years ago when Standing Rock was still at camp. I ask folks to reblog this out of respect to the many people and messages passed that allows for campaigns like these to exist. I'll never know how much was raised but know that y'all were a part of something huge and important. That two years is not a long time and progress is like watching grass grow.

Here's the truth. Minimum wage going up to $15 an hour is making folks realize how UNDERPAID they are in their salaried positions. And instead of railing against their salaries being too low, they are railing against the $15 being too high. Fight for yours, not against theirs ✊

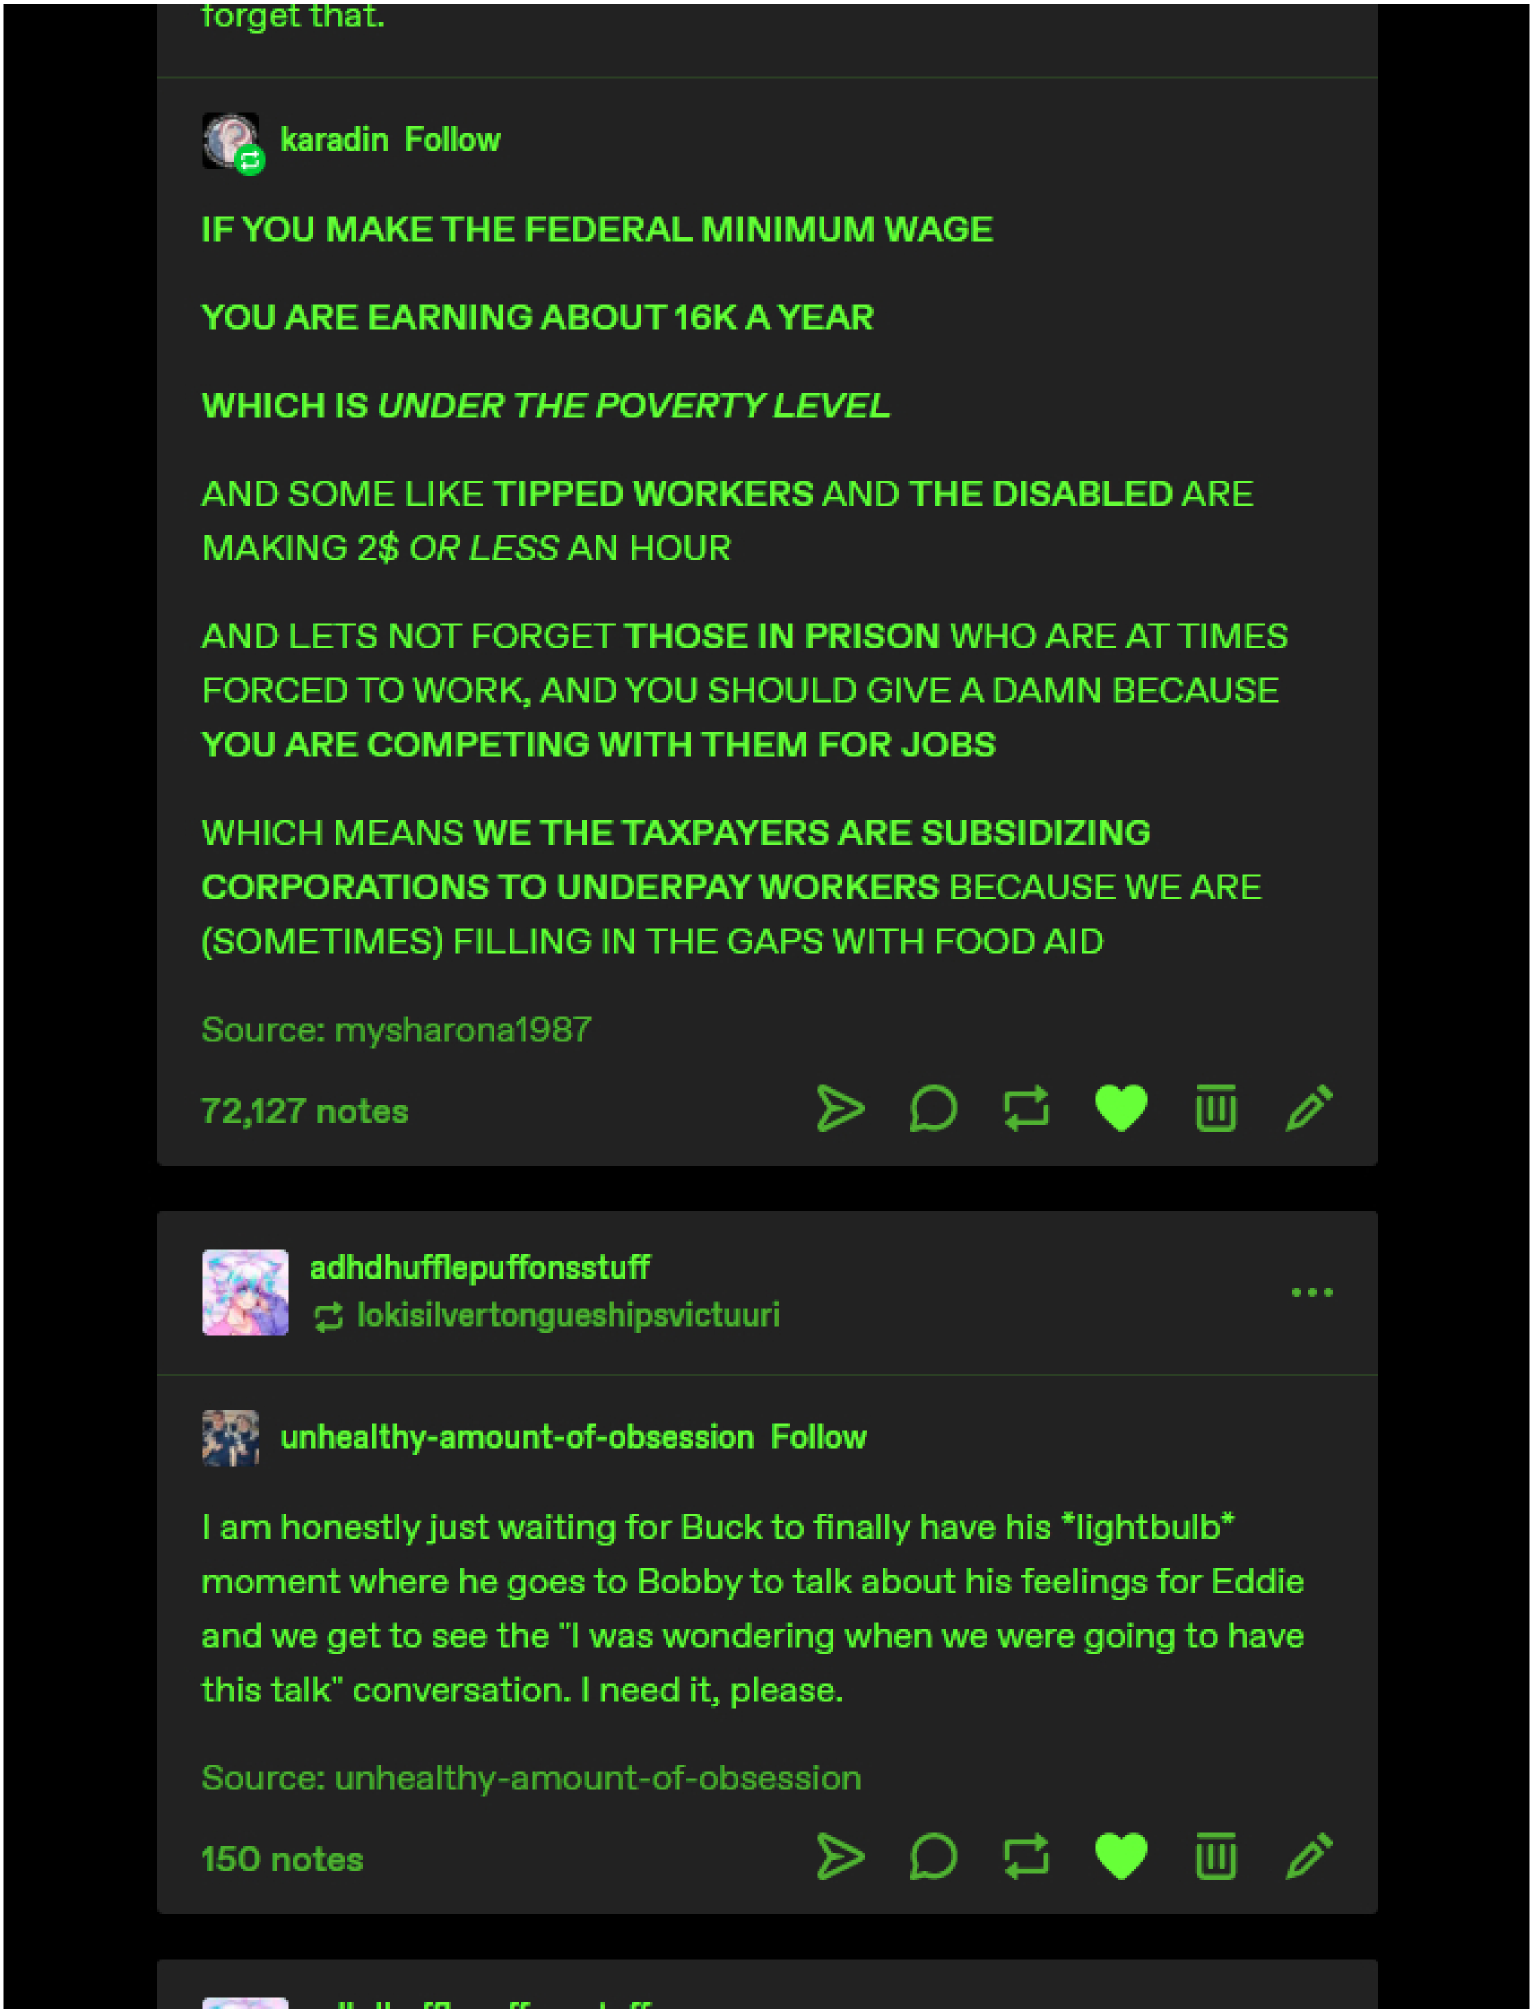
national-shitpost-registry Follow

Keep in mind that raising minimum wage will ultimately force your employer to pay you more competitively--*whether or not you are a minimum wage worker.*

This is why conservatives are so scared of minimum wage workers making a living wage (which, to be clear, $15/hour is not)--it would **force all employers to start paying employees a more reasonable fraction of their value.** Trickle-down economics is a sick joke, but trickle-up economics is real.

Raise the standard for the lowest paid workers, and **THE STANDARD GETS RAISED FOR EVERYONE.**

Whether you make $30k or $100k a year, you are making *pennies on the* dollar of what you are actually earning your employer. Never



forget that.

karadin **Follow**

IF YOU MAKE THE FEDERAL MINIMUM WAGE

YOU ARE EARNING ABOUT 16K A YEAR

AND SOME LIKE **TIPPED WORKERS** AND **THE DISABLED** ARE MAKING 2$ *OR LESS* AN HOUR

AND LETS NOT FORGET **THOSE IN PRISON** WHO ARE AT TIMES FORCED TO WORK, AND YOU SHOULD GIVE A DAMN BECAUSE **YOU ARE COMPETING WITH THEM FOR JOBS**

WHICH MEANS **WE THE TAXPAYERS ARE SUBSIDIZING CORPORATIONS TO UNDERPAY WORKERS** BECAUSE WE ARE (SOMETIMES) FILLING IN THE GAPS WITH FOOD AID

another absolutely fantastic trope is when a scifi/fantasy character calls the oblivious object of their affections a term of endearment in their fictional first language during an emotional moment which they refuse to translate, and their love interest assumes due to the unresolved sexual tension fuelled rivalry aspect of their relationship that it's an insult, only to have their world absolutely rocked to its core when they finally manage to get a translation and realize that the other person has been pining for them the entire goddamn time

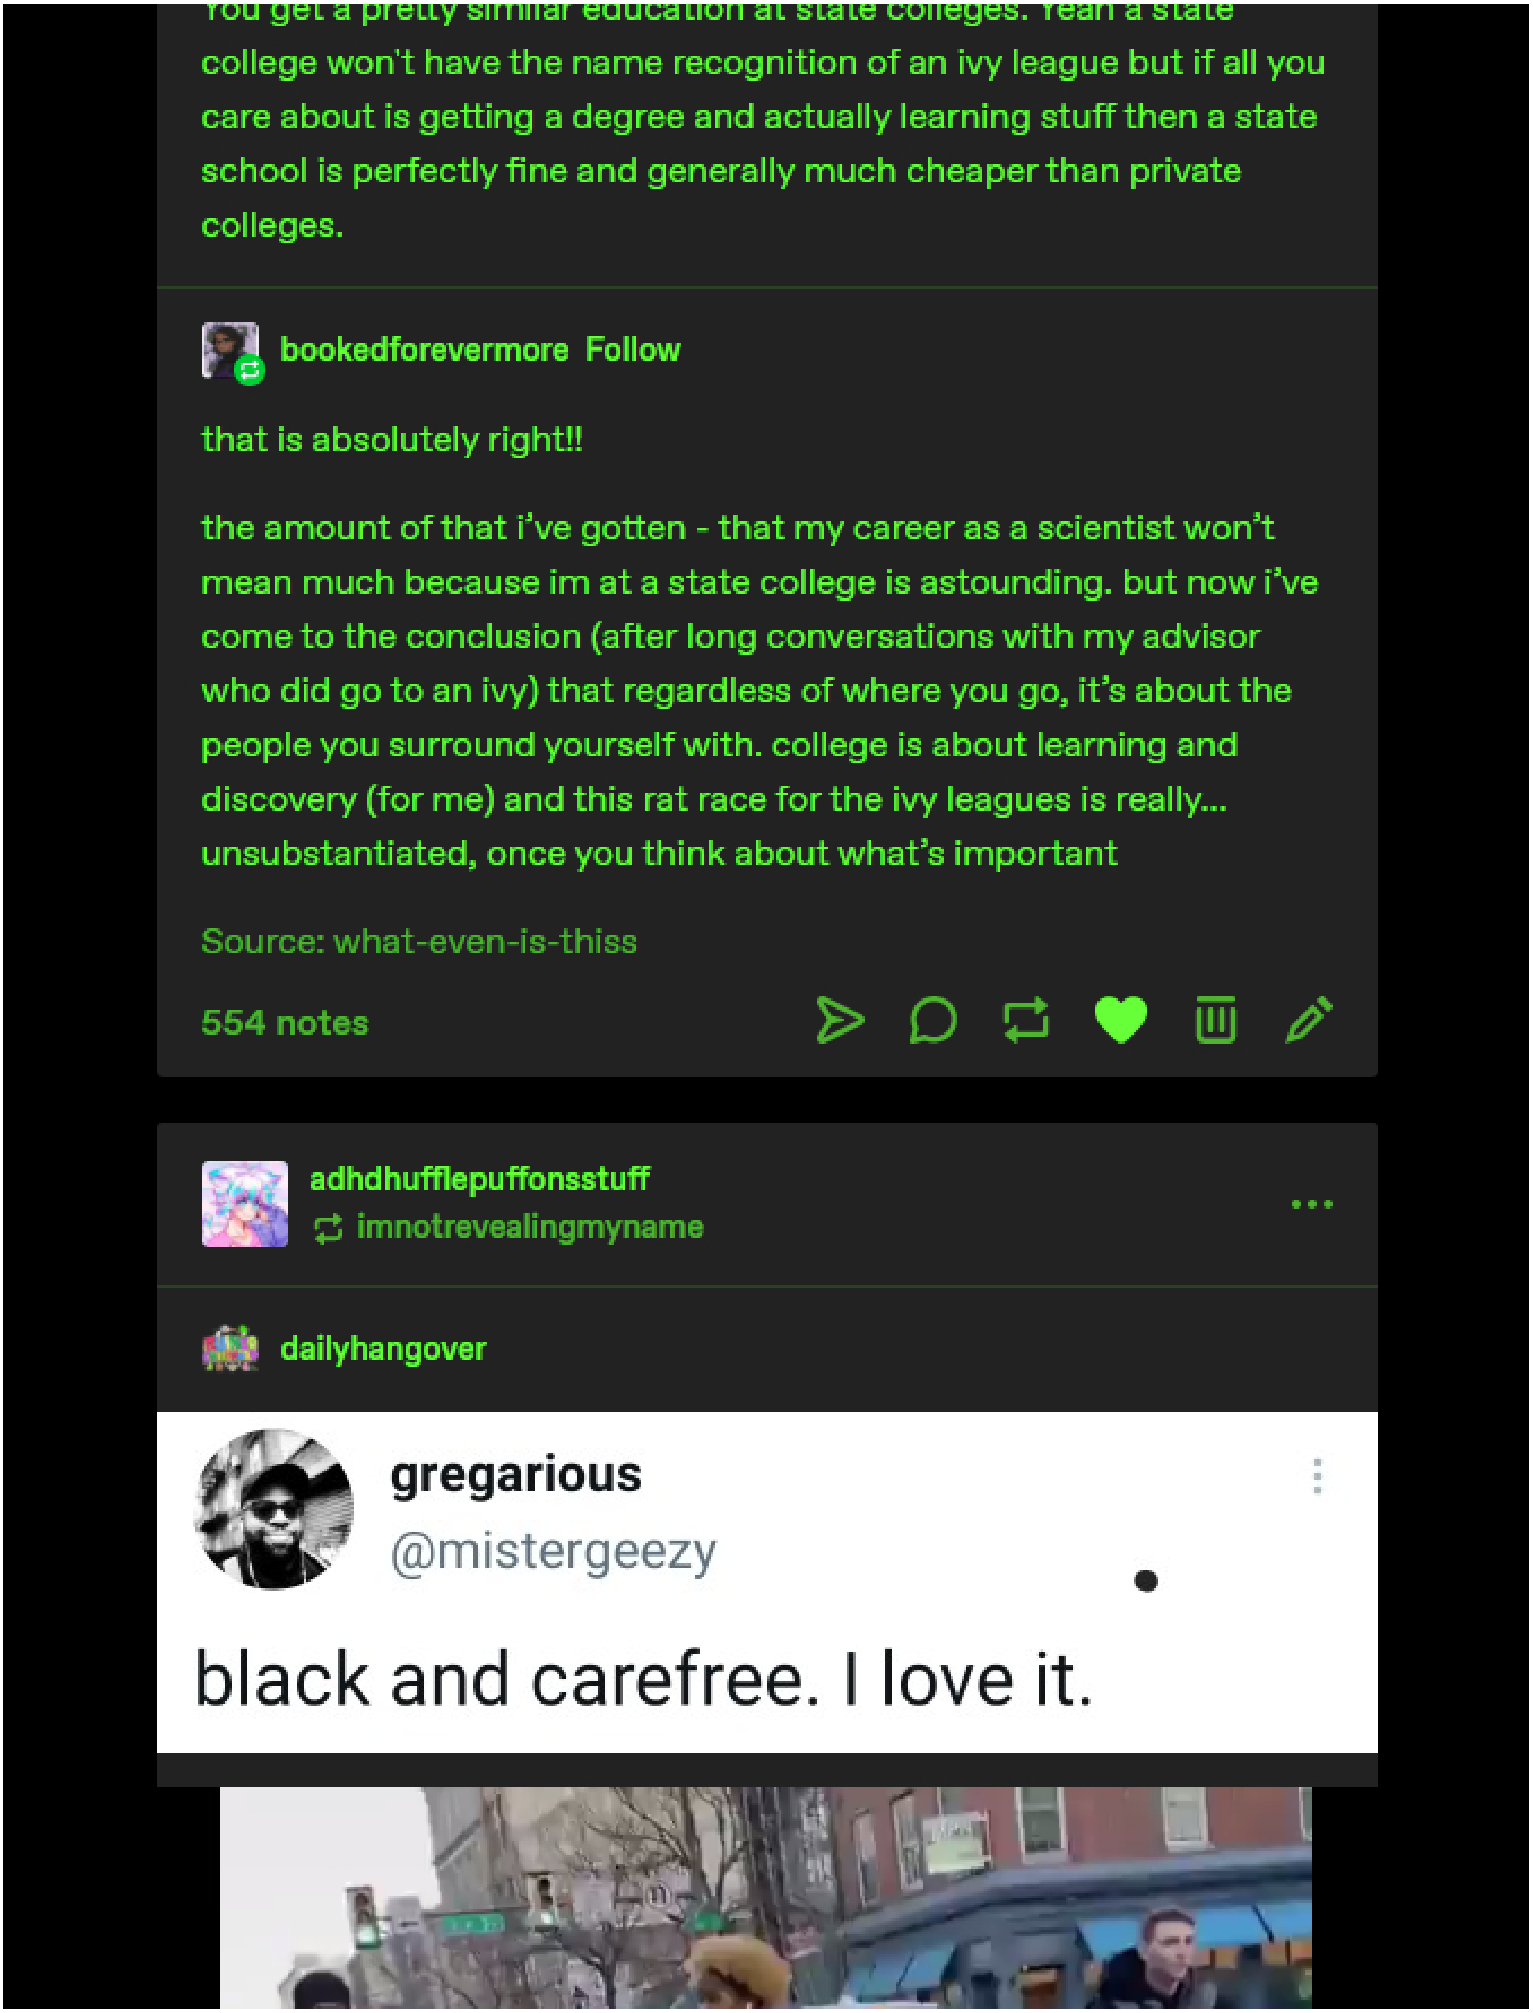
If somebody brags that they went to Harvard that's not super impressive actually. Yeah it's hard to get in but once you're in it's difficult to fail. Ivy League schools don't have over 90% graduation rates because all the students there are smart. They have over 90% graduation rates because it's actually difficult to fail out.



You get a pretty similar education at state colleges. Yeah a state college won't have the name recognition of an ivy league but if all you care about is getting a degree and actually learning stuff then a state school is perfectly fine and generally much cheaper than private colleges.

bookedforevermore Follow

that is absolutely right!!

the amount of that i've gotten - that my career as a scientist won't mean much because im at a state college is astounding. but now i've come to the conclusion (after long conversations with my advisor who did go to an ivy) that regardless of where you go, it's about the people you surround yourself with. college is about learning and discovery (for me) and this rat race for the ivy leagues is really... unsubstantiated, once you think about what's important

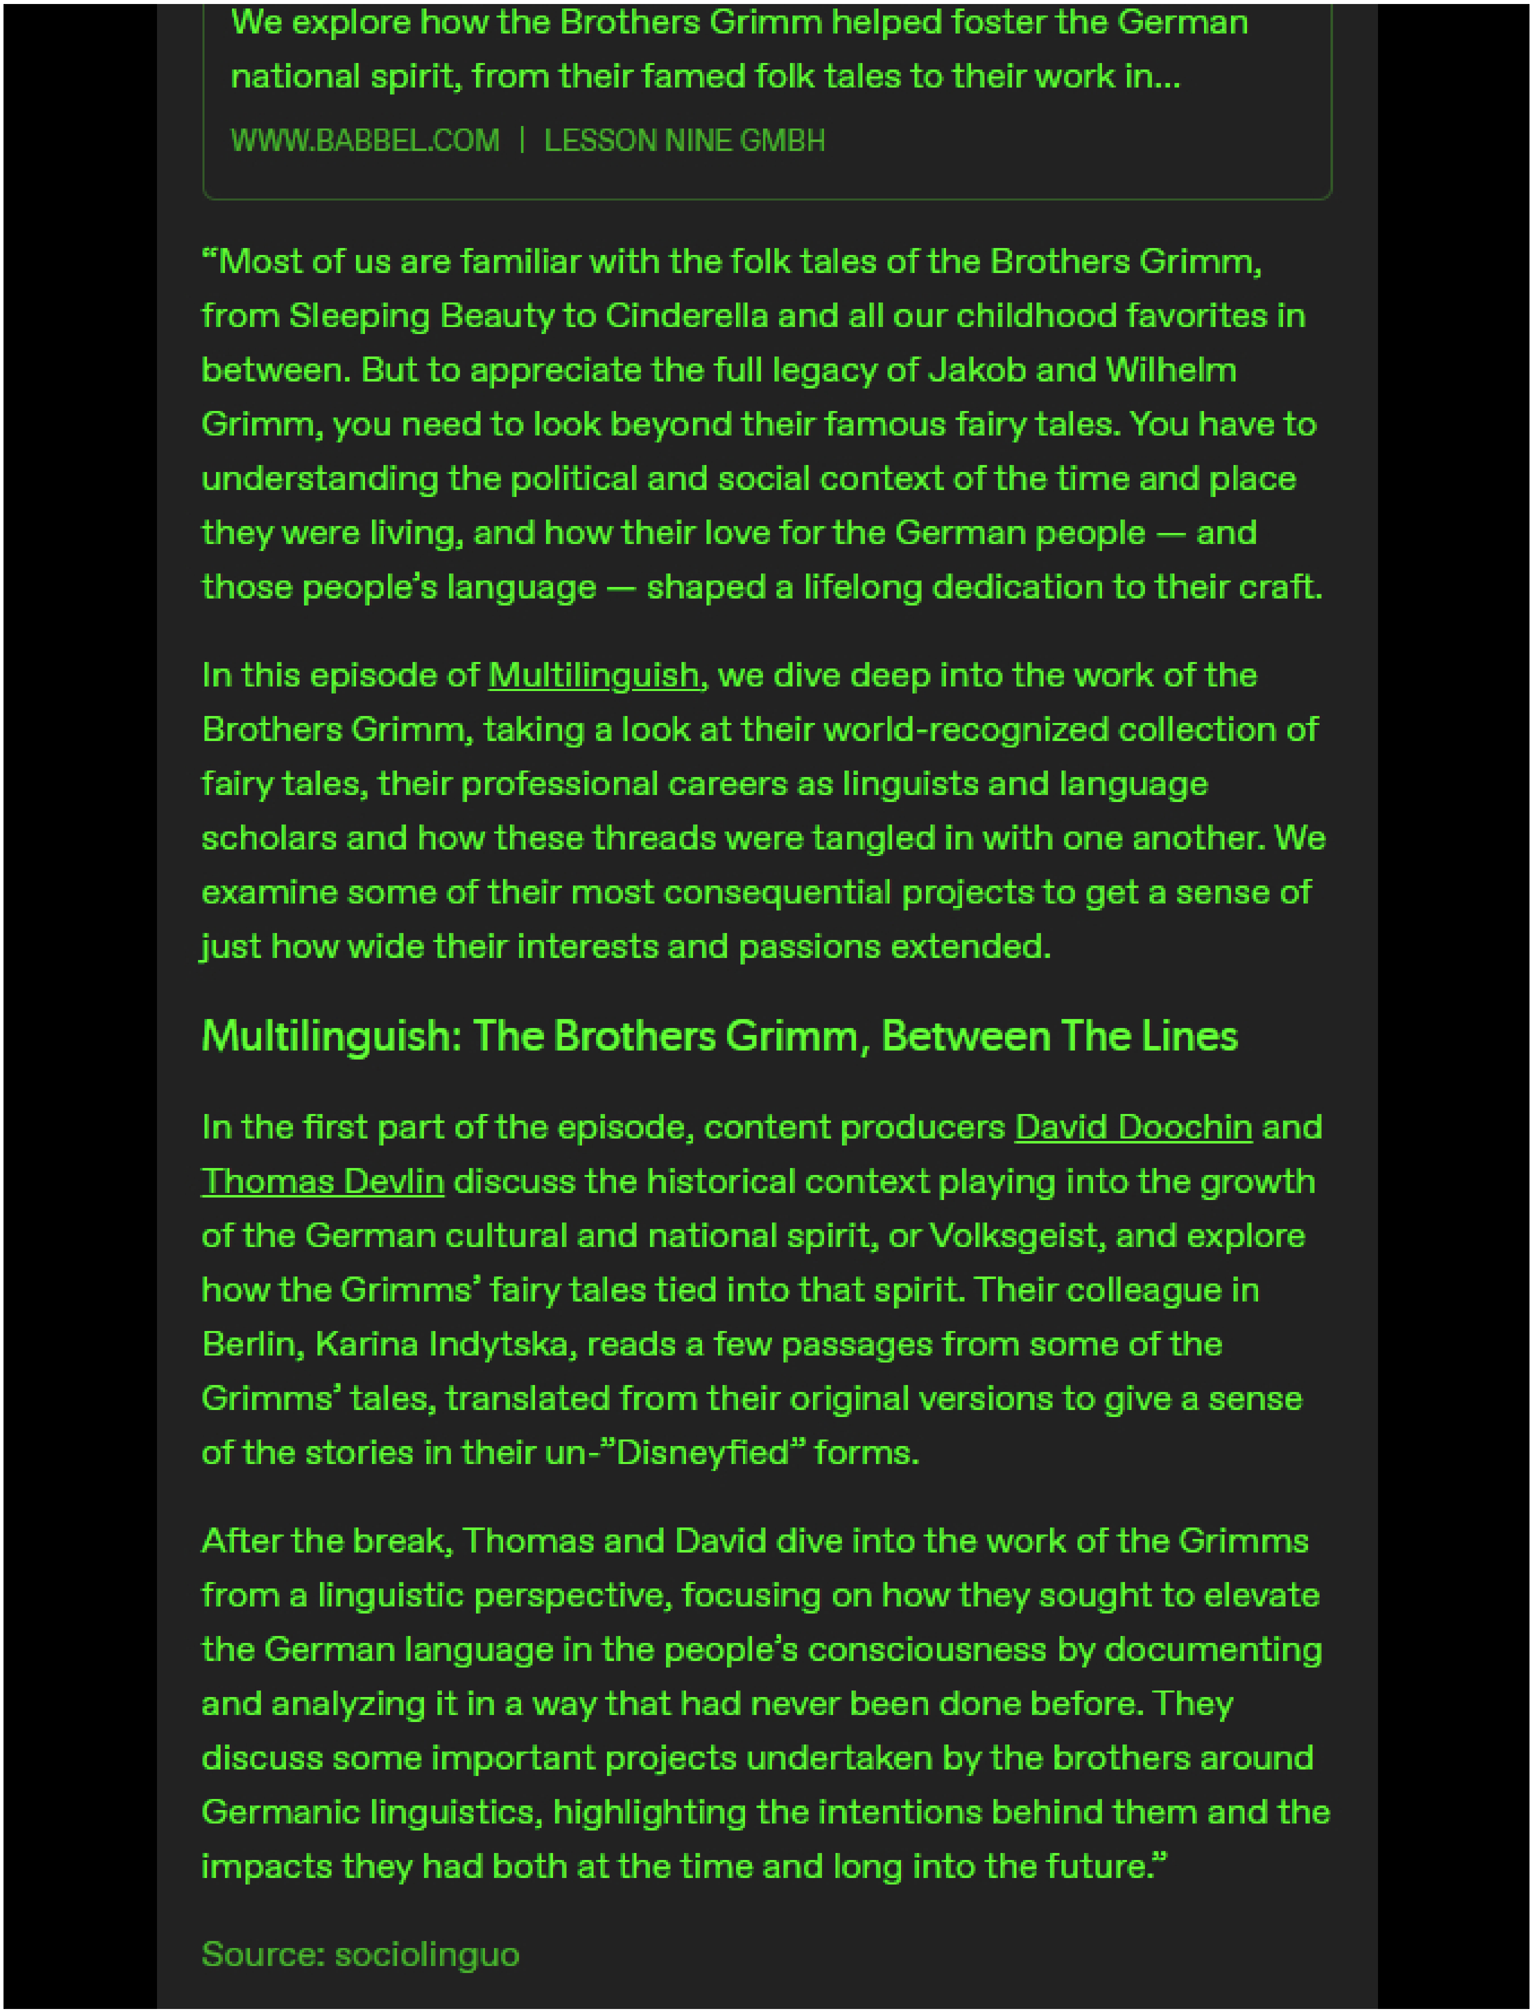
Multilinguish: The Brothers Grimm



We explore how the Brothers Grimm helped foster the German national spirit, from their famed folk tales to their work in...

WWW.BABBEL.COM | LESSON NINE GMBH

“Most of us are familiar with the folk tales of the Brothers Grimm, from Sleeping Beauty to Cinderella and all our childhood favorites in between. But to appreciate the full legacy of Jakob and Wilhelm Grimm, you need to look beyond their famous fairy tales. You have to understanding the political and social context of the time and place they were living, and how their love for the German people — and those people’s language — shaped a lifelong dedication to their craft.

In this episode of Multilinguish, we dive deep into the work of the Brothers Grimm, taking a look at their world-recognized collection of fairy tales, their professional careers as linguists and language scholars and how these threads were tangled in with one another. We examine some of their most consequential projects to get a sense of just how wide their interests and passions extended.

Multilinguish: The Brothers Grimm, Between The Lines

In the first part of the episode, content producers David Doochin and Thomas Devlin discuss the historical context playing into the growth of the German cultural and national spirit, or Volksgeist, and explore how the Grimms’ fairy tales tied into that spirit. Their colleague in Berlin, Karina Indytska, reads a few passages from some of the Grimms’ tales, translated from their original versions to give a sense of the stories in their un-”Disneyfied” forms.

After the break, Thomas and David dive into the work of the Grimms from a linguistic perspective, focusing on how they sought to elevate the German language in the people’s consciousness by documenting and analyzing it in a way that had never been done before. They discuss some important projects undertaken by the brothers around Germanic linguistics, highlighting the intentions behind them and the impacts they had both at the time and long into the future.”

If it's not in a written contract nor was it ever a requirement in the job, you don't have to give a a two week noticed ESPECIALLY if the job in question is super toxic.

Yes giving a two week notice is polite and considerate, but really most employers are lucky to get any notice let alone a two week one so

Tldr:

You can 100% quit a job like this with little to no consequence

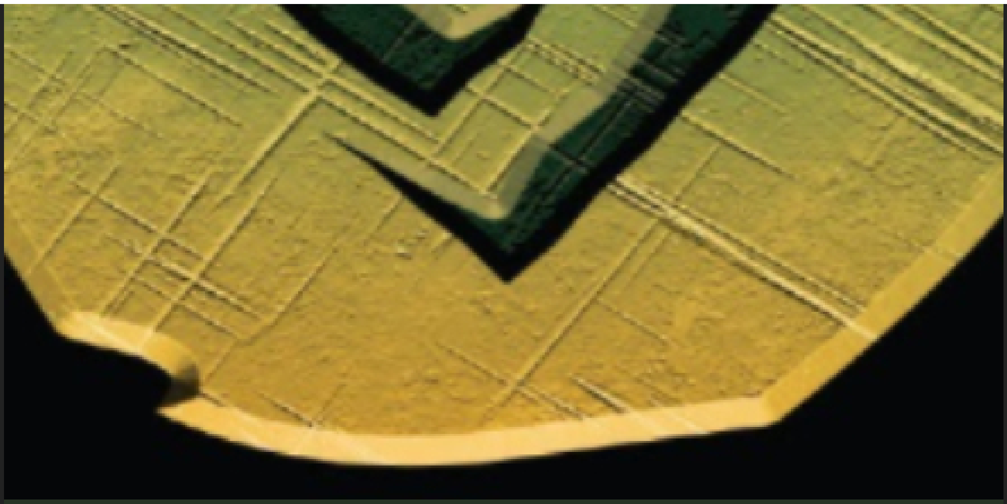
Anonymous asked:

Do we know if the symbol on comic Loki's horns/hemet-ette thing mean anything? Or is he just a huge fan of square brackets?

worstloki answered:

It resembles a Jera rune and @lucianalight points out that it could be two Kenaz runes here although he could just be a fan of pointed designs I guess.

The one used in more recent comics for Loki looks like this:



and is used as a symbol for Jotunheim, although I'm pretty sure that only started appearing on his helmet after the War of the Realms and denotes his title as King of Jotunheim.

lucianalight

I didn't know it is a symbol of Jotunheim and Loki wears it to show that he is the king of Jotunheim. But now I think it makes sense that it is in fact the Jera rune because "Jotenheim" starts with this rune. I also find it interesting that Jera resembles two intertwined Kenaz runes. So Loki can show both his rune, and his title's rune with only one.

Jera represents change. Which is a good symbol for Loki in the current stage of his arc in comics.

> **Rune of harvest and reward for, or reaction to, right actions in a horizontal (naturally ordered) cyclical process. Rune of peace on the land and in the heart.**
>
> **Governs:**
> *Fertility, creativity and harmony with the land*
> *Peace, prosperity and plenty*
> *Realization of the cyclical nature of the multiverse, invoking the power of time and cycles*
> *Bringing other concepts gently into material manifestation*

> *Bringing other concepts gently into material manifestation*
> *Initiating gradual and lasting change in flow of life*
>
> *"Jera is has an unstoppable energy, gradual but unrelenting, unhurried but persistent, indifferent to human influence. Nature has a way of persistently marching on. Jera's changes are not sudden or explosive, and cannot be forced. The key is making small, gradual changes every day, for the better."* [X]

This has gone way too far now. Even your apology you continued to make fun of me. Before today my twitter account was highly regarded as a beacon of truth with some hard hitting opinions. Today you've completely ruined it and turned me into a fruit meme. I asked for you to apologise and you couldn't even do that. If you don't start showing some respect and stop making me a lemon meme I'll be contacting my lawyer to see if I have grounds to sue on

The lack of boomer LGBTQ+ people isn't because it's "more popular now." Many were murdered by their peers, died from government inaction during the AIDS crisis, committed suicide due to lack of social supports, or have had to live in the closet due to their peers' cruelty.

#13 - Death

One of the most misunderstood cards in a Tarot deck, Death is not a card about physical death. The Death card speaks of cycles -- endings, yes, but beginnings too -- and is a reminder that all things must pass. Hanging on to relationships, feelings, fears, or situations from the past will hinder you from allowing new, better things to enter your life. Take comfort in knowing that in every ending lies a chance for a new beginning. Learn more about the Death card »

Oh...

#16 - The Tower

Perhaps the most dreaded card in a Tarot deck, The Tower is a representation of destruction. The Tower often comes up when everything in your life feels like its crumbling, and you have no way of stopping it. The message of this card is to just let it fall. The weakest parts of your life must be torn down in order to build something strong and sturdy in their place -- something that can last a lifetime. Learn more about The Tower card »

During a military campaign, Vlad the Impaler, the basis for Dracula, once pulled his troops out of a major engagement in a valley at dusk so that the sun was in their enemies’ eyes. Once they were over the hill, they set loose a bunch of rabid bats who flew away from the sun (towards the enemy) and attacked them, leading to significant infection in their ranks, and Vlad’s eventual victory. Because of how the bats appeared from where Vlad’s soldiers appeared to be at dusk, myth stated that the soldiers turned into bats at night, which is where the “Dracula can change into a bat” thing came from.

Jack Churchill, known as Mad Jack, was a British Officer during WW2. He loved hunting nazis, playing the bagpipes, and archery. He loved them so much that he did them all at the same time.

Churchill killed a nazi with a long bow in battle as well. Maybe his gun jammed, but more likely he did it because when you’re a badass you do badass shit.

He was captured multiple times and tossed in concentration camps. He escaped everytime. One of his escapes wasn’t so much an escape as just an exit. He just walked on out of there. Who the fuck going to stop him after all.

He snuck out off base one night in Italy with his claymore sword

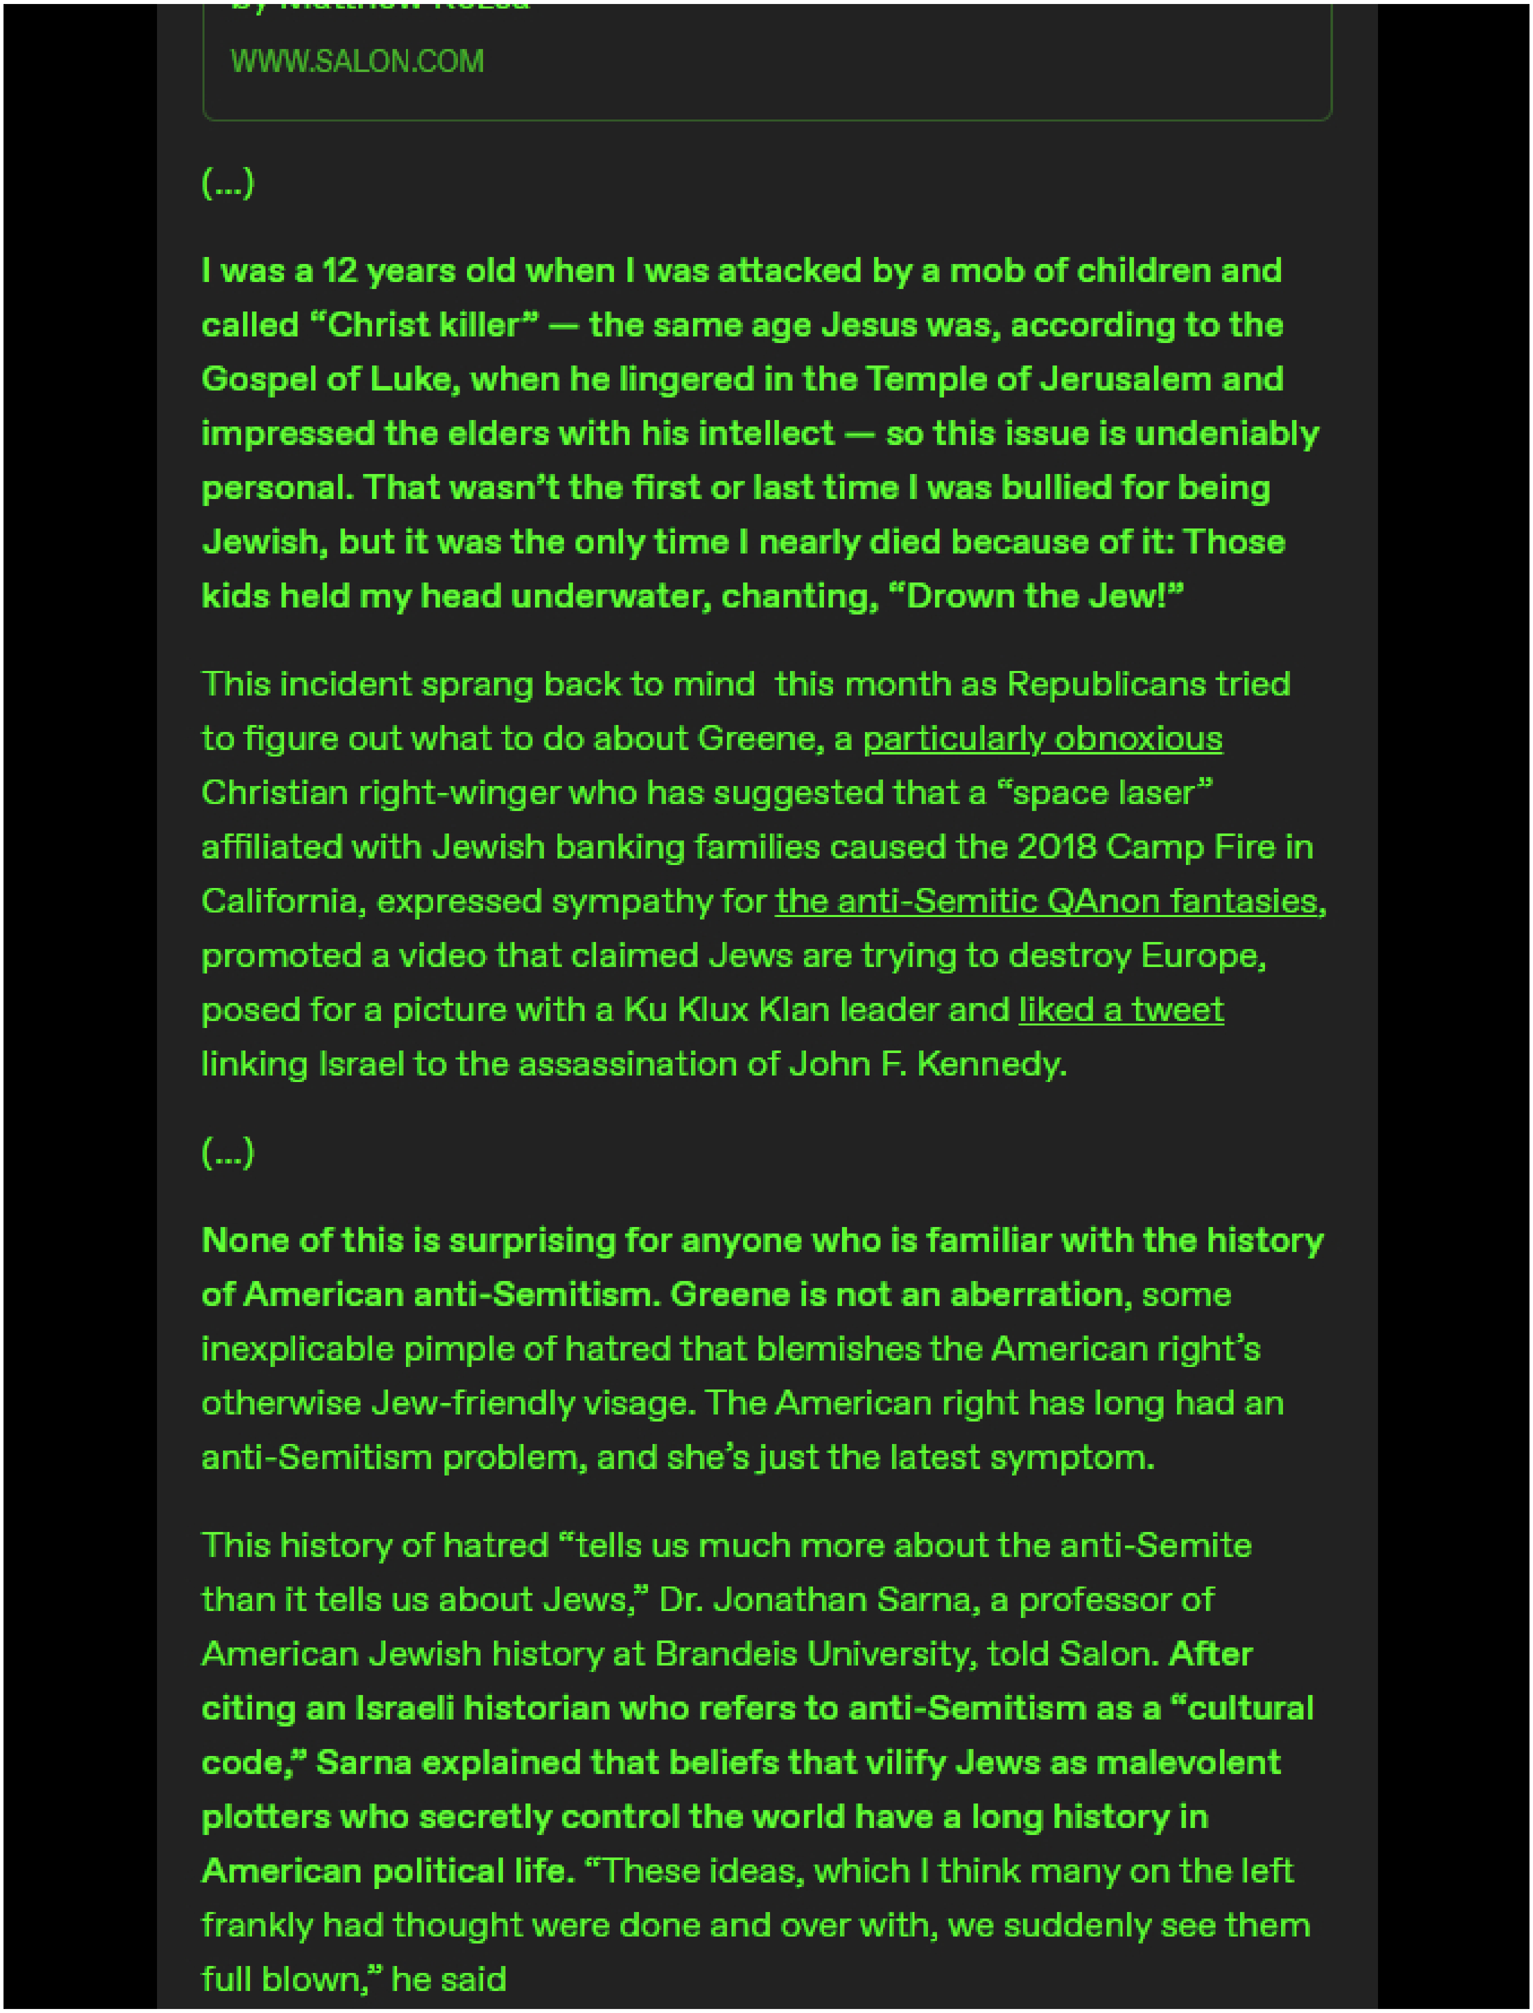
Marjorie Taylor-Greene's anti-Semitism is as American as apple pie (but Trump made it worse)

by Matthew Rozsa



WWW.SALON.COM

(...)

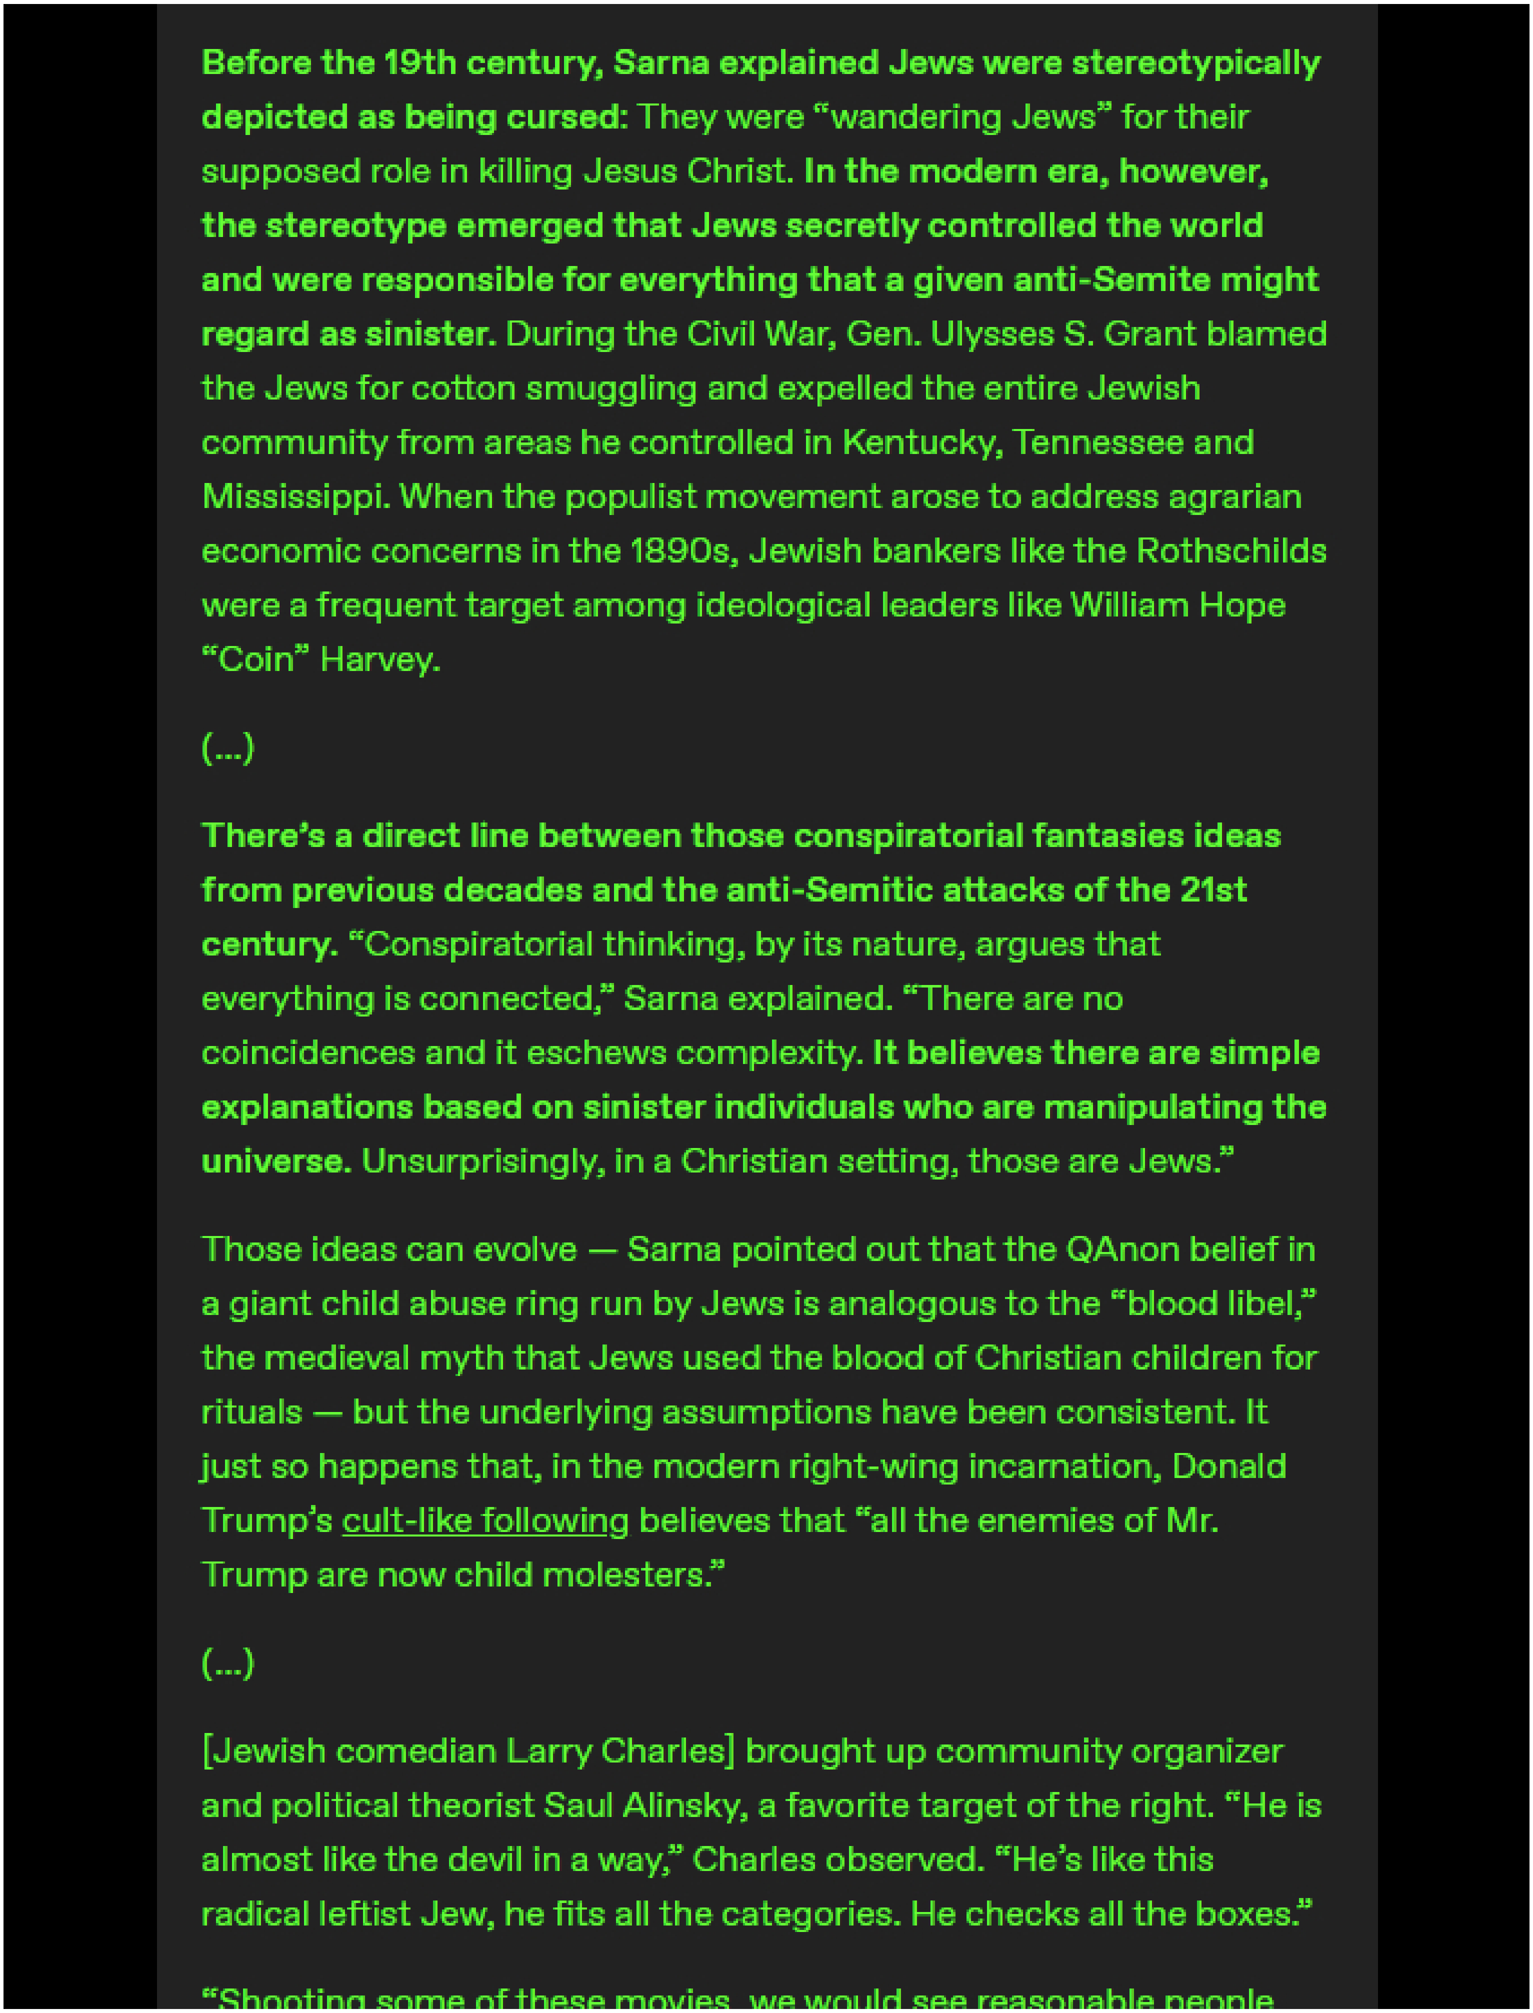
I was a 12 years old when I was attacked by a mob of children and called “Christ killer” — the same age Jesus was, according to the Gospel of Luke, when he lingered in the Temple of Jerusalem and impressed the elders with his intellect — so this issue is undeniably personal. That wasn’t the first or last time I was bullied for being Jewish, but it was the only time I nearly died because of it: Those kids held my head underwater, chanting, “Drown the Jew!”

This incident sprang back to mind this month as Republicans tried to figure out what to do about Greene, a particularly obnoxious Christian right-winger who has suggested that a “space laser” affiliated with Jewish banking families caused the 2018 Camp Fire in California, expressed sympathy for the anti-Semitic QAnon fantasies, promoted a video that claimed Jews are trying to destroy Europe, posed for a picture with a Ku Klux Klan leader and liked a tweet linking Israel to the assassination of John F. Kennedy.

(...)

None of this is surprising for anyone who is familiar with the history of American anti-Semitism. Greene is not an aberration, some inexplicable pimple of hatred that blemishes the American right’s otherwise Jew-friendly visage. The American right has long had an anti-Semitism problem, and she’s just the latest symptom.

This history of hatred “tells us much more about the anti-Semite than it tells us about Jews,” Dr. Jonathan Sarna, a professor of American Jewish history at Brandeis University, told Salon. **After citing an Israeli historian who refers to anti-Semitism as a “cultural code,” Sarna explained that beliefs that vilify Jews as malevolent plotters who secretly control the world have a long history in American political life.** “These ideas, which I think many on the left frankly had thought were done and over with, we suddenly see them full blown,” he said



Before the 19th century, Sarna explained Jews were stereotypically depicted as being cursed: They were “wandering Jews” for their supposed role in killing Jesus Christ. **In the modern era, however, the stereotype emerged that Jews secretly controlled the world and were responsible for everything that a given anti-Semite might regard as sinister.** During the Civil War, Gen. Ulysses S. Grant blamed the Jews for cotton smuggling and expelled the entire Jewish community from areas he controlled in Kentucky, Tennessee and Mississippi. When the populist movement arose to address agrarian economic concerns in the 1890s, Jewish bankers like the Rothschilds were a frequent target among ideological leaders like William Hope “Coin” Harvey.

(...)

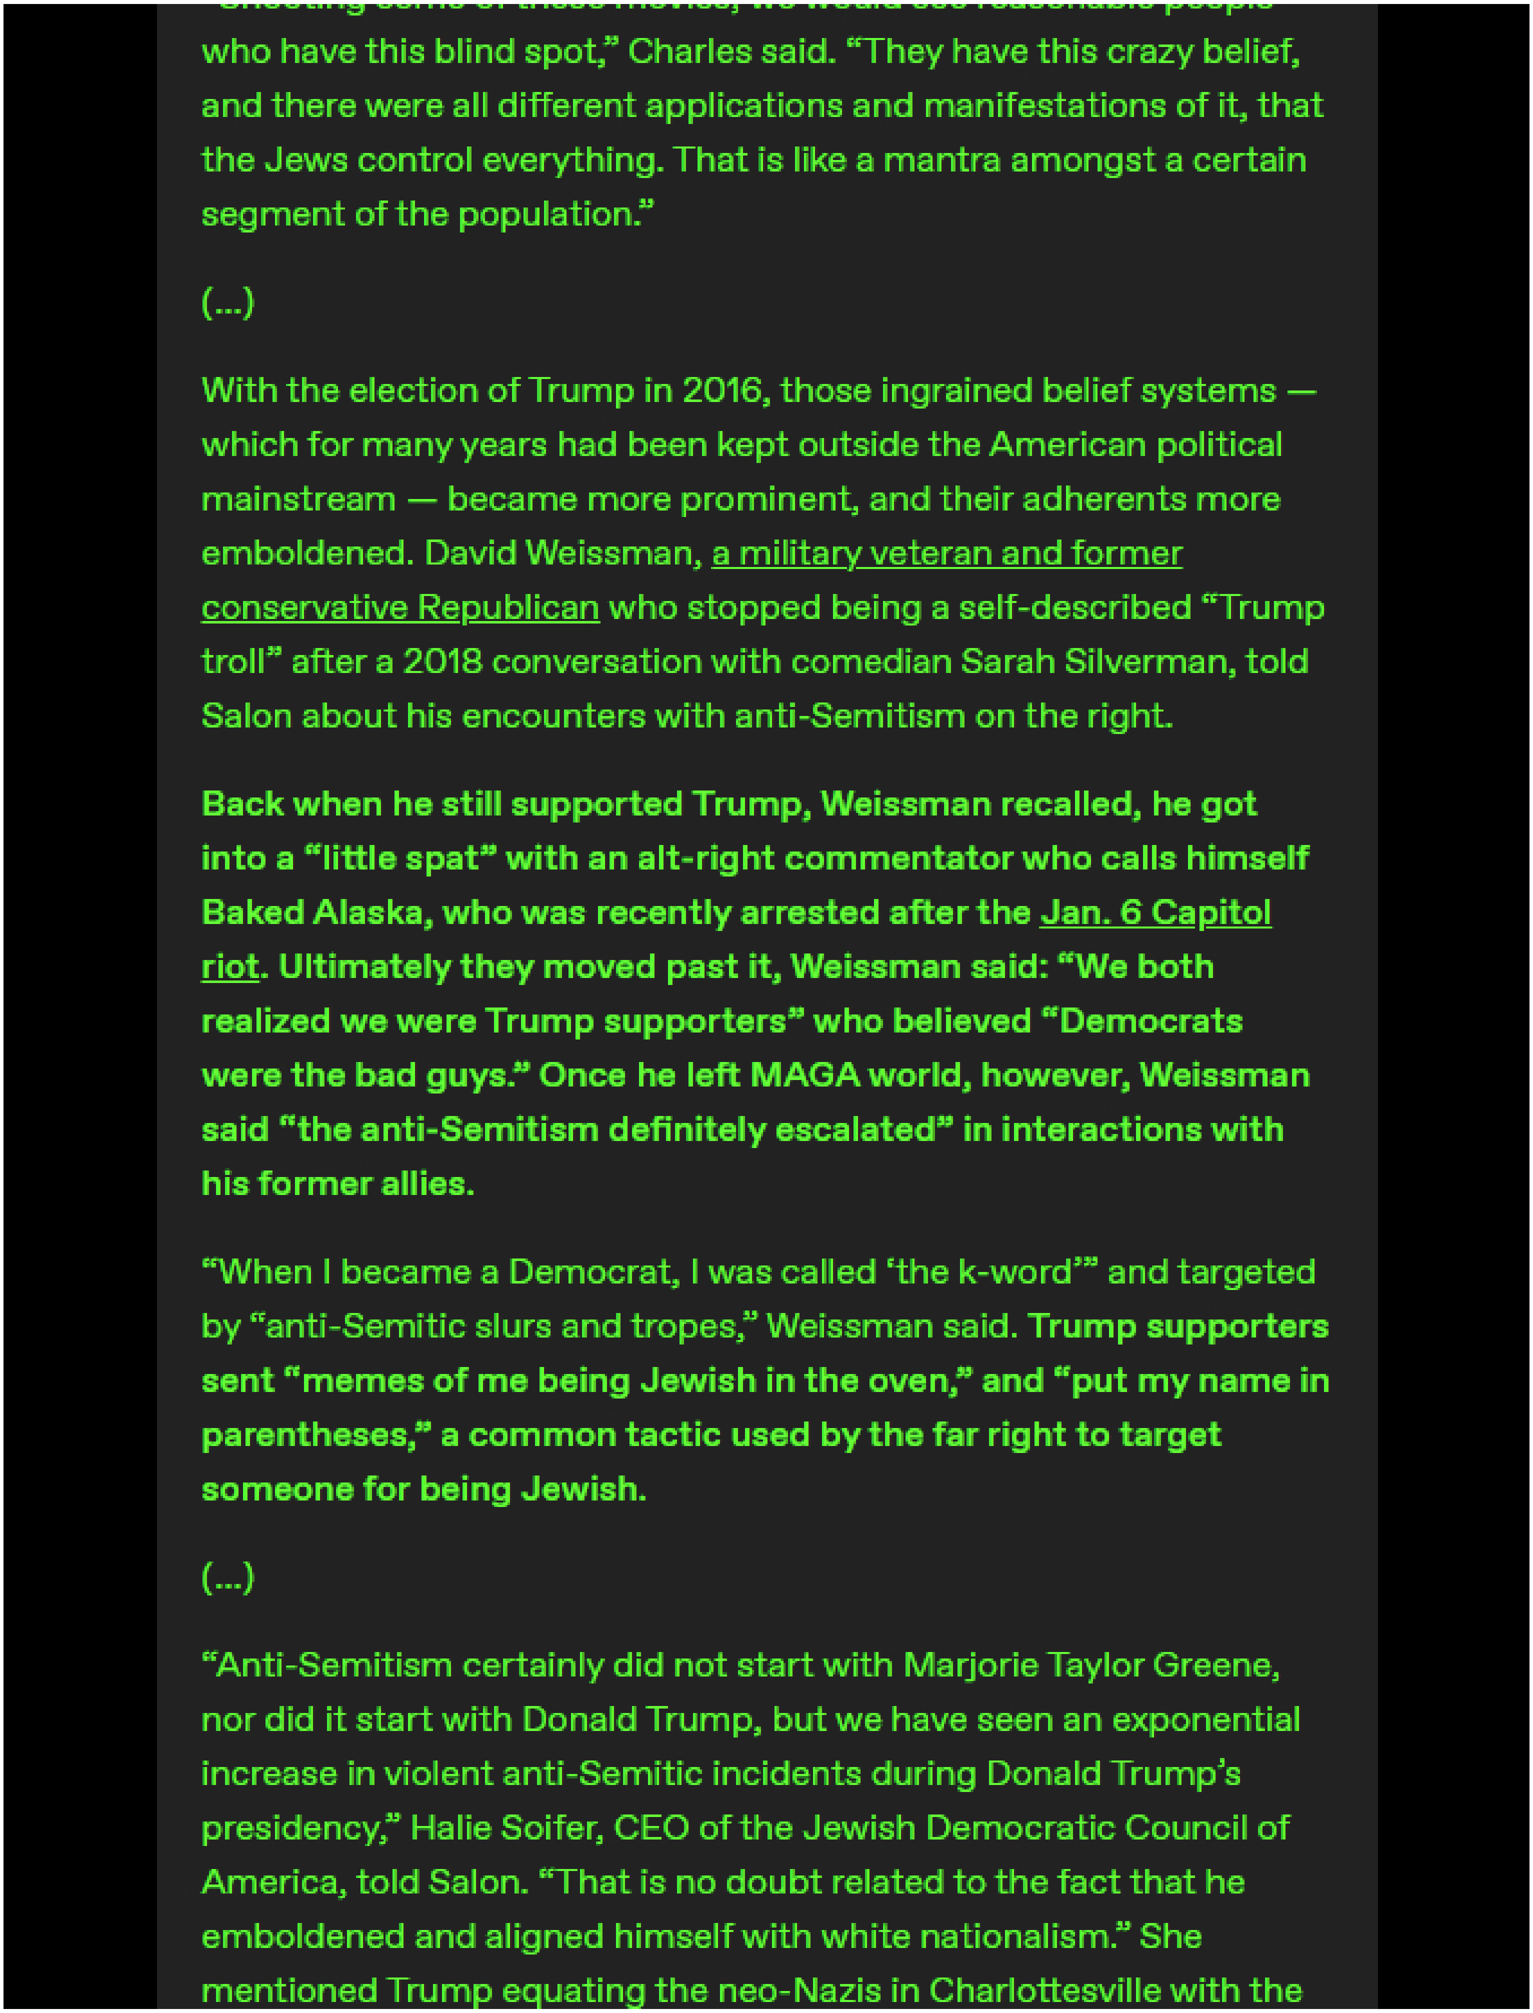
There’s a direct line between those conspiratorial fantasies ideas from previous decades and the anti-Semitic attacks of the 21st century. “Conspiratorial thinking, by its nature, argues that everything is connected,” Sarna explained. “There are no coincidences and it eschews complexity. **It believes there are simple explanations based on sinister individuals who are manipulating the universe.** Unsurprisingly, in a Christian setting, those are Jews.”

Those ideas can evolve — Sarna pointed out that the QAnon belief in a giant child abuse ring run by Jews is analogous to the “blood libel,” the medieval myth that Jews used the blood of Christian children for rituals — but the underlying assumptions have been consistent. It just so happens that, in the modern right-wing incarnation, Donald Trump’s cult-like following believes that “all the enemies of Mr. Trump are now child molesters.”

(...)

[Jewish comedian Larry Charles] brought up community organizer and political theorist Saul Alinsky, a favorite target of the right. “He is almost like the devil in a way,” Charles observed. “He’s like this radical leftist Jew, he fits all the categories. He checks all the boxes.”

“Shooting some of these movies, we would see reasonable people



who have this blind spot,” Charles said. “They have this crazy belief, and there were all different applications and manifestations of it, that the Jews control everything. That is like a mantra amongst a certain segment of the population.”

(...)

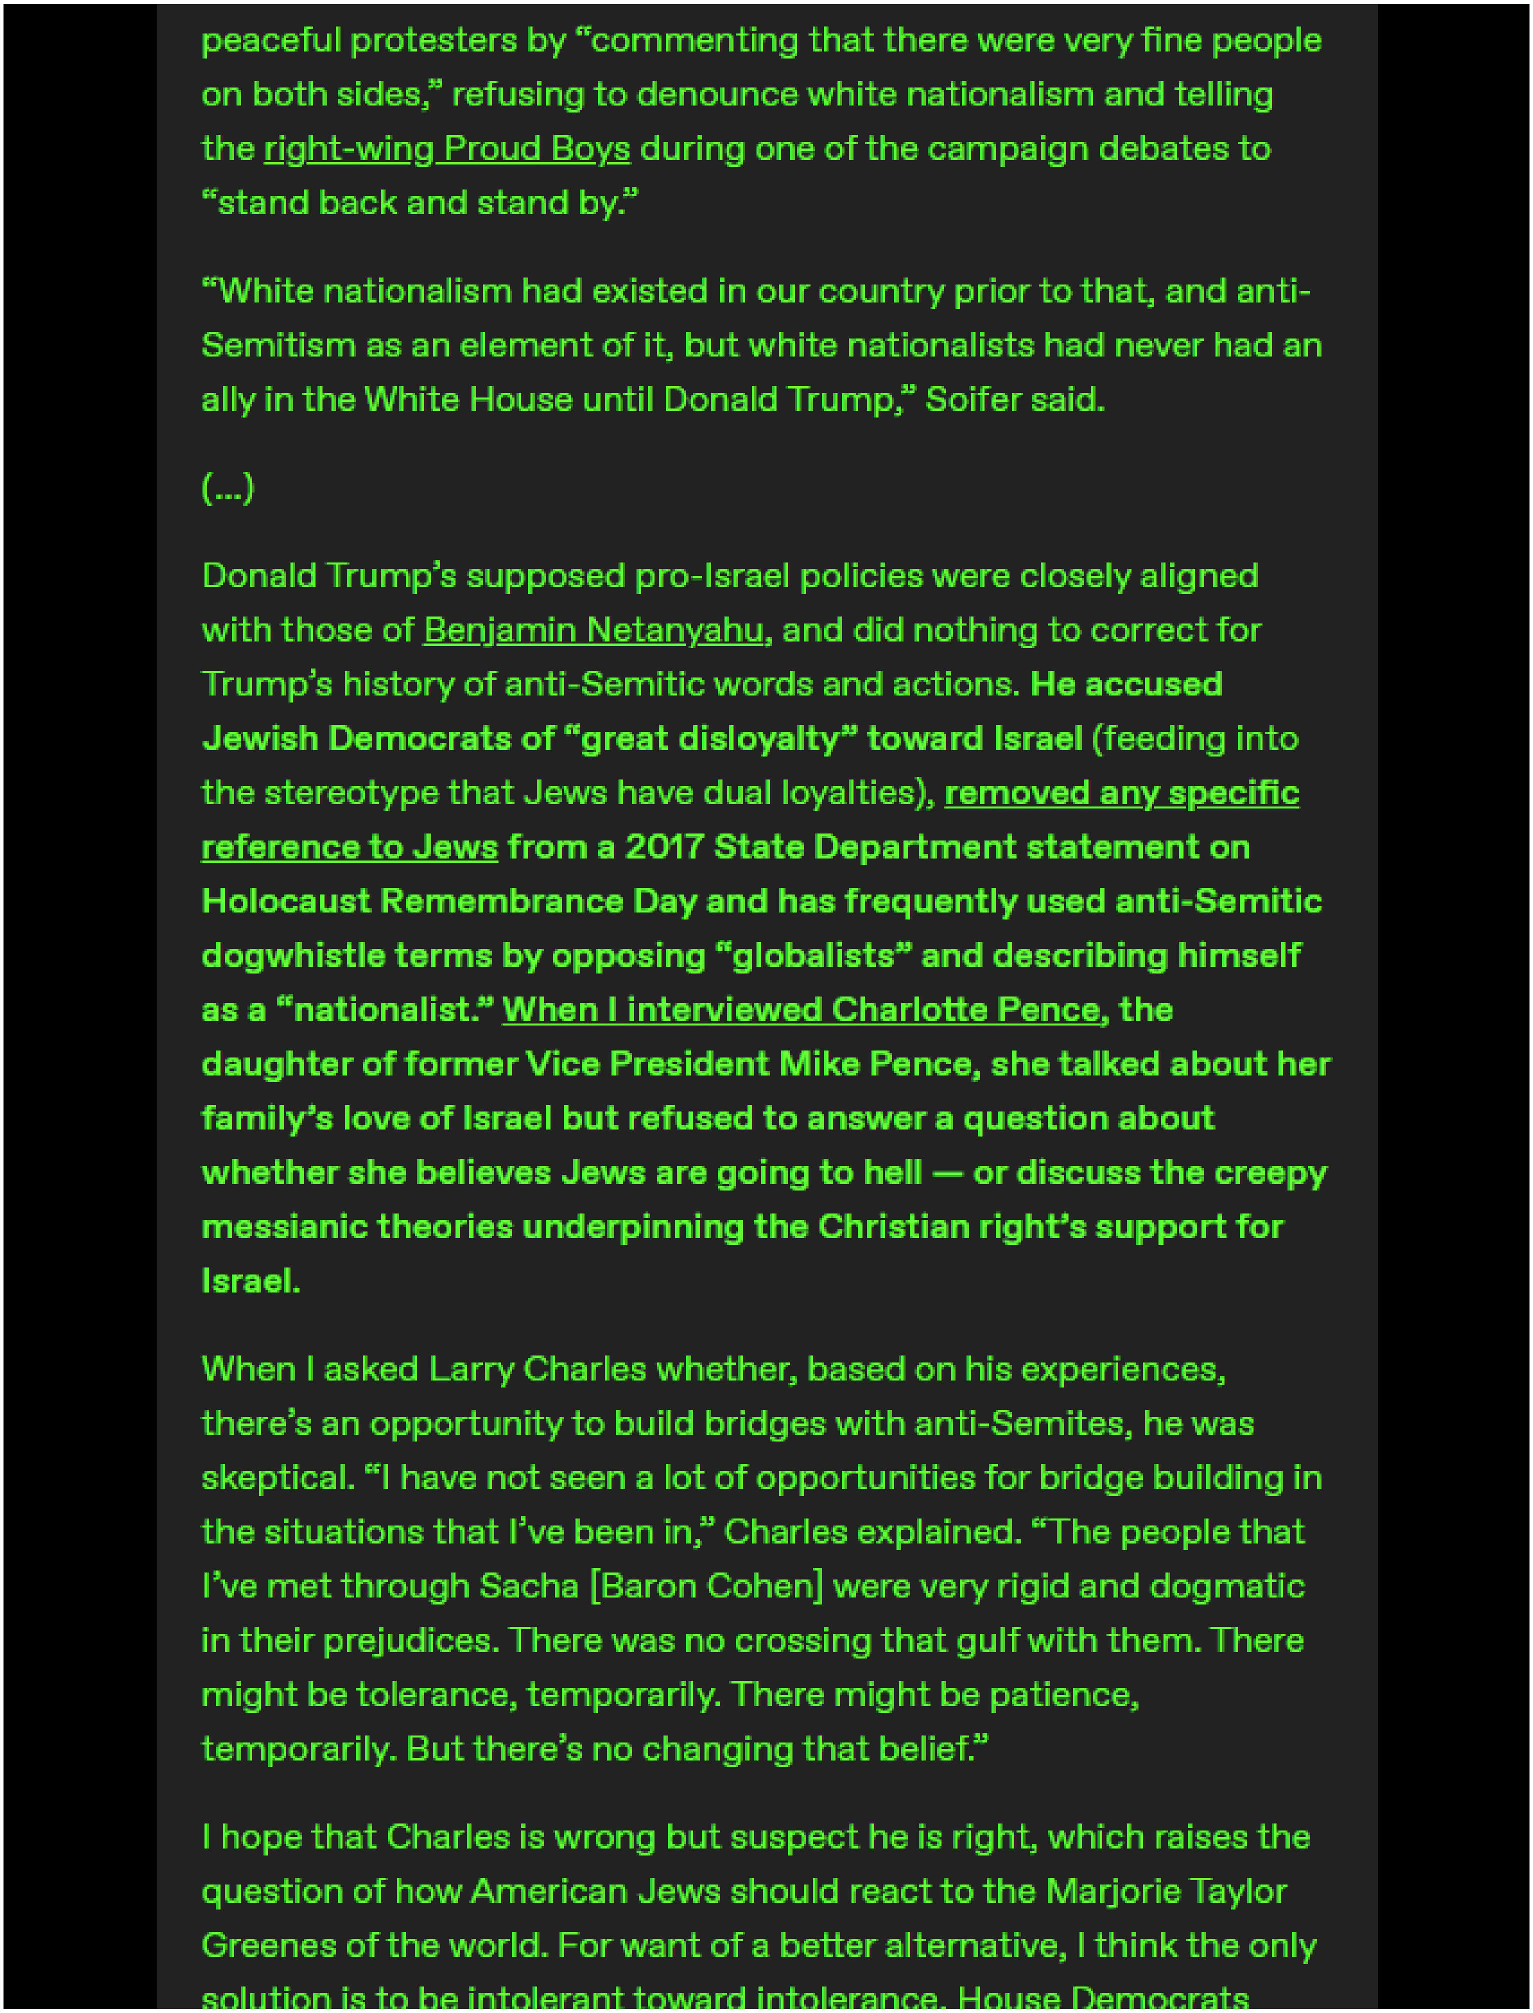
With the election of Trump in 2016, those ingrained belief systems — which for many years had been kept outside the American political mainstream — became more prominent, and their adherents more emboldened. David Weissman, a military veteran and former conservative Republican who stopped being a self-described “Trump troll” after a 2018 conversation with comedian Sarah Silverman, told Salon about his encounters with anti-Semitism on the right.

Back when he still supported Trump, Weissman recalled, he got into a “little spat” with an alt-right commentator who calls himself Baked Alaska, who was recently arrested after the Jan. 6 Capitol riot. Ultimately they moved past it, Weissman said: “We both realized we were Trump supporters” who believed “Democrats were the bad guys.” Once he left MAGA world, however, Weissman said “the anti-Semitism definitely escalated” in interactions with his former allies.

“When I became a Democrat, I was called ‘the k-word’” and targeted by “anti-Semitic slurs and tropes,” Weissman said. **Trump supporters sent “memes of me being Jewish in the oven,” and “put my name in parentheses,” a common tactic used by the far right to target someone for being Jewish.**

(...)

“Anti-Semitism certainly did not start with Marjorie Taylor Greene, nor did it start with Donald Trump, but we have seen an exponential increase in violent anti-Semitic incidents during Donald Trump’s presidency,” Halie Soifer, CEO of the Jewish Democratic Council of America, told Salon. “That is no doubt related to the fact that he emboldened and aligned himself with white nationalism.” She mentioned Trump equating the neo-Nazis in Charlottesville with the



peaceful protesters by "commenting that there were very fine people on both sides," refusing to denounce white nationalism and telling the right-wing Proud Boys during one of the campaign debates to "stand back and stand by."

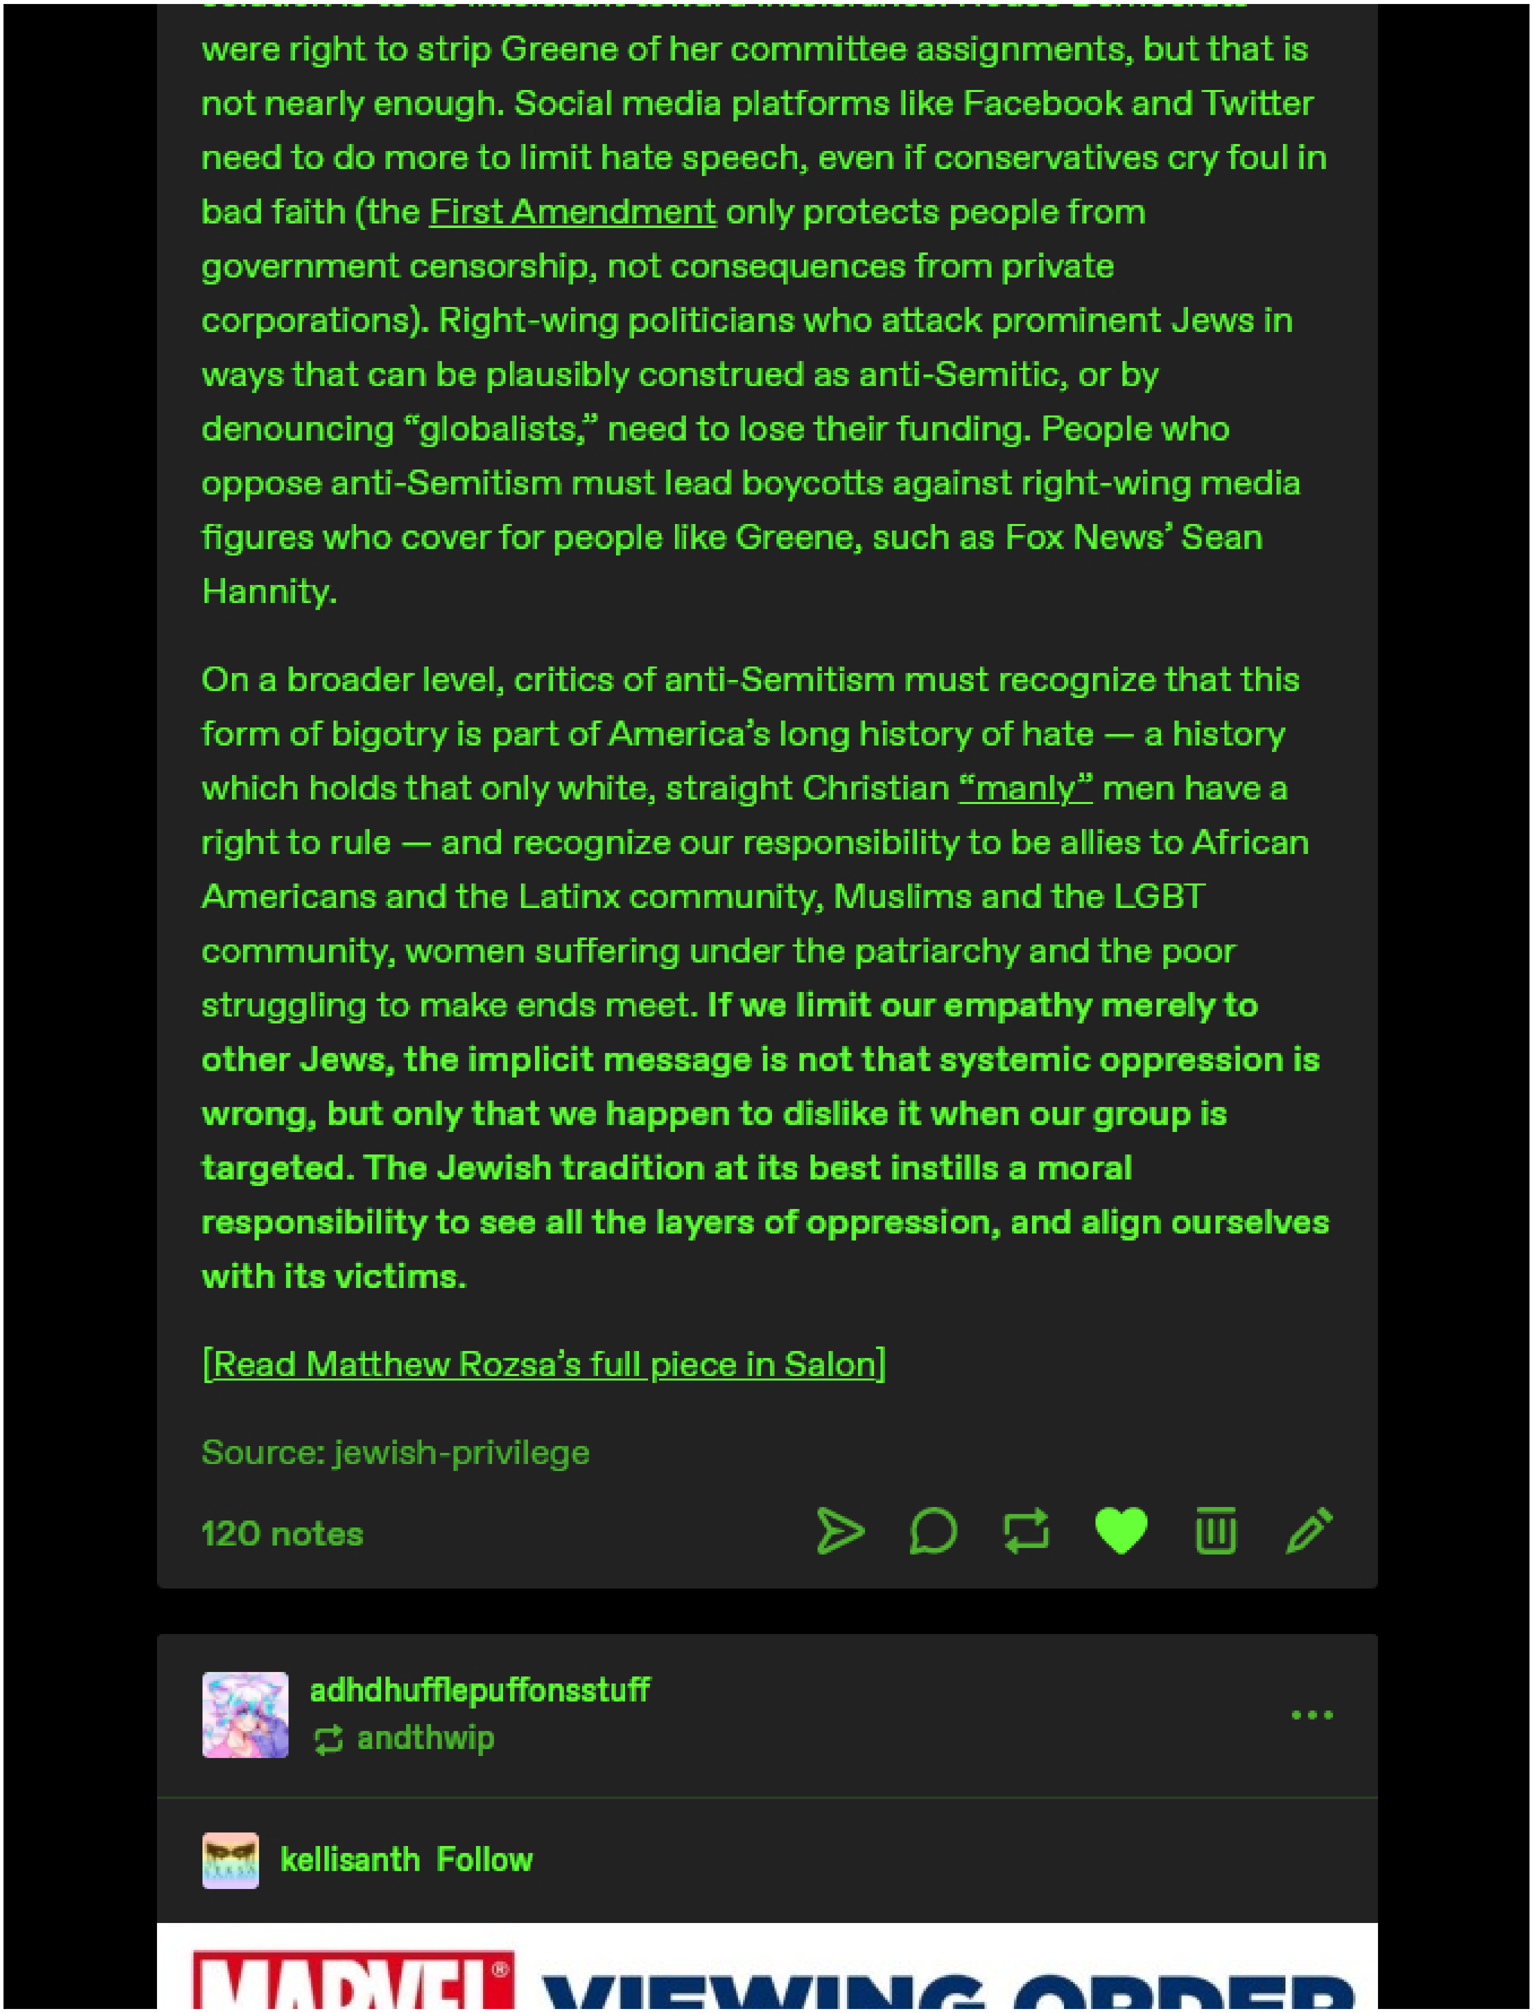
"White nationalism had existed in our country prior to that, and anti-Semitism as an element of it, but white nationalists had never had an ally in the White House until Donald Trump," Soifer said.

(...)

Donald Trump's supposed pro-Israel policies were closely aligned with those of Benjamin Netanyahu, and did nothing to correct for Trump's history of anti-Semitic words and actions. **He accused Jewish Democrats of "great disloyalty" toward Israel** (feeding into the stereotype that Jews have dual loyalties), **removed any specific reference to Jews from a 2017 State Department statement on Holocaust Remembrance Day and has frequently used anti-Semitic dogwhistle terms by opposing "globalists" and describing himself as a "nationalist." When I interviewed Charlotte Pence, the daughter of former Vice President Mike Pence, she talked about her family's love of Israel but refused to answer a question about whether she believes Jews are going to hell — or discuss the creepy messianic theories underpinning the Christian right's support for Israel.**

When I asked Larry Charles whether, based on his experiences, there's an opportunity to build bridges with anti-Semites, he was skeptical. "I have not seen a lot of opportunities for bridge building in the situations that I've been in," Charles explained. "The people that I've met through Sacha [Baron Cohen] were very rigid and dogmatic in their prejudices. There was no crossing that gulf with them. There might be tolerance, temporarily. There might be patience, temporarily. But there's no changing that belief."

I hope that Charles is wrong but suspect he is right, which raises the question of how American Jews should react to the Marjorie Taylor Greenes of the world. For want of a better alternative, I think the only solution is to be intolerant toward intolerance. House Democrats



were right to strip Greene of her committee assignments, but that is not nearly enough. Social media platforms like Facebook and Twitter need to do more to limit hate speech, even if conservatives cry foul in bad faith (the First Amendment only protects people from government censorship, not consequences from private corporations). Right-wing politicians who attack prominent Jews in ways that can be plausibly construed as anti-Semitic, or by denouncing “globalists,” need to lose their funding. People who oppose anti-Semitism must lead boycotts against right-wing media figures who cover for people like Greene, such as Fox News’ Sean Hannity.

On a broader level, critics of anti-Semitism must recognize that this form of bigotry is part of America’s long history of hate — a history which holds that only white, straight Christian “manly” men have a right to rule — and recognize our responsibility to be allies to African Americans and the Latinx community, Muslims and the LGBT community, women suffering under the patriarchy and the poor struggling to make ends meet. **If we limit our empathy merely to other Jews, the implicit message is not that systemic oppression is wrong, but only that we happen to dislike it when our group is targeted. The Jewish tradition at its best instills a moral responsibility to see all the layers of oppression, and align ourselves with its victims.**

[Video ID: a time-lapse video of a bedroom at night. The setup is deliberately the same as the trailer for the first Paranormal Activity movie, with the open door to the left facing down the hallway and the bed to the right. There is a couple sleeping in the bed. During the course of the video, the couple's objectively adorable black cat jumps across the bed and onto the top of the door, making the door creak. The cat also knocks a glass off the nightstand and shatters it, and finally discovers the camera. The video ends with the cat peering into the camera curiously. End ID.]

A neighbor called and said she saw a swarm on a fire hydrant so I grabbed my bucket and ran there as fast as I could. I dabbed some lemongrass oil on the bottom of it and they walked in. After about 5 minutes I just scooped the rest in and bam! Free bees!

I got the queen on the first scoop too though. Apparently she was a new one because she was piping in there really loudly. This is my first personal swarm catch so honestly I'm not sure if that was supposed to happen or not.

I feel this is an appropriate post to retell the time my dad got free bees (found an extra thrown swarm) but didn't have any equipment to transport them, so he just grabbed the queen in a pint jar, let the other swarm into his Ford Escort, and drove down the highway to home with a swarm of bees loose in the car.

I would honestly die of delight to find someone who watched my dad (~72 white guy) driving down a major Illinois highway with a swarm of bees loose in the car just chillin.

I'm sorry, he's just like that.

like, for example, if one trans person is dealing with hostility from their family and their own internalized transphobia and they're comforted by seeing a trans character face those same things, then that's fine and they should be allowed to. if another trans person finds those kinds of stories bleak and disheartening and would prefer to see a trans character with caring loved ones and who takes pride in their identity, then that's also fine and they should be allowed to. neither of them is doing the other any harm by looking for or making the content they personally want to see.

Same with abuse survivors (who I would argue *are* a marginalized group, tbh, especially since so many people are abused *because* they are lgbtq+)! There needs to be variety in the kind of stories told about abuse survivors. There are so many different reactions people can have to being abused. None is inherently superior, except, well, of course, not abusing someone in response to your anger about being abused is superior to abusing people for the same reason...

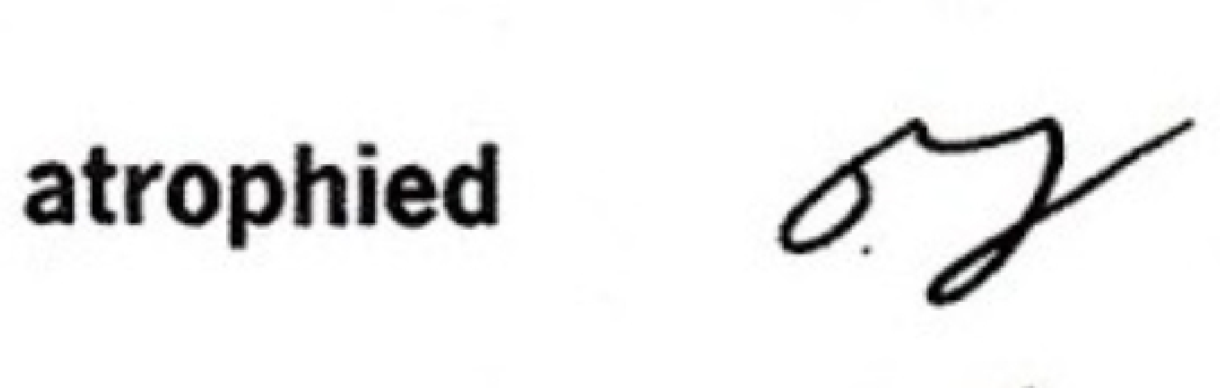
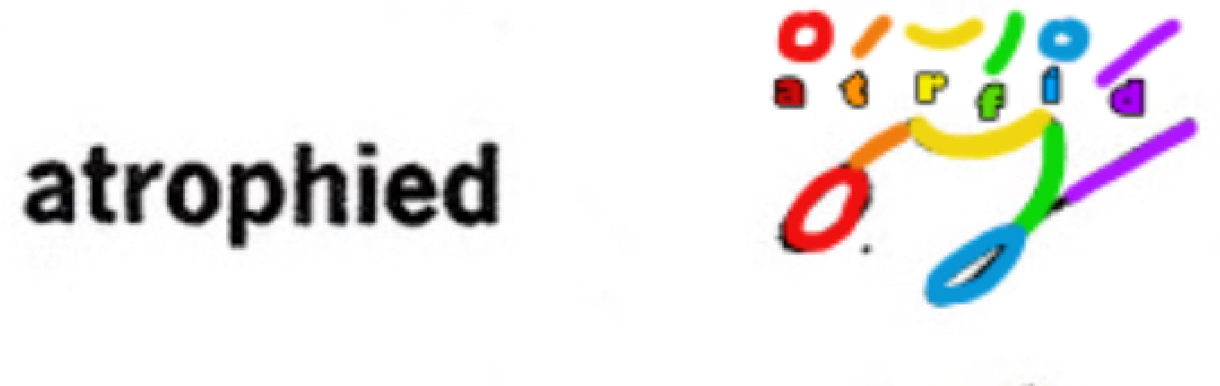
As you can see, there are set symbols for every letter.

Let's break one of the words down:





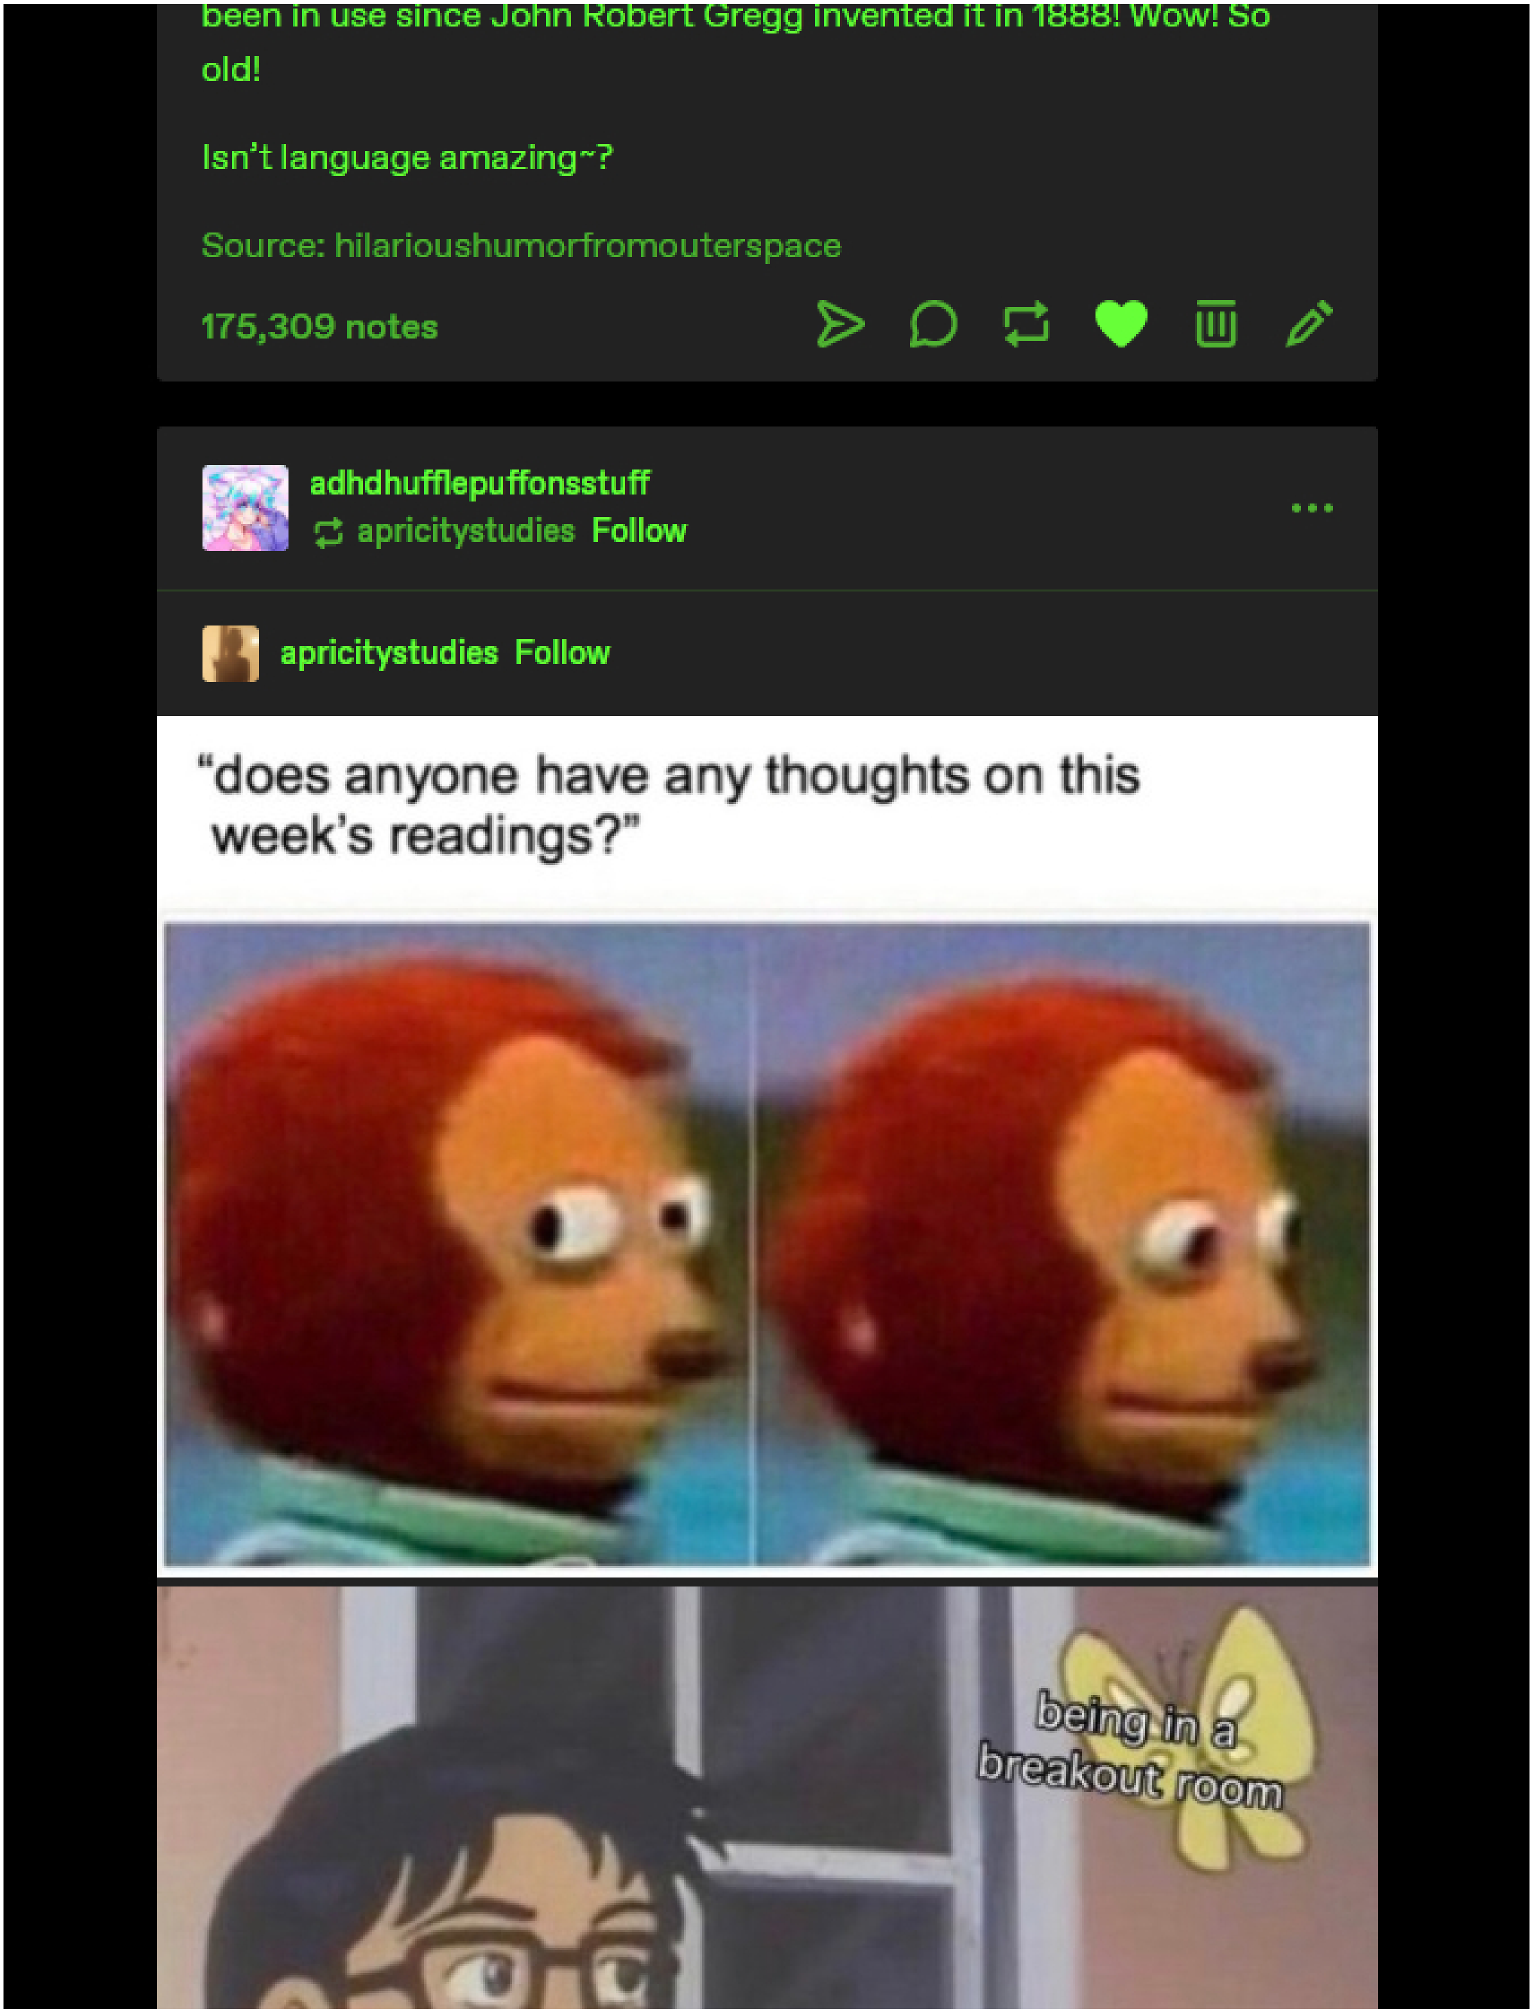
Using the Gregg Alphabet as reference, we can see most of the letters in “atrophied” are present. But why no “o” vowel, and why is “ph” written as “f”?

Simple. In shorthand, you cut out all vowels in a word when writing it down, with the exception of words that BEGIN or END with a vowel (hence the “a” at the start being present), or like in the “i” in “atrophied”, to make it more readable when the sound could be harder to distinguish if it isn’t written. In “atrophied” if the the “i” isn’t written, it could be hard to tell if the writer meant a “fud”, “fad”, “fod” or “fid” sound, for example.

Also, since Shorthand is a phonetic writing system, you are encouraged to write down the phonetic sounds of words rather than the actual letter blends - in this case, write an “f” instead of a “ph”.

So in actuality, these aren’t just meaningless scribbles - it’s Gregg Shorthand, a writing system developed to take down notes more quickly than when written out in full, which is very useful in a medical or journalistic environment.

Some people can even write over 100 words in a minute! And, it’s



been in use since John Robert Gregg invented it in 1888! Wow! So old!

Isn't language amazing~?

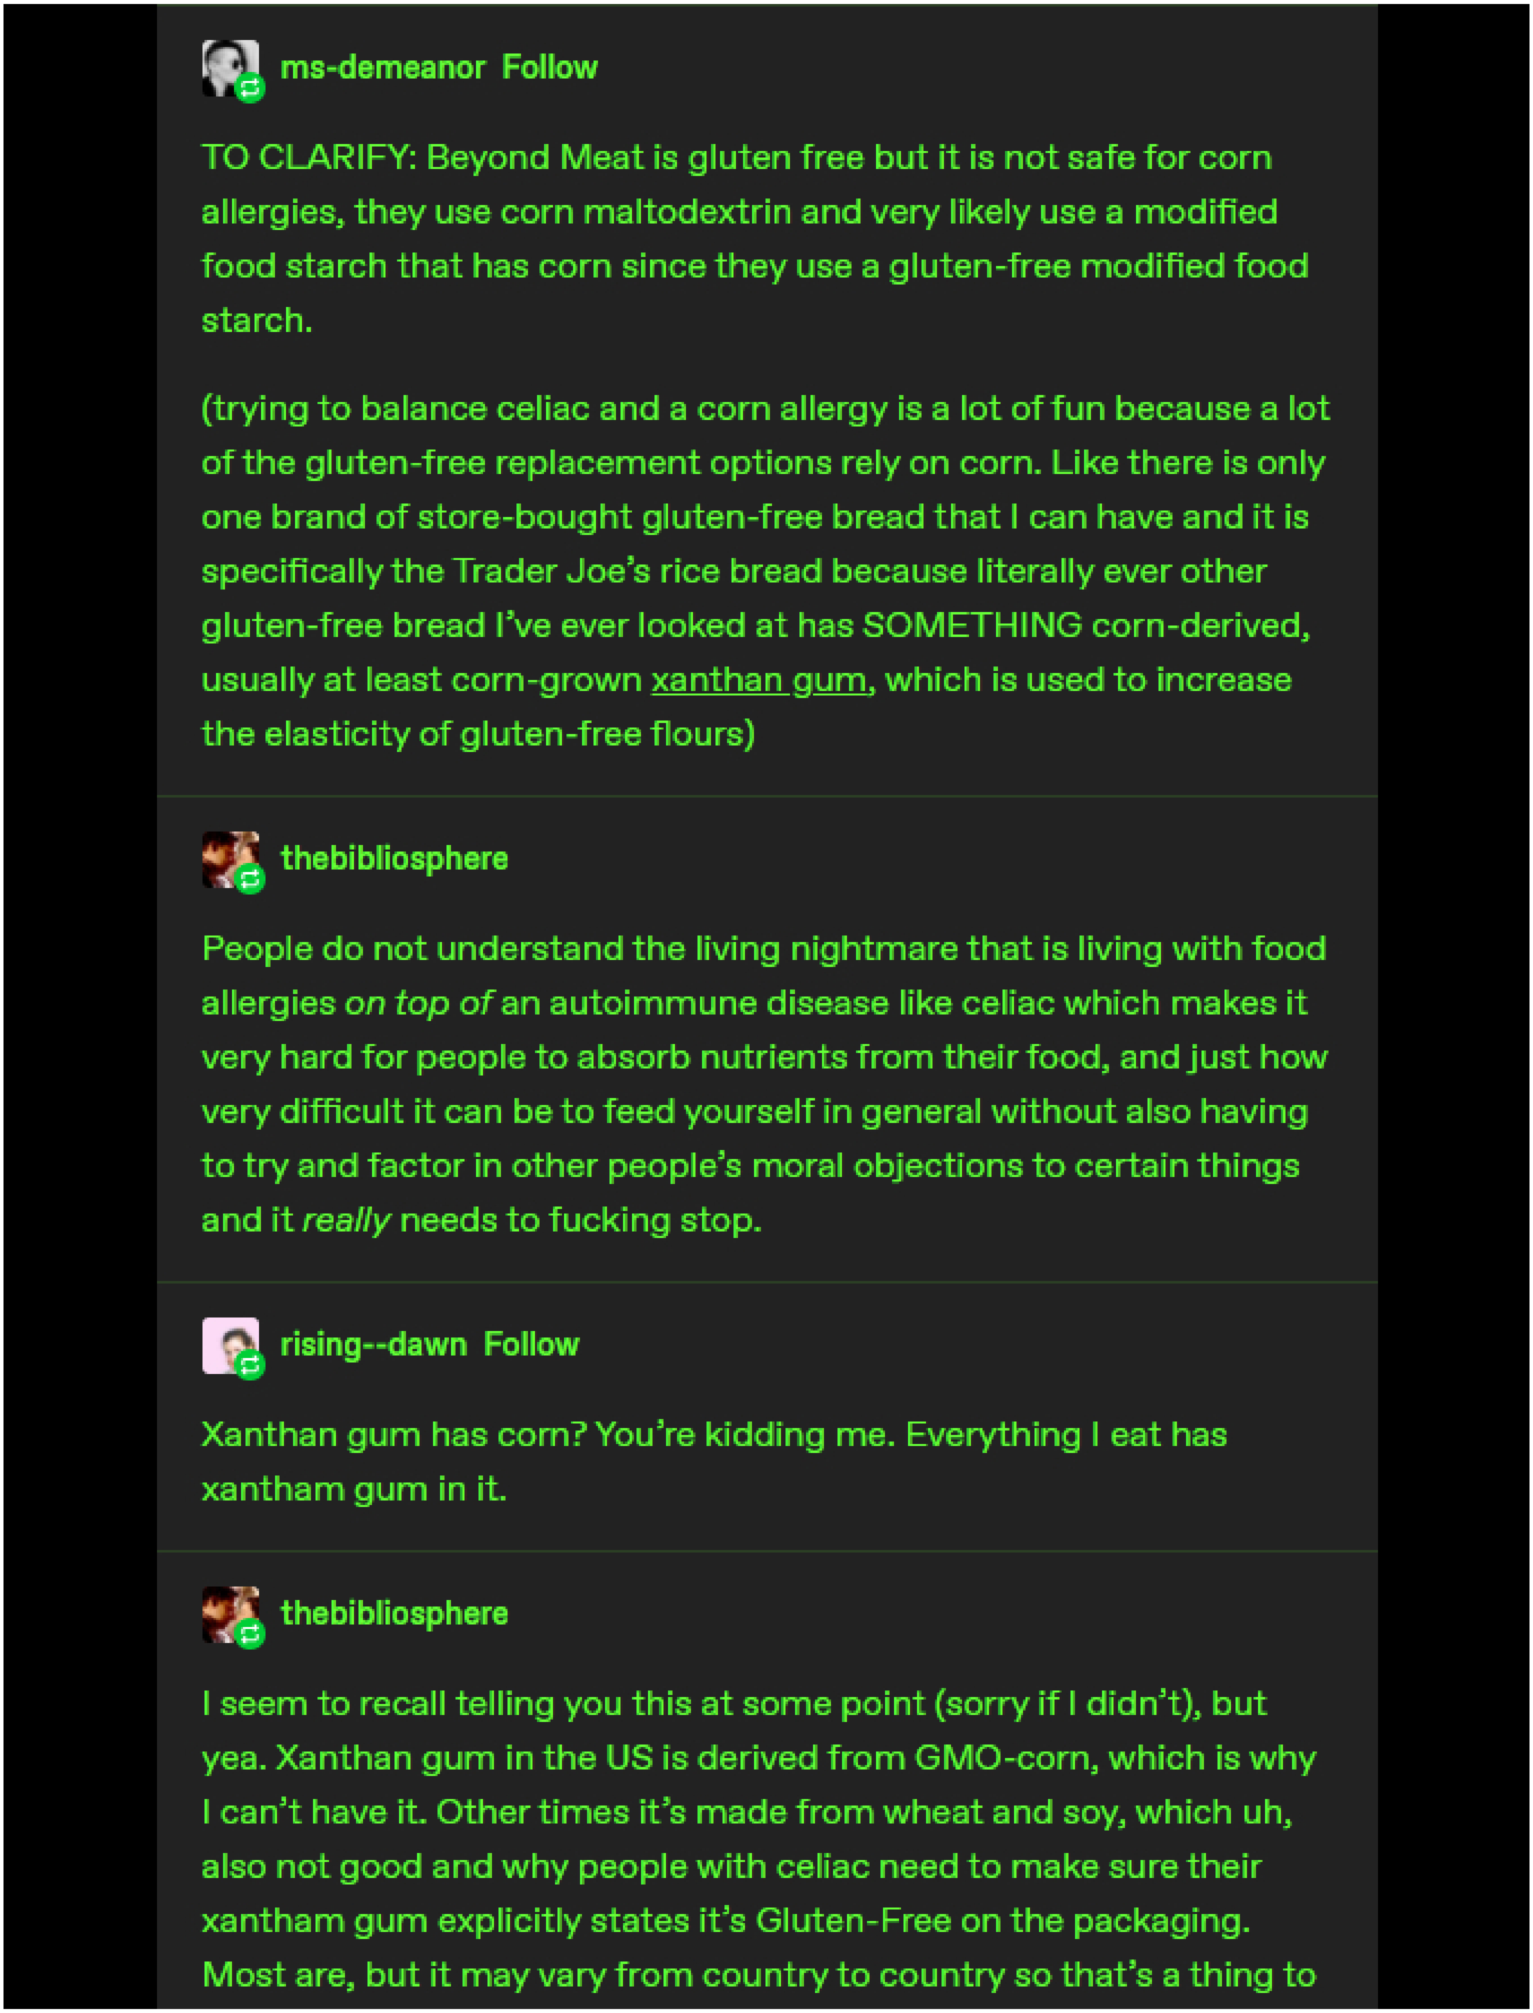
math-is-magic Follow

I'm sorry, I don't understand. Since when is wheat an animal byproduct?

ms-demeanor Follow

Wheat is not an animal byproduct but it is a frequent ingredient in meat alternatives and sometimes people will try to trick you into eating meat alternatives to show you that you actually like them and should eat more of them, the problem with that is that wheat and corn and coconut and soy allergies all exist so if you try to trick someone into eating a meat alternative food you might actually be feeding them something they're seriously allergic to.

Personally I've got celiac disease, a corn allergy, AND a non-celiac wheat allergy and I have yet to find a meat alternative (other than soy-only TVP) that I am not allergic to.



ms-demeanor Follow

TO CLARIFY: Beyond Meat is gluten free but it is not safe for corn allergies, they use corn maltodextrin and very likely use a modified food starch that has corn since they use a gluten-free modified food starch.

(trying to balance celiac and a corn allergy is a lot of fun because a lot of the gluten-free replacement options rely on corn. Like there is only one brand of store-bought gluten-free bread that I can have and it is specifically the Trader Joe's rice bread because literally ever other gluten-free bread I've ever looked at has SOMETHING corn-derived, usually at least corn-grown xanthan gum, which is used to increase the elasticity of gluten-free flours)

thebibliosphere

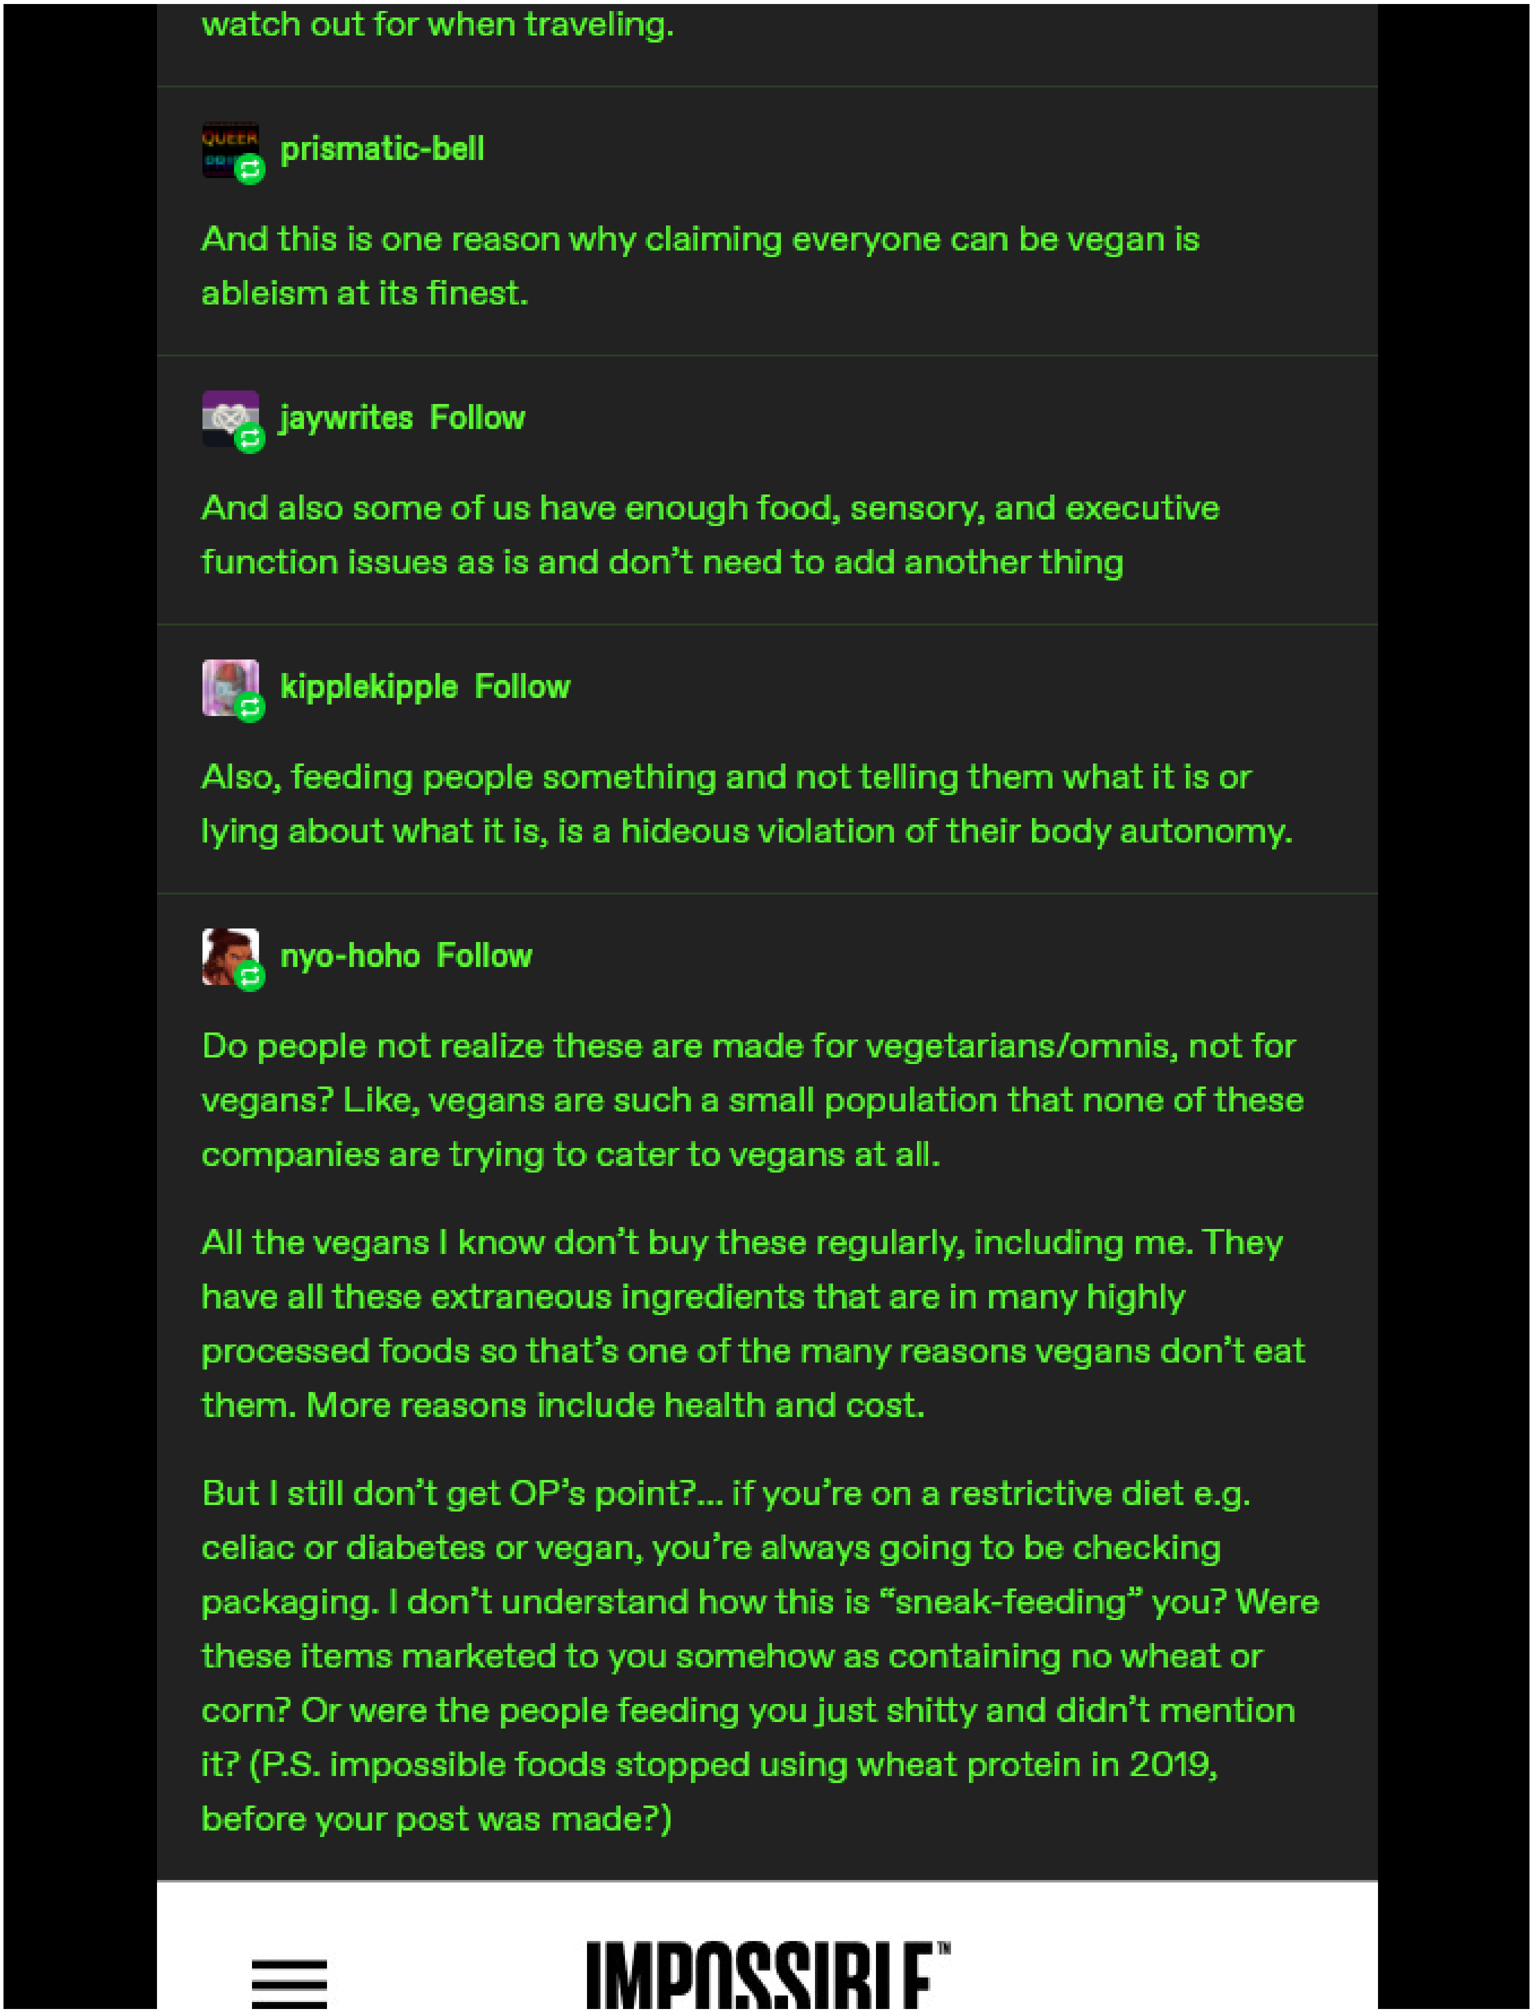
People do not understand the living nightmare that is living with food allergies *on top of* an autoimmune disease like celiac which makes it very hard for people to absorb nutrients from their food, and just how very difficult it can be to feed yourself in general without also having to try and factor in other people's moral objections to certain things and it *really* needs to fucking stop.

rising--dawn Follow

Xanthan gum has corn? You're kidding me. Everything I eat has xantham gum in it.

thebibliosphere

I seem to recall telling you this at some point (sorry if I didn't), but yea. Xanthan gum in the US is derived from GMO-corn, which is why I can't have it. Other times it's made from wheat and soy, which uh, also not good and why people with celiac need to make sure their xantham gum explicitly states it's Gluten-Free on the packaging. Most are, but it may vary from country to country so that's a thing to



watch out for when traveling.

prismatic-bell

And this is one reason why claiming everyone can be vegan is ableism at its finest.

jaywrites Follow

And also some of us have enough food, sensory, and executive function issues as is and don't need to add another thing

kipplekipple Follow

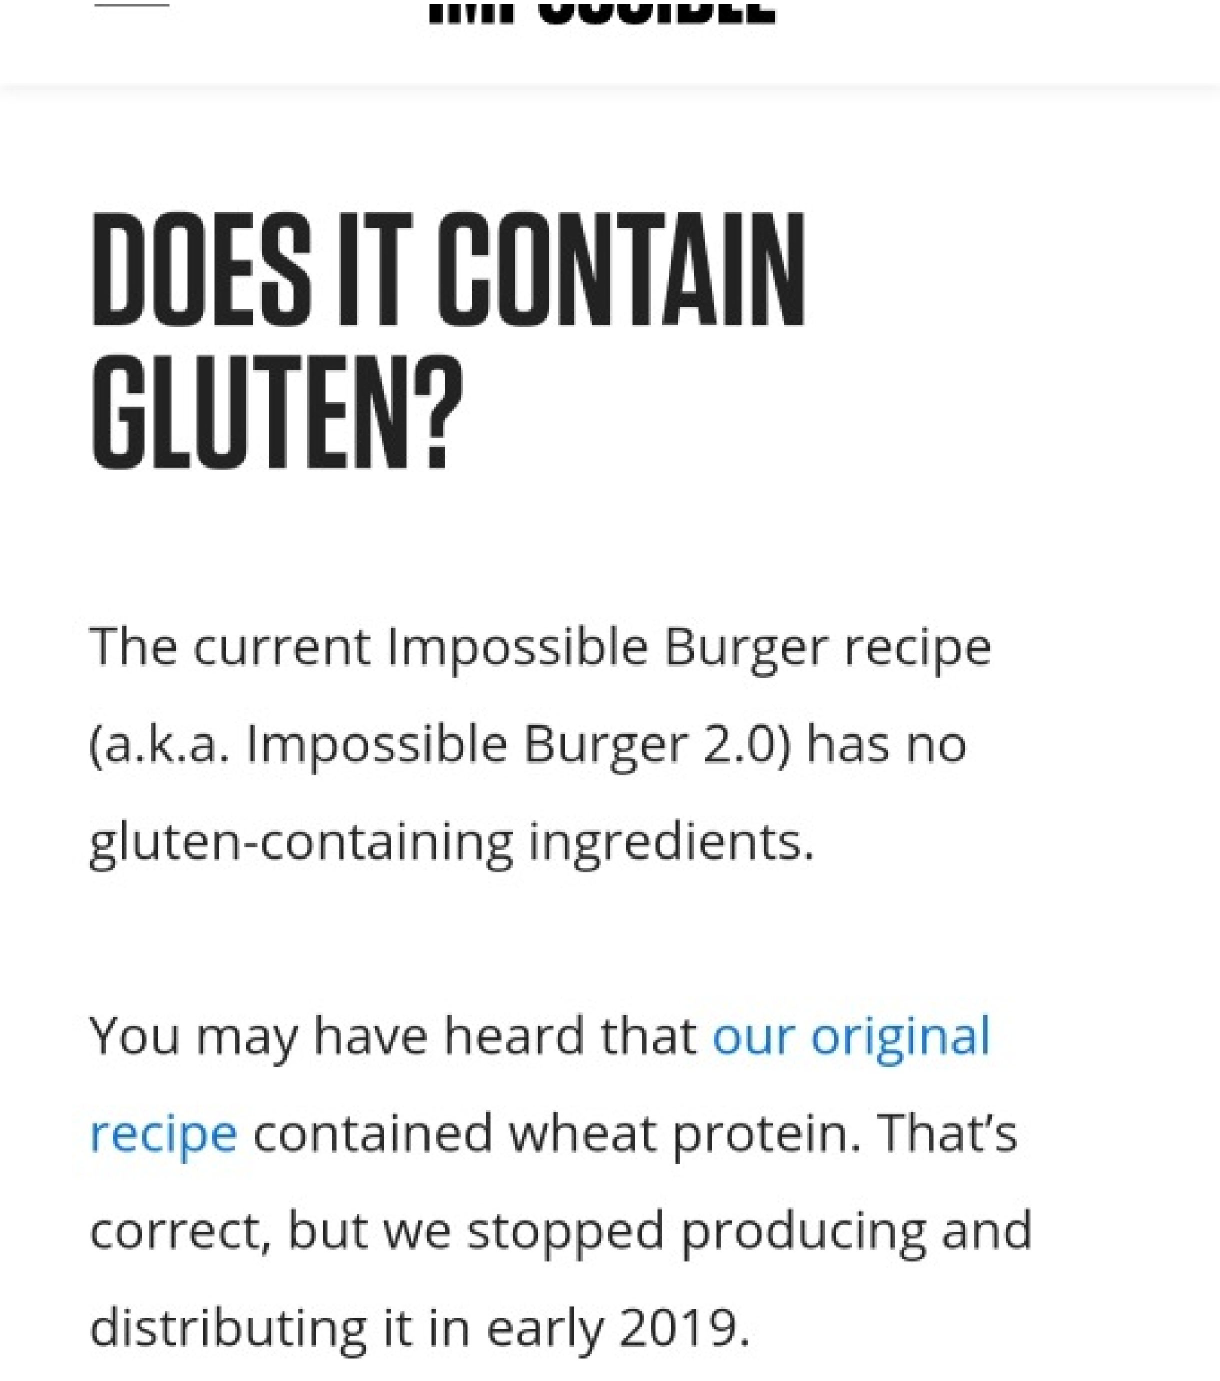
Also, feeding people something and not telling them what it is or lying about what it is, is a hideous violation of their body autonomy.

nyo-hoho Follow

Do people not realize these are made for vegetarians/omnis, not for vegans? Like, vegans are such a small population that none of these companies are trying to cater to vegans at all.

All the vegans I know don't buy these regularly, including me. They have all these extraneous ingredients that are in many highly processed foods so that's one of the many reasons vegans don't eat them. More reasons include health and cost.

But I still don't get OP's point?… if you're on a restrictive diet e.g. celiac or diabetes or vegan, you're always going to be checking packaging. I don't understand how this is "sneak-feeding" you? Were these items marketed to you somehow as containing no wheat or corn? Or were the people feeding you just shitty and didn't mention it? (P.S. impossible foods stopped using wheat protein in 2019, before your post was made?)



DOES IT CONTAIN GLUTEN?

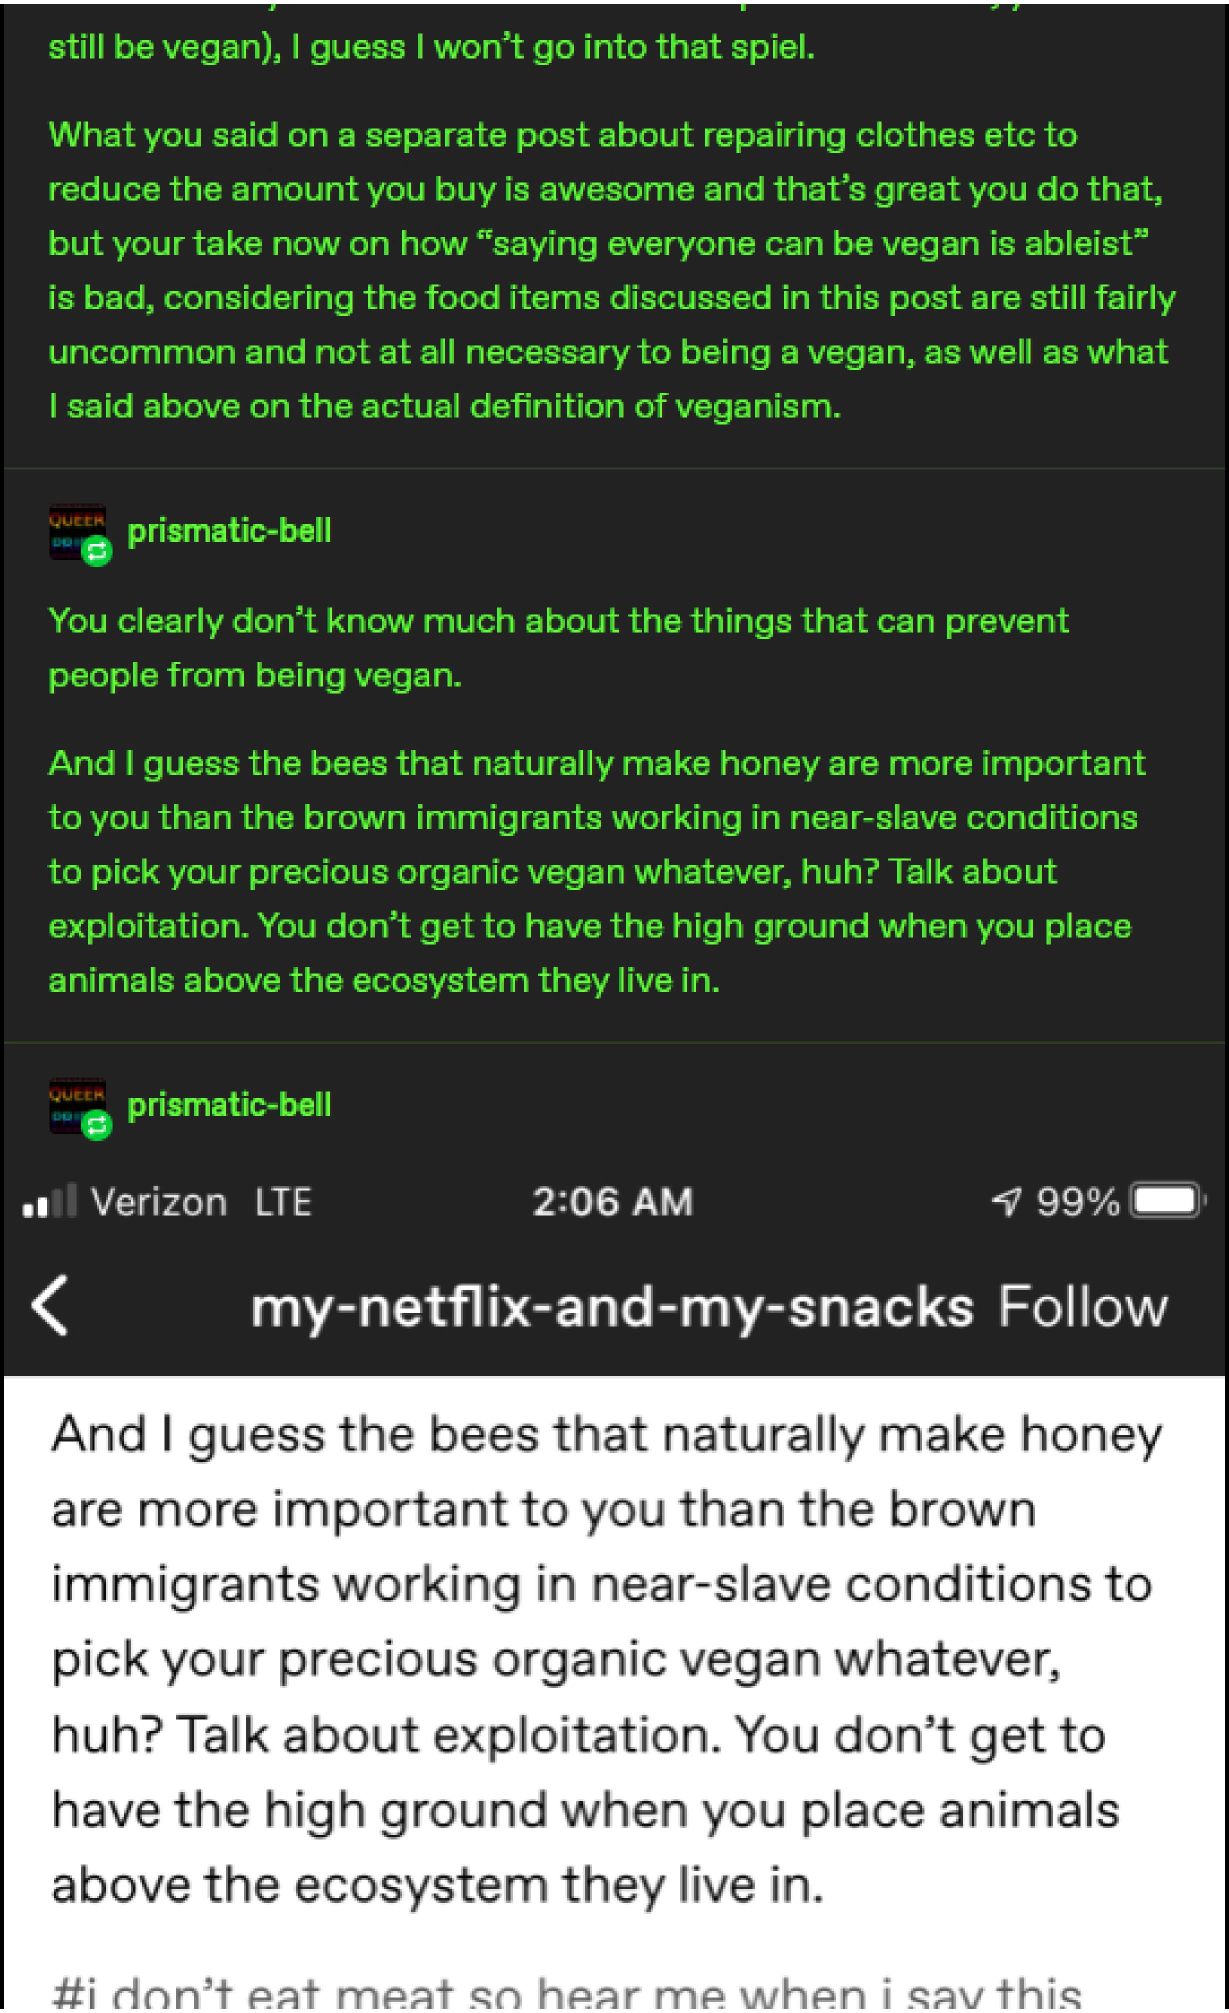
The current Impossible Burger recipe (a.k.a. Impossible Burger 2.0) has no gluten-containing ingredients.

You may have heard that our original recipe contained wheat protein. That's correct, but we stopped producing and distributing it in early 2019.

Also, the quorn vegetarian nuggets are breaded, therefore have flour, as per any breaded item, so that one isn't very surprising.

Most processed foods contain some version of xanthum gum and/or maltodextrin, including *unbreaded* frozen meats - so I'm still really confused how specifically only vegan/vegetarian alternatives are "sneak-feeding" you.

Also @prismatic-bell as I've seen someone before has already told you that being vegan means to reduce the amount of exploitation you personally participate in as far as is practical (meaning if for some reason you have to consume animal products to live, you can



still be vegan), I guess I won't go into that spiel.

What you said on a separate post about repairing clothes etc to reduce the amount you buy is awesome and that's great you do that, but your take now on how "saying everyone can be vegan is ableist" is bad, considering the food items discussed in this post are still fairly uncommon and not at all necessary to being a vegan, as well as what I said above on the actual definition of veganism.

prismatic-bell

You clearly don't know much about the things that can prevent people from being vegan.

And I guess the bees that naturally make honey are more important to you than the brown immigrants working in near-slave conditions to pick your precious organic vegan whatever, huh? Talk about exploitation. You don't get to have the high ground when you place animals above the ecosystem they live in.

Wheat is not an animal byproduct but it is a frequent ingredient in meat alternatives and sometimes people will try to trick you into eating meat alternatives to show you that you actually like them and should eat more of them, the problem with that is that wheat and corn and coconut and soy allergies all exist so if you try to trick someone into eating a meat alternative food you might actually be feeding them something they're seriously allergic to.

Personally I've got celiac disease, a corn allergy, AND a non-celiac wheat allergy and I have yet to find a meat alternative (other than soy-only TVP) that I am not allergic to.

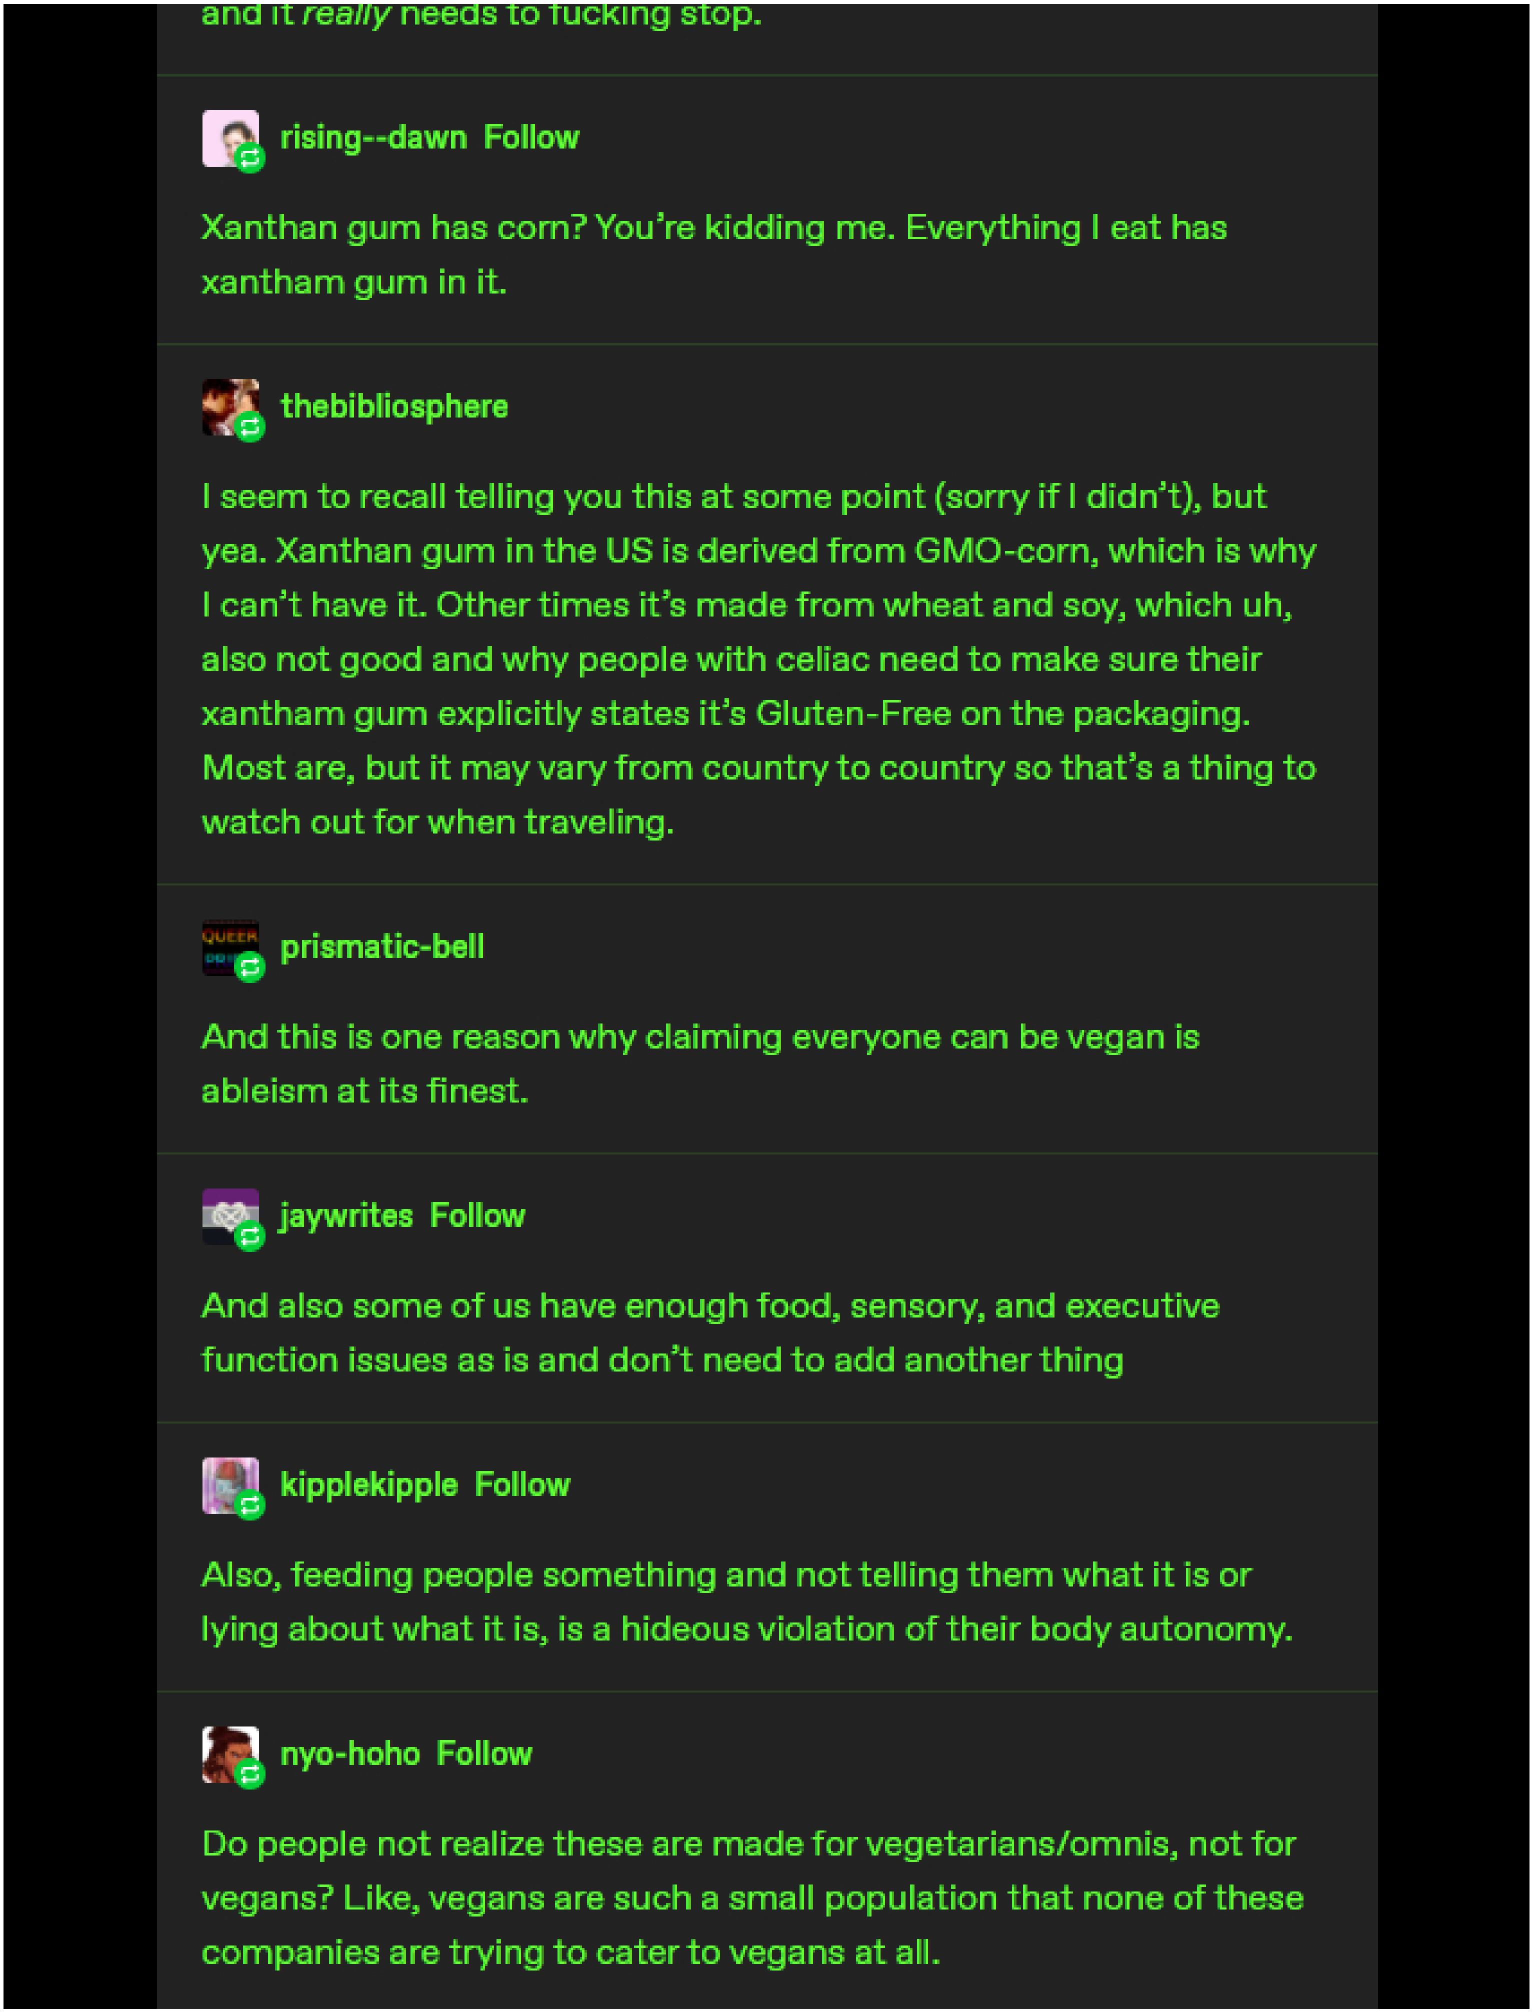
ms-demeanor Follow

TO CLARIFY: Beyond Meat is gluten free but it is not safe for corn allergies, they use corn maltodextrin and very likely use a modified food starch that has corn since they use a gluten-free modified food starch.

(trying to balance celiac and a corn allergy is a lot of fun because a lot of the gluten-free replacement options rely on corn. Like there is only one brand of store-bought gluten-free bread that I can have and it is specifically the Trader Joe's rice bread because literally ever other gluten-free bread I've ever looked at has SOMETHING corn-derived, usually at least corn-grown xanthan gum, which is used to increase the elasticity of gluten-free flours)

thebibliosphere

People do not understand the living nightmare that is living with food allergies *on top of* an autoimmune disease like celiac which makes it very hard for people to absorb nutrients from their food, and just how very difficult it can be to feed yourself in general without also having to try and factor in other people's moral objections to certain things



and it *really* needs to fucking stop.

rising--dawn Follow

Xanthan gum has corn? You're kidding me. Everything I eat has xantham gum in it.

thebibliosphere

I seem to recall telling you this at some point (sorry if I didn't), but yea. Xanthan gum in the US is derived from GMO-corn, which is why I can't have it. Other times it's made from wheat and soy, which uh, also not good and why people with celiac need to make sure their xantham gum explicitly states it's Gluten-Free on the packaging. Most are, but it may vary from country to country so that's a thing to watch out for when traveling.

And this is one reason why claiming everyone can be vegan is ableism at its finest.

jaywrites Follow

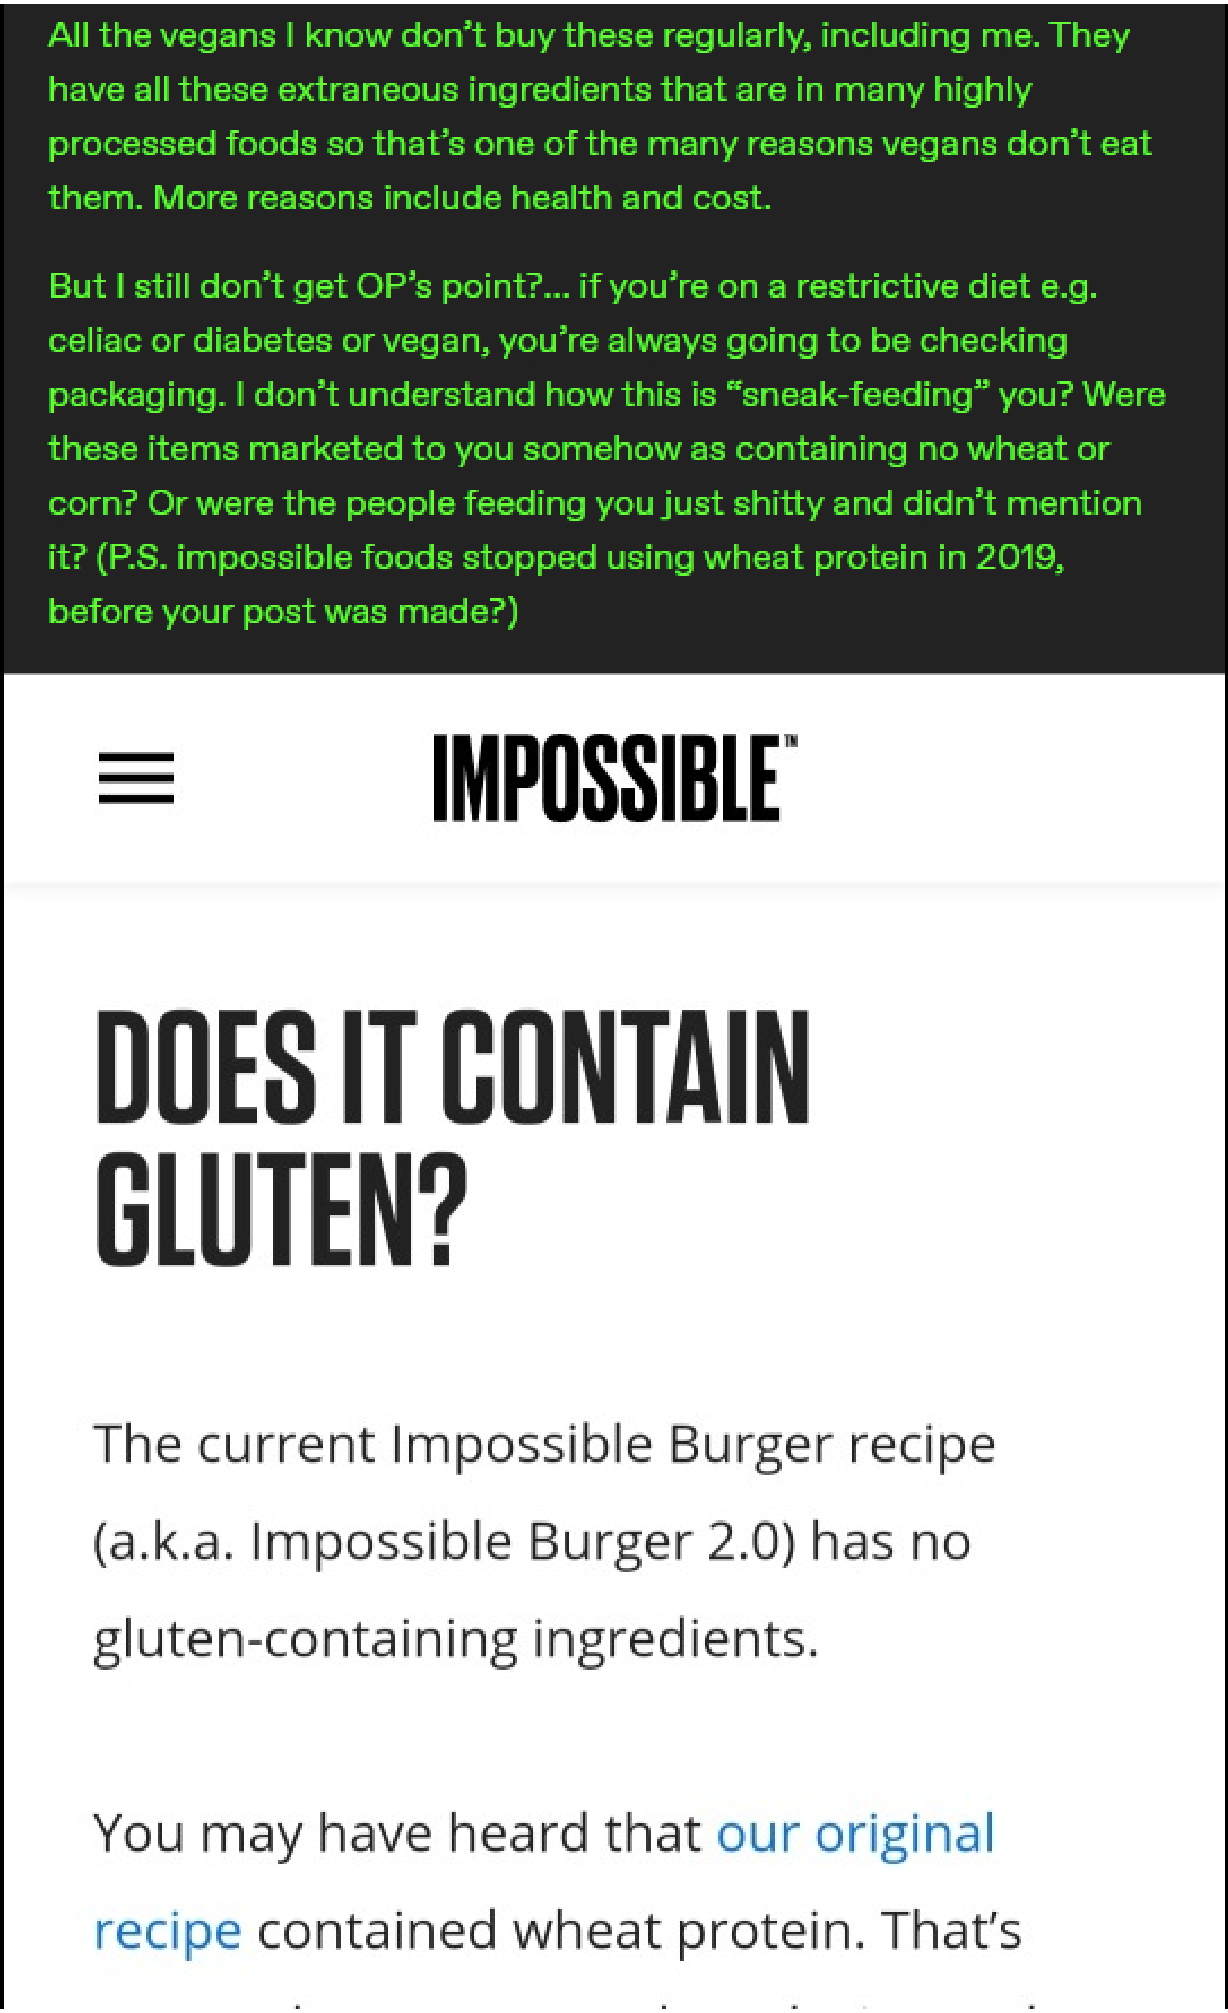
And also some of us have enough food, sensory, and executive function issues as is and don't need to add another thing

kipplekipple Follow

Also, feeding people something and not telling them what it is or lying about what it is, is a hideous violation of their body autonomy.

nyo-hoho Follow

Do people not realize these are made for vegetarians/omnis, not for vegans? Like, vegans are such a small population that none of these companies are trying to cater to vegans at all.



All the vegans I know don't buy these regularly, including me. They have all these extraneous ingredients that are in many highly processed foods so that's one of the many reasons vegans don't eat them. More reasons include health and cost.

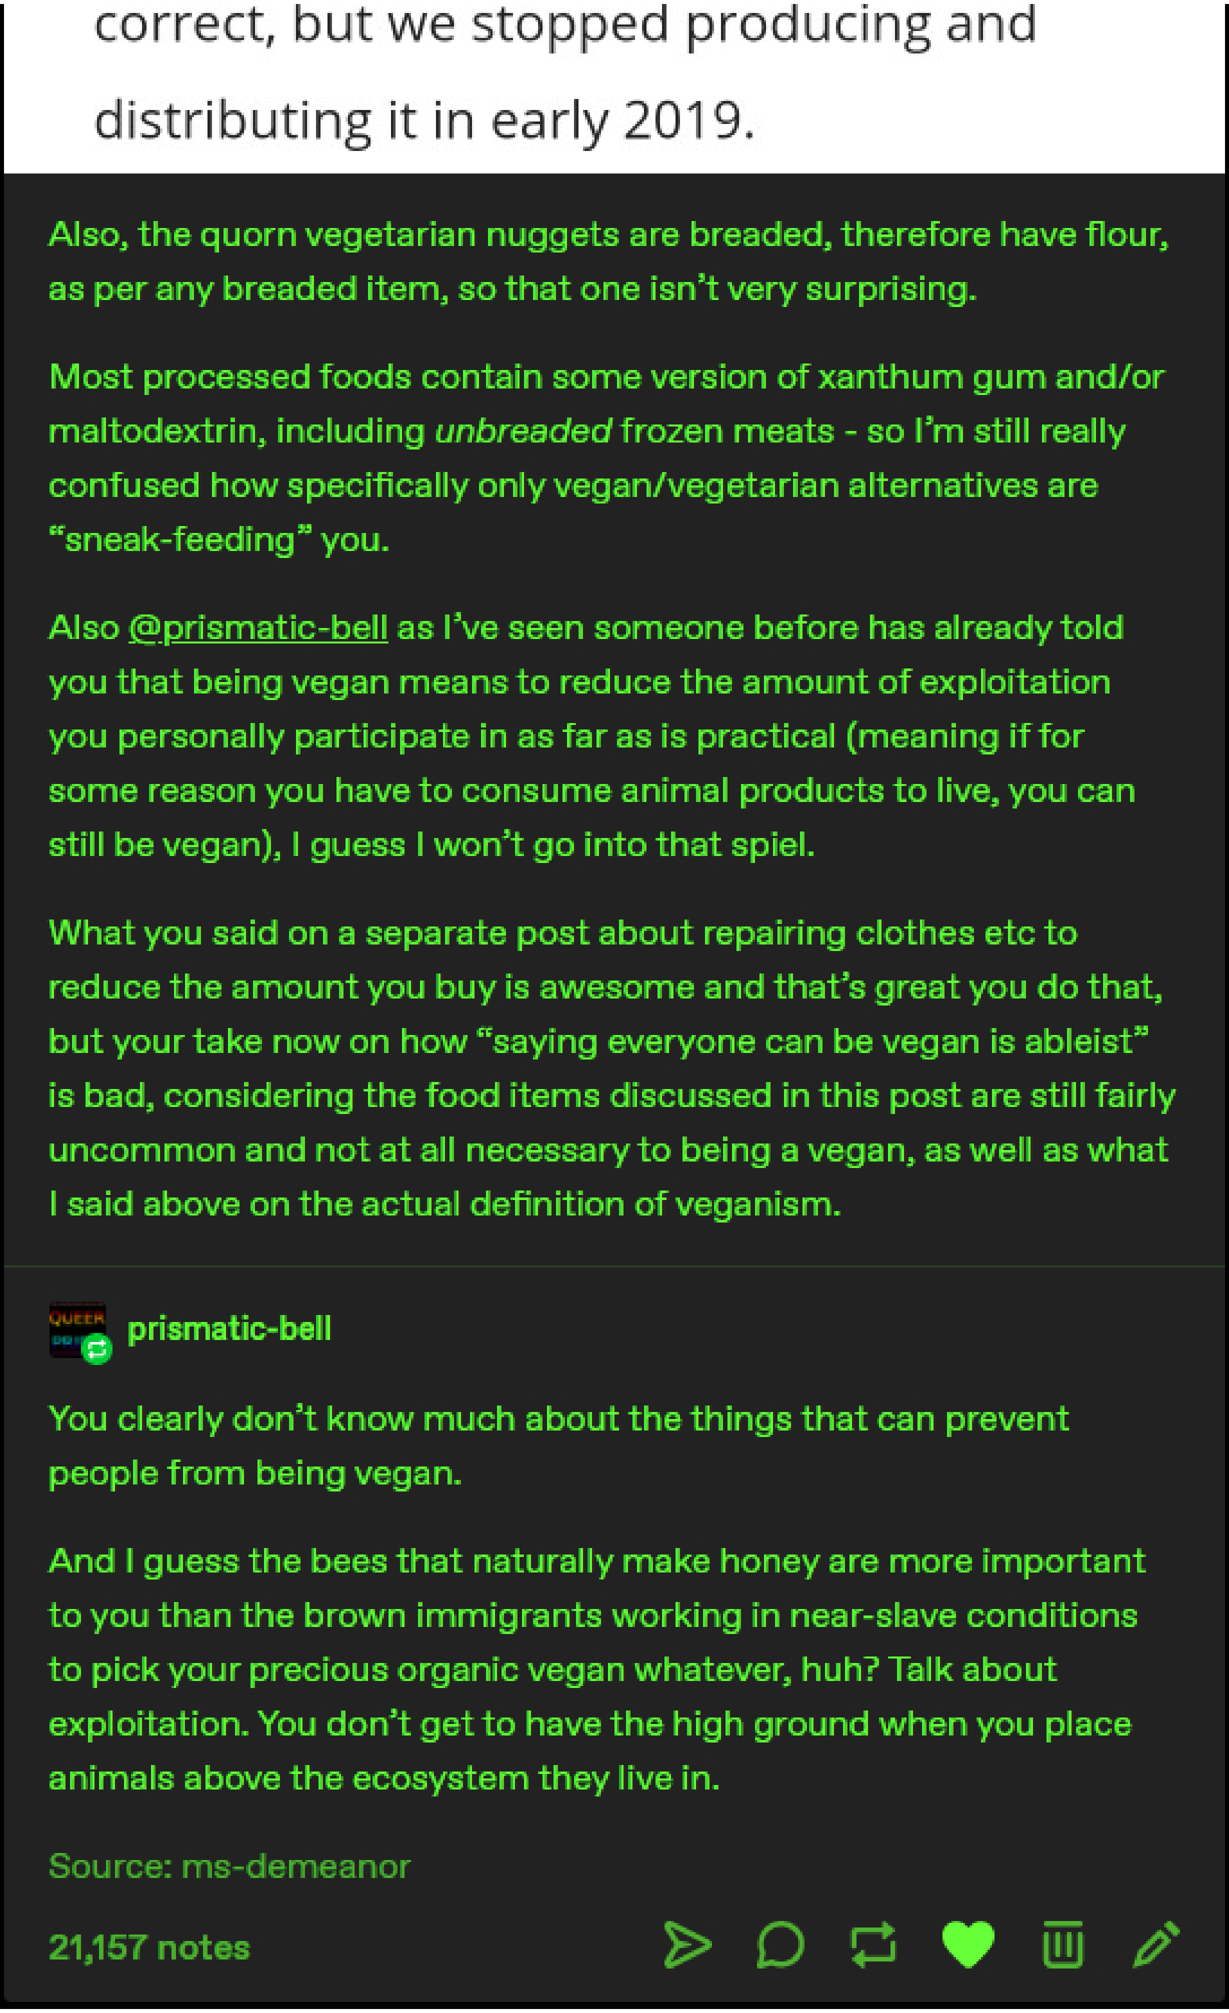
But I still don't get OP's point?… if you're on a restrictive diet e.g. celiac or diabetes or vegan, you're always going to be checking packaging. I don't understand how this is "sneak-feeding" you? Were these items marketed to you somehow as containing no wheat or corn? Or were the people feeding you just shitty and didn't mention it? (P.S. impossible foods stopped using wheat protein in 2019, before your post was made?)

IMPOSSIBLE™

DOES IT CONTAIN GLUTEN?

The current Impossible Burger recipe (a.k.a. Impossible Burger 2.0) has no gluten-containing ingredients.

You may have heard that our original recipe contained wheat protein. That's



correct, but we stopped producing and distributing it in early 2019.

Also, the quorn vegetarian nuggets are breaded, therefore have flour, as per any breaded item, so that one isn’t very surprising.

Most processed foods contain some version of xanthum gum and/or maltodextrin, including *unbreaded* frozen meats - so I’m still really confused how specifically only vegan/vegetarian alternatives are “sneak-feeding” you.

Also @prismatic-bell as I’ve seen someone before has already told you that being vegan means to reduce the amount of exploitation you personally participate in as far as is practical (meaning if for some reason you have to consume animal products to live, you can still be vegan), I guess I won’t go into that spiel.

What you said on a separate post about repairing clothes etc to reduce the amount you buy is awesome and that’s great you do that, but your take now on how “saying everyone can be vegan is ableist” is bad, considering the food items discussed in this post are still fairly uncommon and not at all necessary to being a vegan, as well as what I said above on the actual definition of veganism.

prismatic-bell

You clearly don’t know much about the things that can prevent people from being vegan.

And I guess the bees that naturally make honey are more important to you than the brown immigrants working in near-slave conditions to pick your precious organic vegan whatever, huh? Talk about exploitation. You don’t get to have the high ground when you place animals above the ecosystem they live in.

Noooo, that smoke at the beginning makes the bees sleepy so they can be safely removed!

skyeofdragons Follow

A bee's instinctual reaction to smoke is to 1. Gorge on honey and then 2. Get to a place that isn't smoky. When they smell the smoke, they also stop wanting to sting- Think about it, the colony isn't going to survive a forest fire if they are all stinging the crap out of every frightened beastie that comes by, and refusing to flee the danger to defend the leftover comb.

So when the lady has smoked them into docility, it's very easy to use those anti-forest-fire measures to scoot the bees! They are offered a place that isn't smoky, it seems safe, and oh look the Queen has decided it's a good spot to hunker down too!- So all the bees say guess we live here now. Giving them the comb just helps them "rebuild" from a "disaster" more quickly, since the "fire" didn't completely destroy everything.

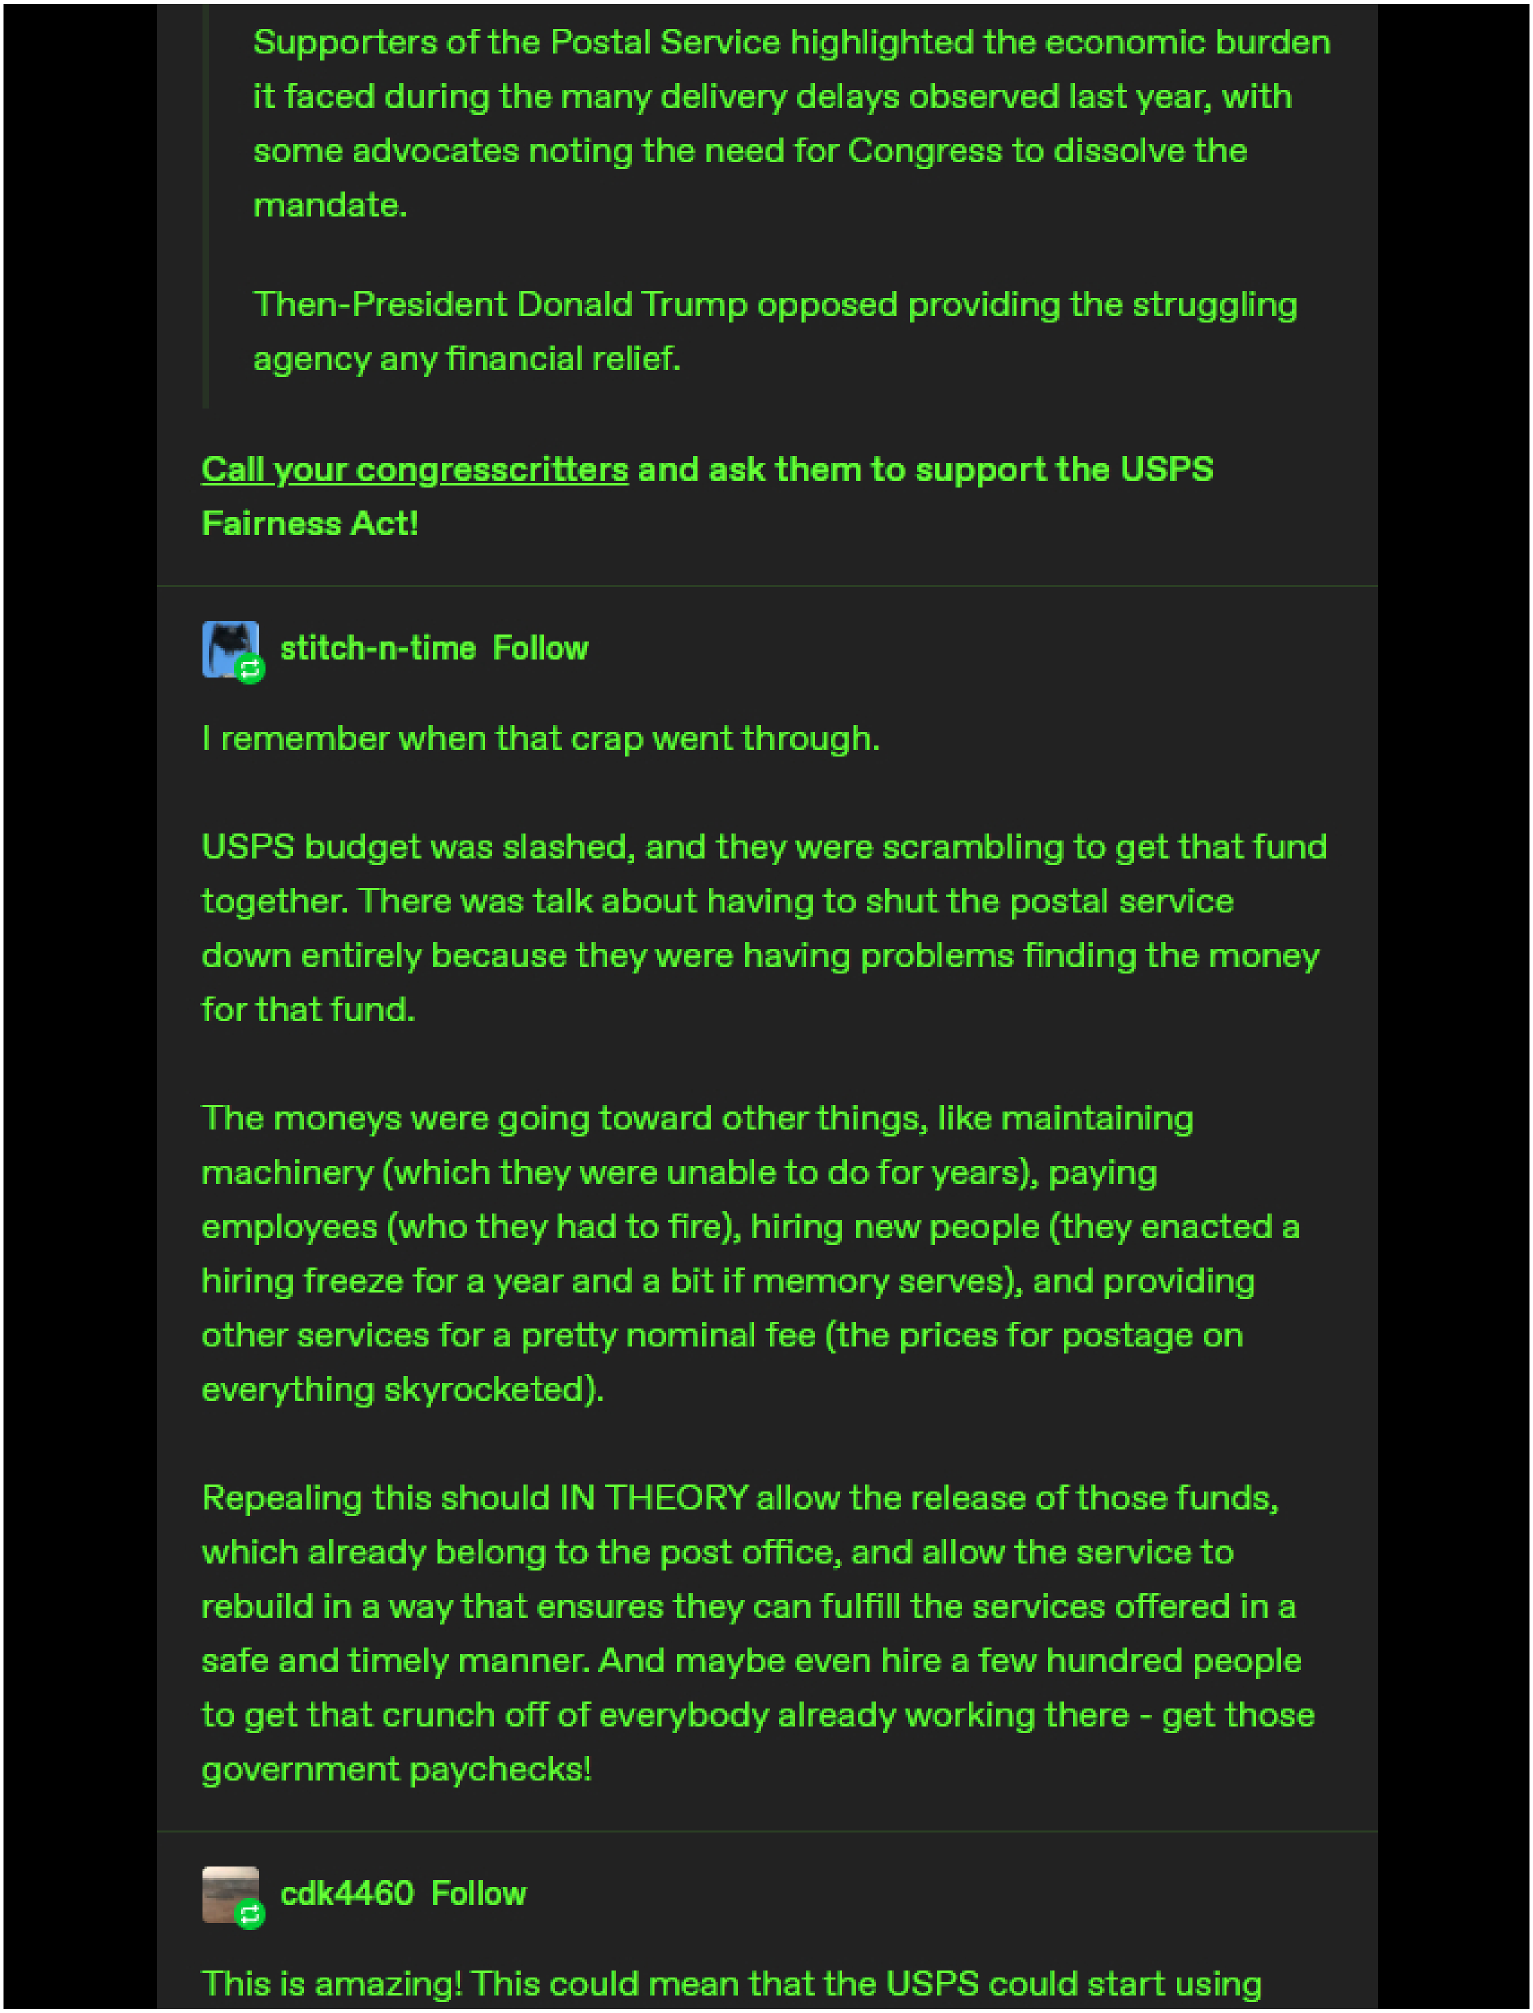
Lawmakers aim to dissolve 'draconian' law that placed heavy financial burden on Postal Service

The financial requirement has created a major economic drag on the Postal Service, causing it to appear to fall billions of dollars...

WWW.NBCNEWS.COM

> The issue stems from a 2006 law that required the Postal Service to create a $72 billion fund that would pay for its employees' retirement health benefits for more than 50 years into the future. This is not required by any other federal agency.
>
> The "USPS Fairness Act," introduced by Democrats and Republicans in both chambers, would do away with the requirement and comes as some lawmakers and the biggest Postal Service union have called for President Joe Biden to quickly install new leadership in the federal agency.
>
> "The unreasonable prefunding mandate has threatened the survival of the USPS and placed at risk vital services for the millions who rely on it," said Rep. Peter DeFazio, D-Ore., one of the bill's sponsors.



> Supporters of the Postal Service highlighted the economic burden it faced during the many delivery delays observed last year, with some advocates noting the need for Congress to dissolve the mandate.
>
> Then-President Donald Trump opposed providing the struggling agency any financial relief.

Call your congresscritters and ask them to support the USPS Fairness Act!

stitch-n-time **Follow**

I remember when that crap went through.

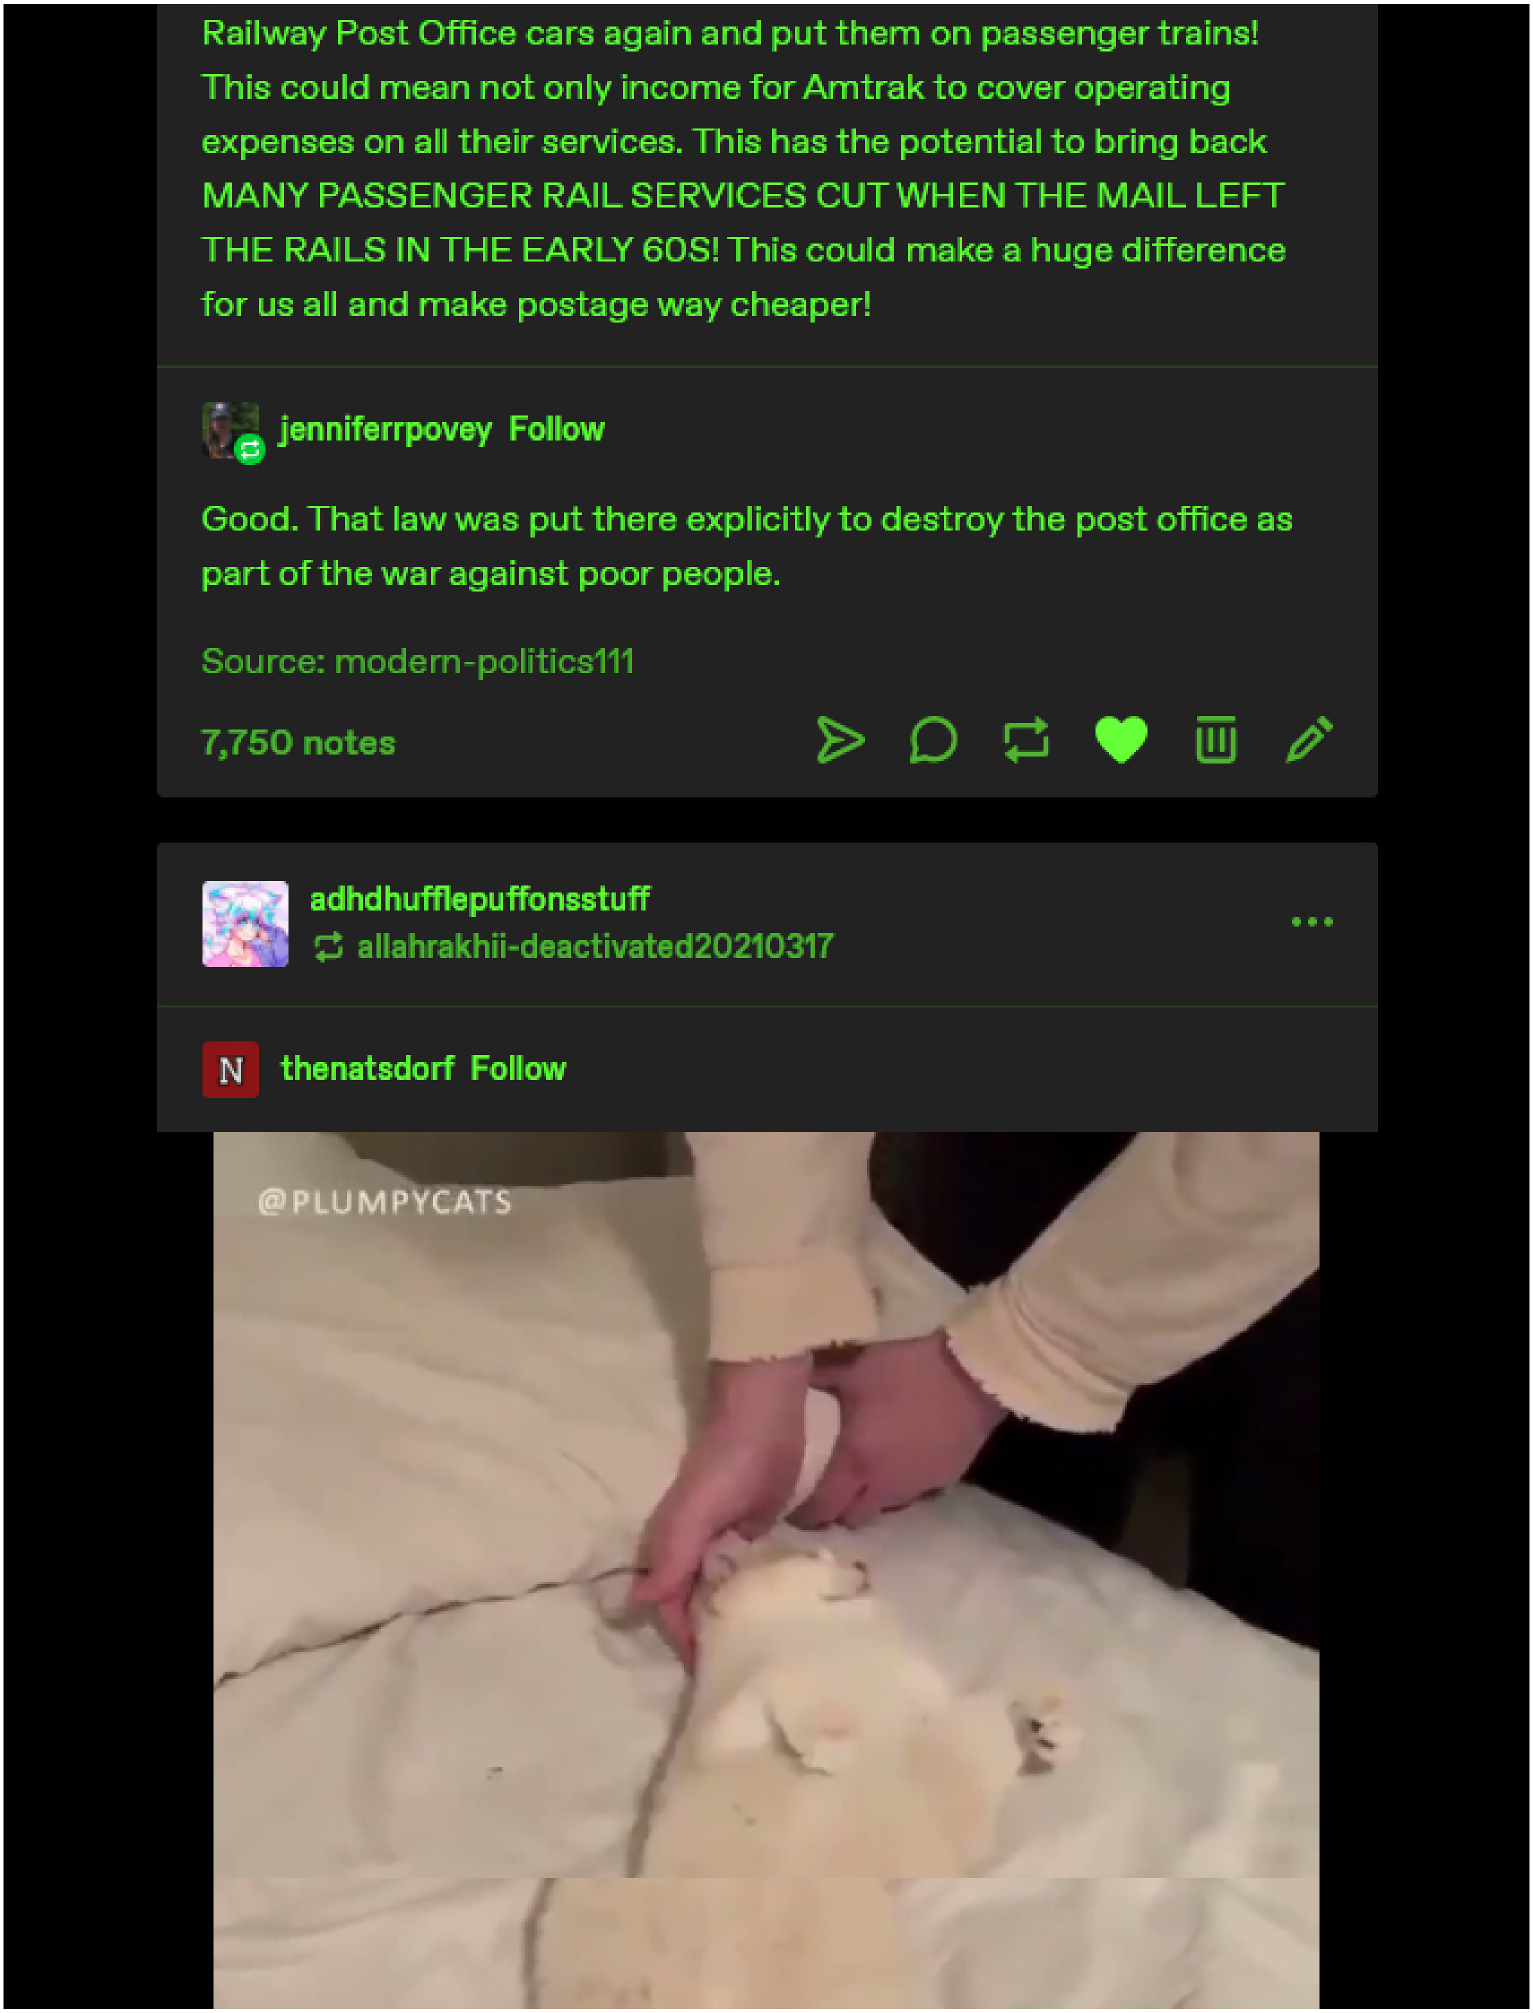
USPS budget was slashed, and they were scrambling to get that fund together. There was talk about having to shut the postal service down entirely because they were having problems finding the money for that fund.

The moneys were going toward other things, like maintaining machinery (which they were unable to do for years), paying employees (who they had to fire), hiring new people (they enacted a hiring freeze for a year and a bit if memory serves), and providing other services for a pretty nominal fee (the prices for postage on everything skyrocketed).

Repealing this should IN THEORY allow the release of those funds, which already belong to the post office, and allow the service to rebuild in a way that ensures they can fulfill the services offered in a safe and timely manner. And maybe even hire a few hundred people to get that crunch off of everybody already working there - get those government paychecks!

cdk4460 **Follow**

This is amazing! This could mean that the USPS could start using



Railway Post Office cars again and put them on passenger trains! This could mean not only income for Amtrak to cover operating expenses on all their services. This has the potential to bring back MANY PASSENGER RAIL SERVICES CUT WHEN THE MAIL LEFT THE RAILS IN THE EARLY 60S! This could make a huge difference for us all and make postage way cheaper!

More from Clapham.

Let this radicalise you.

There's a bill going through parliament next week to give police more powers to deal with protestors.

This was a candlelit vigil- that's about the most peaceful thing going. But the police decided to go in heavy, and they did that because conditions have been created that make them feel comfortable doing this.

This summer, we were told we have "policing by consent" in the UK.

I'd suggest what we have instead is creeping fascism and state sponsored violence.

Hold onto that feeling of being shocked and appalled, don't let your anger die down in the morning.

Name-A-Thon

When doing research for this Tumblr, I come across a lot of interesting terms and mythological figures that immediately make me think, "That could be a name in Avatar!" I thought I'd share some of these names for any fan writers or artists who are interested in creating Avatar original characters. The names/words I'm listing are relatively easy to pronounce for an English speaker and in-line with the naming conventions that exist within Avatar (in my opinion).

Also, most of these names/words would not be used as names in the real world, but that's always been the case with names in Avatar. For example, no Malay-speaking person would actually name their child "Bumi", since it literally just means "Earth". ATLA is just a world of very on-the-nose names.

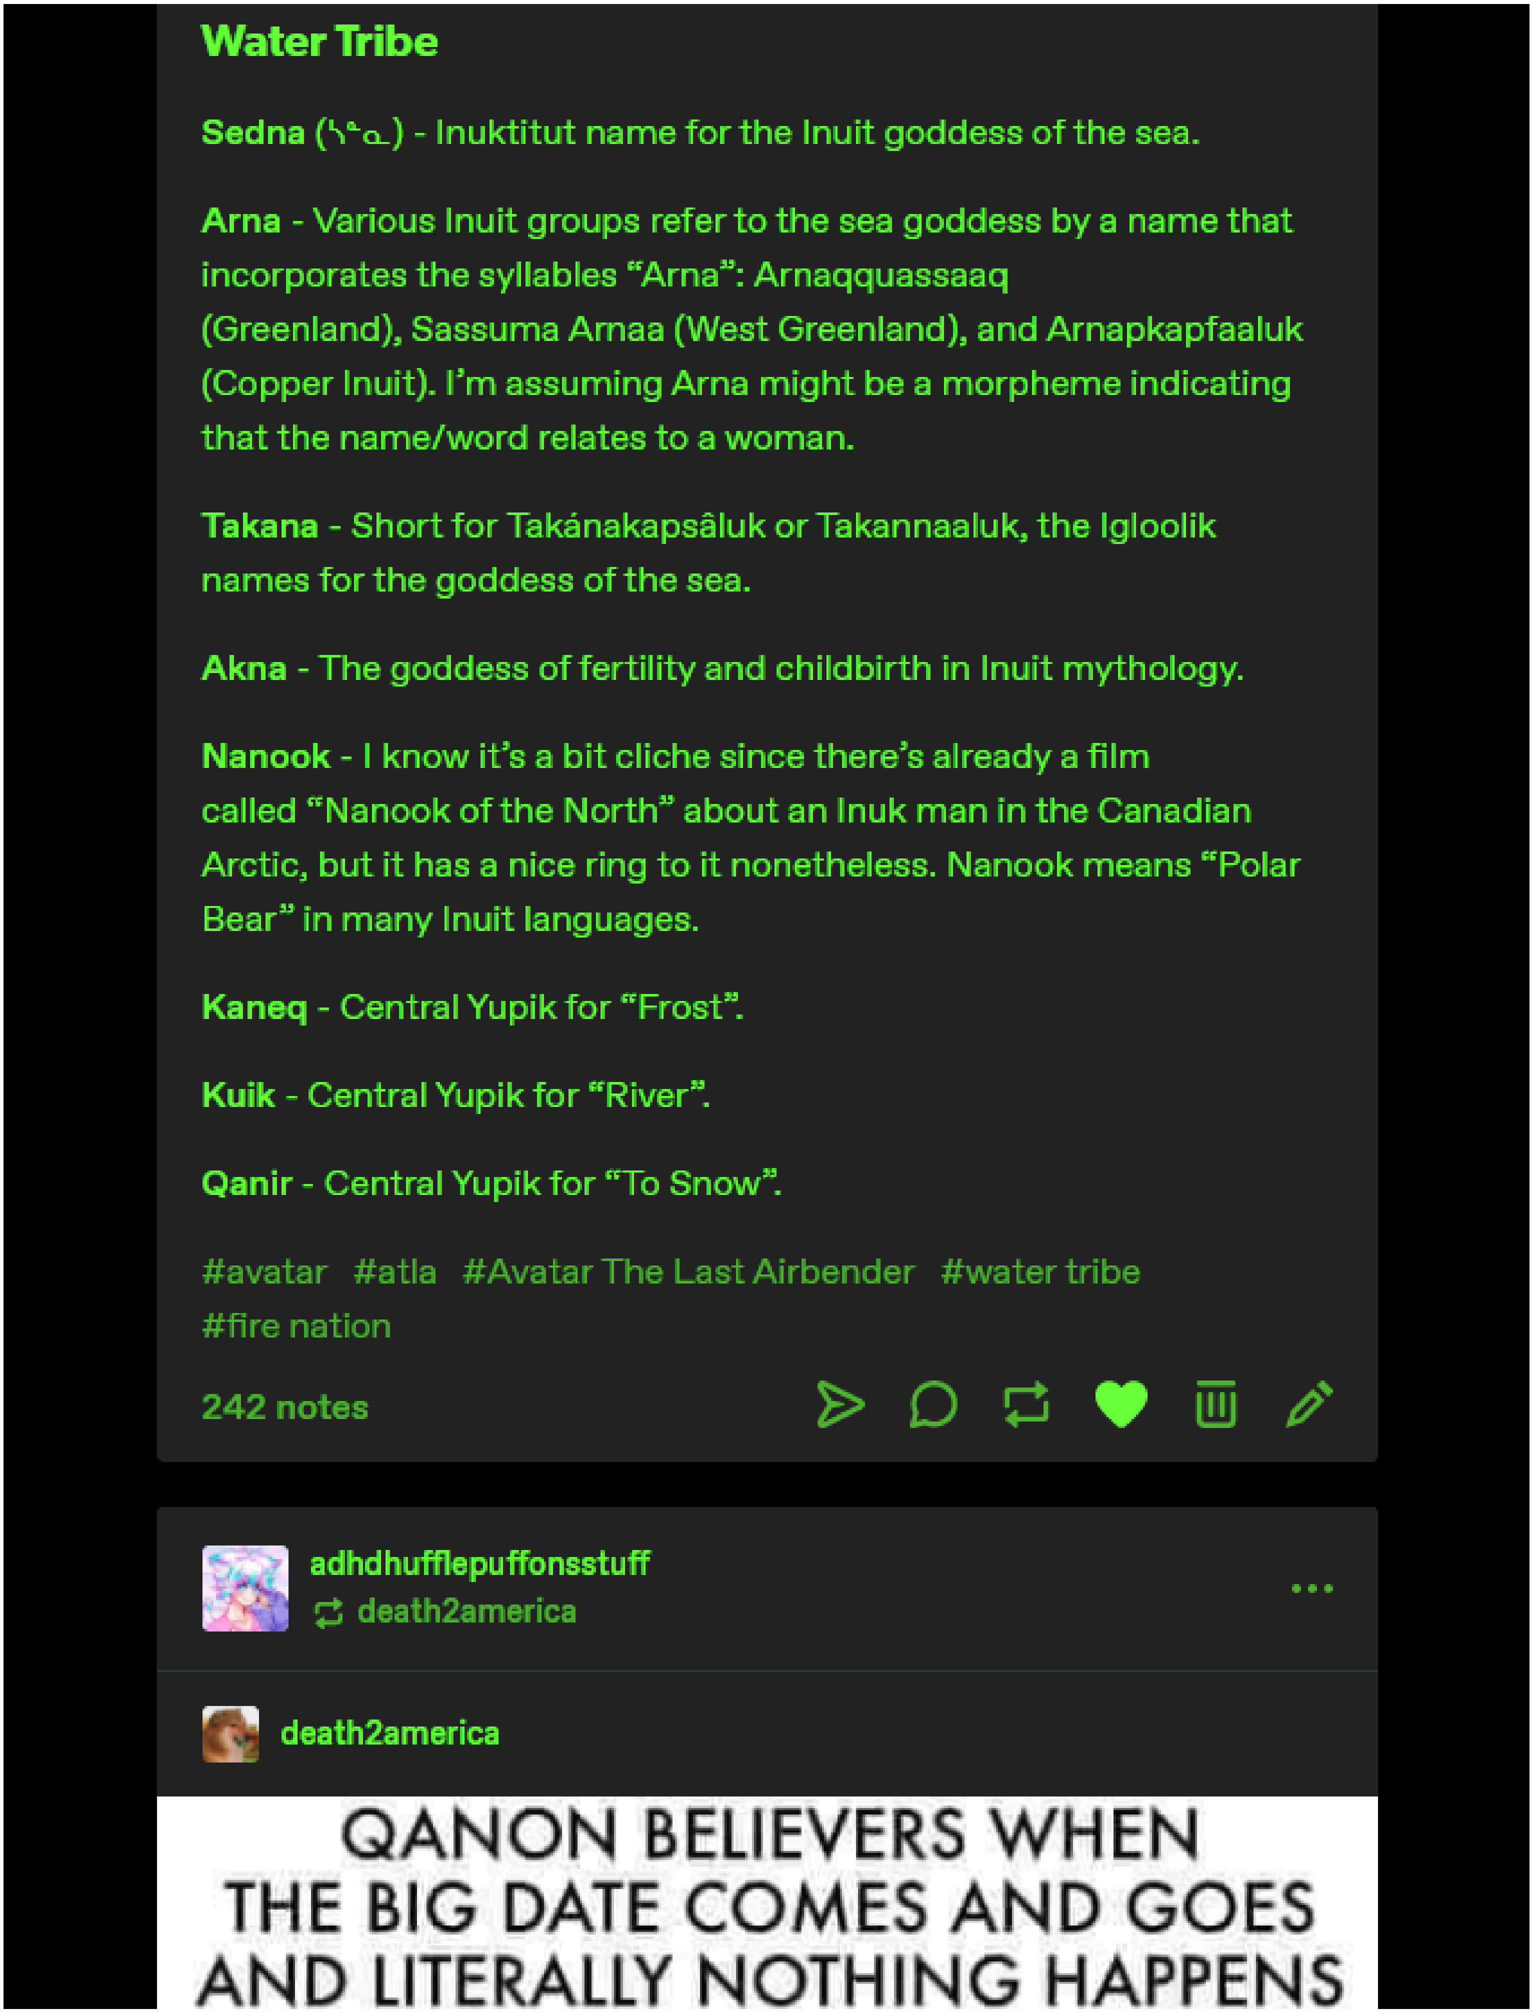
Fire Nation Royal Family

Suzaku (朱雀) - The Japanese name for the Vermilion Bird, which represents the element of fire, the direction of south, and the season of summer.

Sanzuwu (三足烏) - A red, three-legged crow known for dragging the sun across the sky in Chinese mythology.

Alaz - God of all fire in Turkic mythology. If fire is treated with respect, his flames can purify. If fire is neglected of disrespected, his flames can destroy.

Nezha (哪吒) - A protection deity in Chinese folk religion. He is often shown flying in the sky with fire wheels and a fire-tipped spear in his right hand.



Water Tribe

Sedna (ᓴᓐᓇ) - Inuktitut name for the Inuit goddess of the sea.

Arna - Various Inuit groups refer to the sea goddess by a name that incorporates the syllables “Arna”: Arnaqquassaaq (Greenland), Sassuma Arnaa (West Greenland), and Arnapkapfaaluk (Copper Inuit). I’m assuming Arna might be a morpheme indicating that the name/word relates to a woman.

Takana - Short for Takánakapsâluk or Takannaaluk, the Igloolik names for the goddess of the sea.

Akna - The goddess of fertility and childbirth in Inuit mythology.

Nanook - I know it’s a bit cliche since there’s already a film called “Nanook of the North” about an Inuk man in the Canadian Arctic, but it has a nice ring to it nonetheless. Nanook means “Polar Bear” in many Inuit languages.

Kaneq - Central Yupik for “Frost”.

Kuik - Central Yupik for “River”.

Qanir - Central Yupik for “To Snow”.

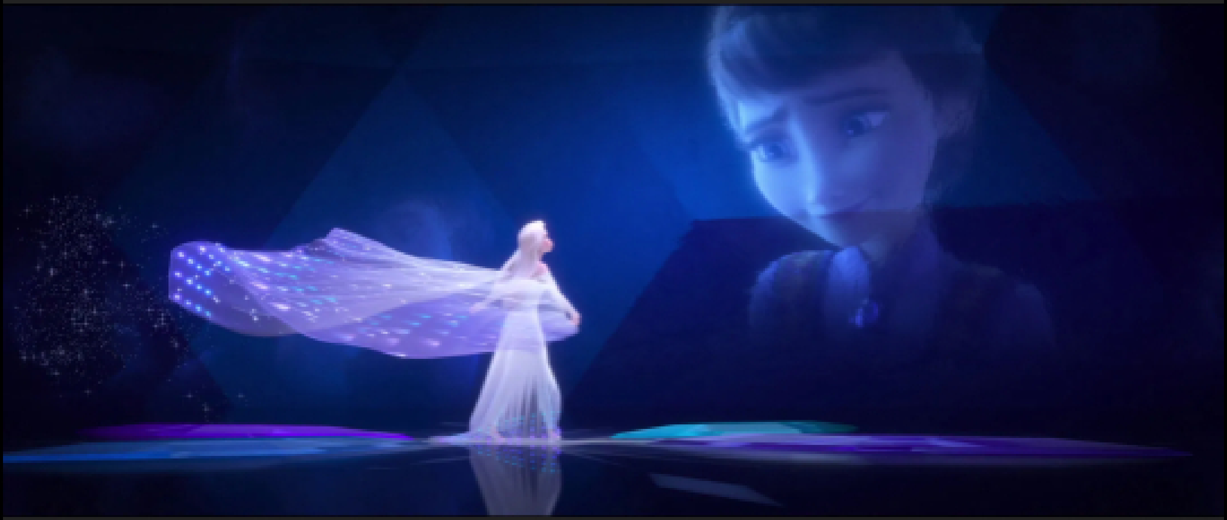
On the Subject of Aporia

I guess I disagree with the notion that Show Yourself is Let it Go done “the right way.”

Much can be made of the fact that, in Let it Go, Elsa doesn’t truly work through her issues. But the thing is… she doesn’t really work through her issues in Show Yourself either. She doesn’t confront the roots of her trauma. She isn’t able to meditate on the roots of her trauma. She doesn’t get true catharsis and she doesn’t get true relief. In fact, Show Yourself goes some ways to sweep the roots of Elsa’s trauma under the rug.



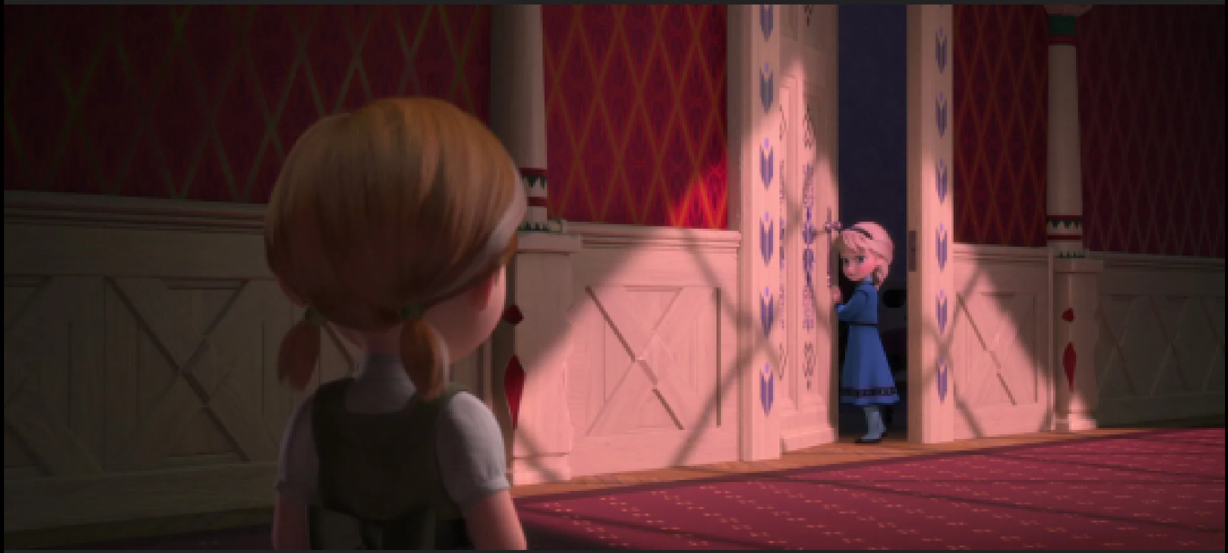
And here I have to discuss how Frozen 2 frames Agnarr and Iduna. Because Frozen 2 never dwells upon the part Agnarr and Iduna played in Elsa’s trauma. It idealizes them, ignoring the fact that they were the ones to initiate the separation of the sisters in the first place, they were the ones who taught Elsa that she had to hide.

In the past, I’ve seen people put the blame on Elsa for the separation - saying that her fear after the accident instigated it and pointing to the fact that Elsa herself continues the separation after her parents’ death.

This reading is disingenuous, to say the least. While the accident scarred Elsa as a child, the separation (which was instigated by her parents, with the affirmation and complicity of the trolls) was what cemented the self-hatred in her heart. Elsa continued the separation after her parents’ death because she learned it well throughout her after her parents' death because she learned it well throughout her childhood.

I don't like the fact that certain people place the blame for the childhood separation on Elsa, who was a terrified child at the time. A terrified child listening to the adults around her, adults in positions of authority. Adults who chose to close the gates, reduce the staff, limit her contact with people, and keep her powers secret from everyone, including Anna.

You can't blame a child in an extreme situation the same as you blame an adult - but I've seen people in the fandom do it - and it frustrates me.

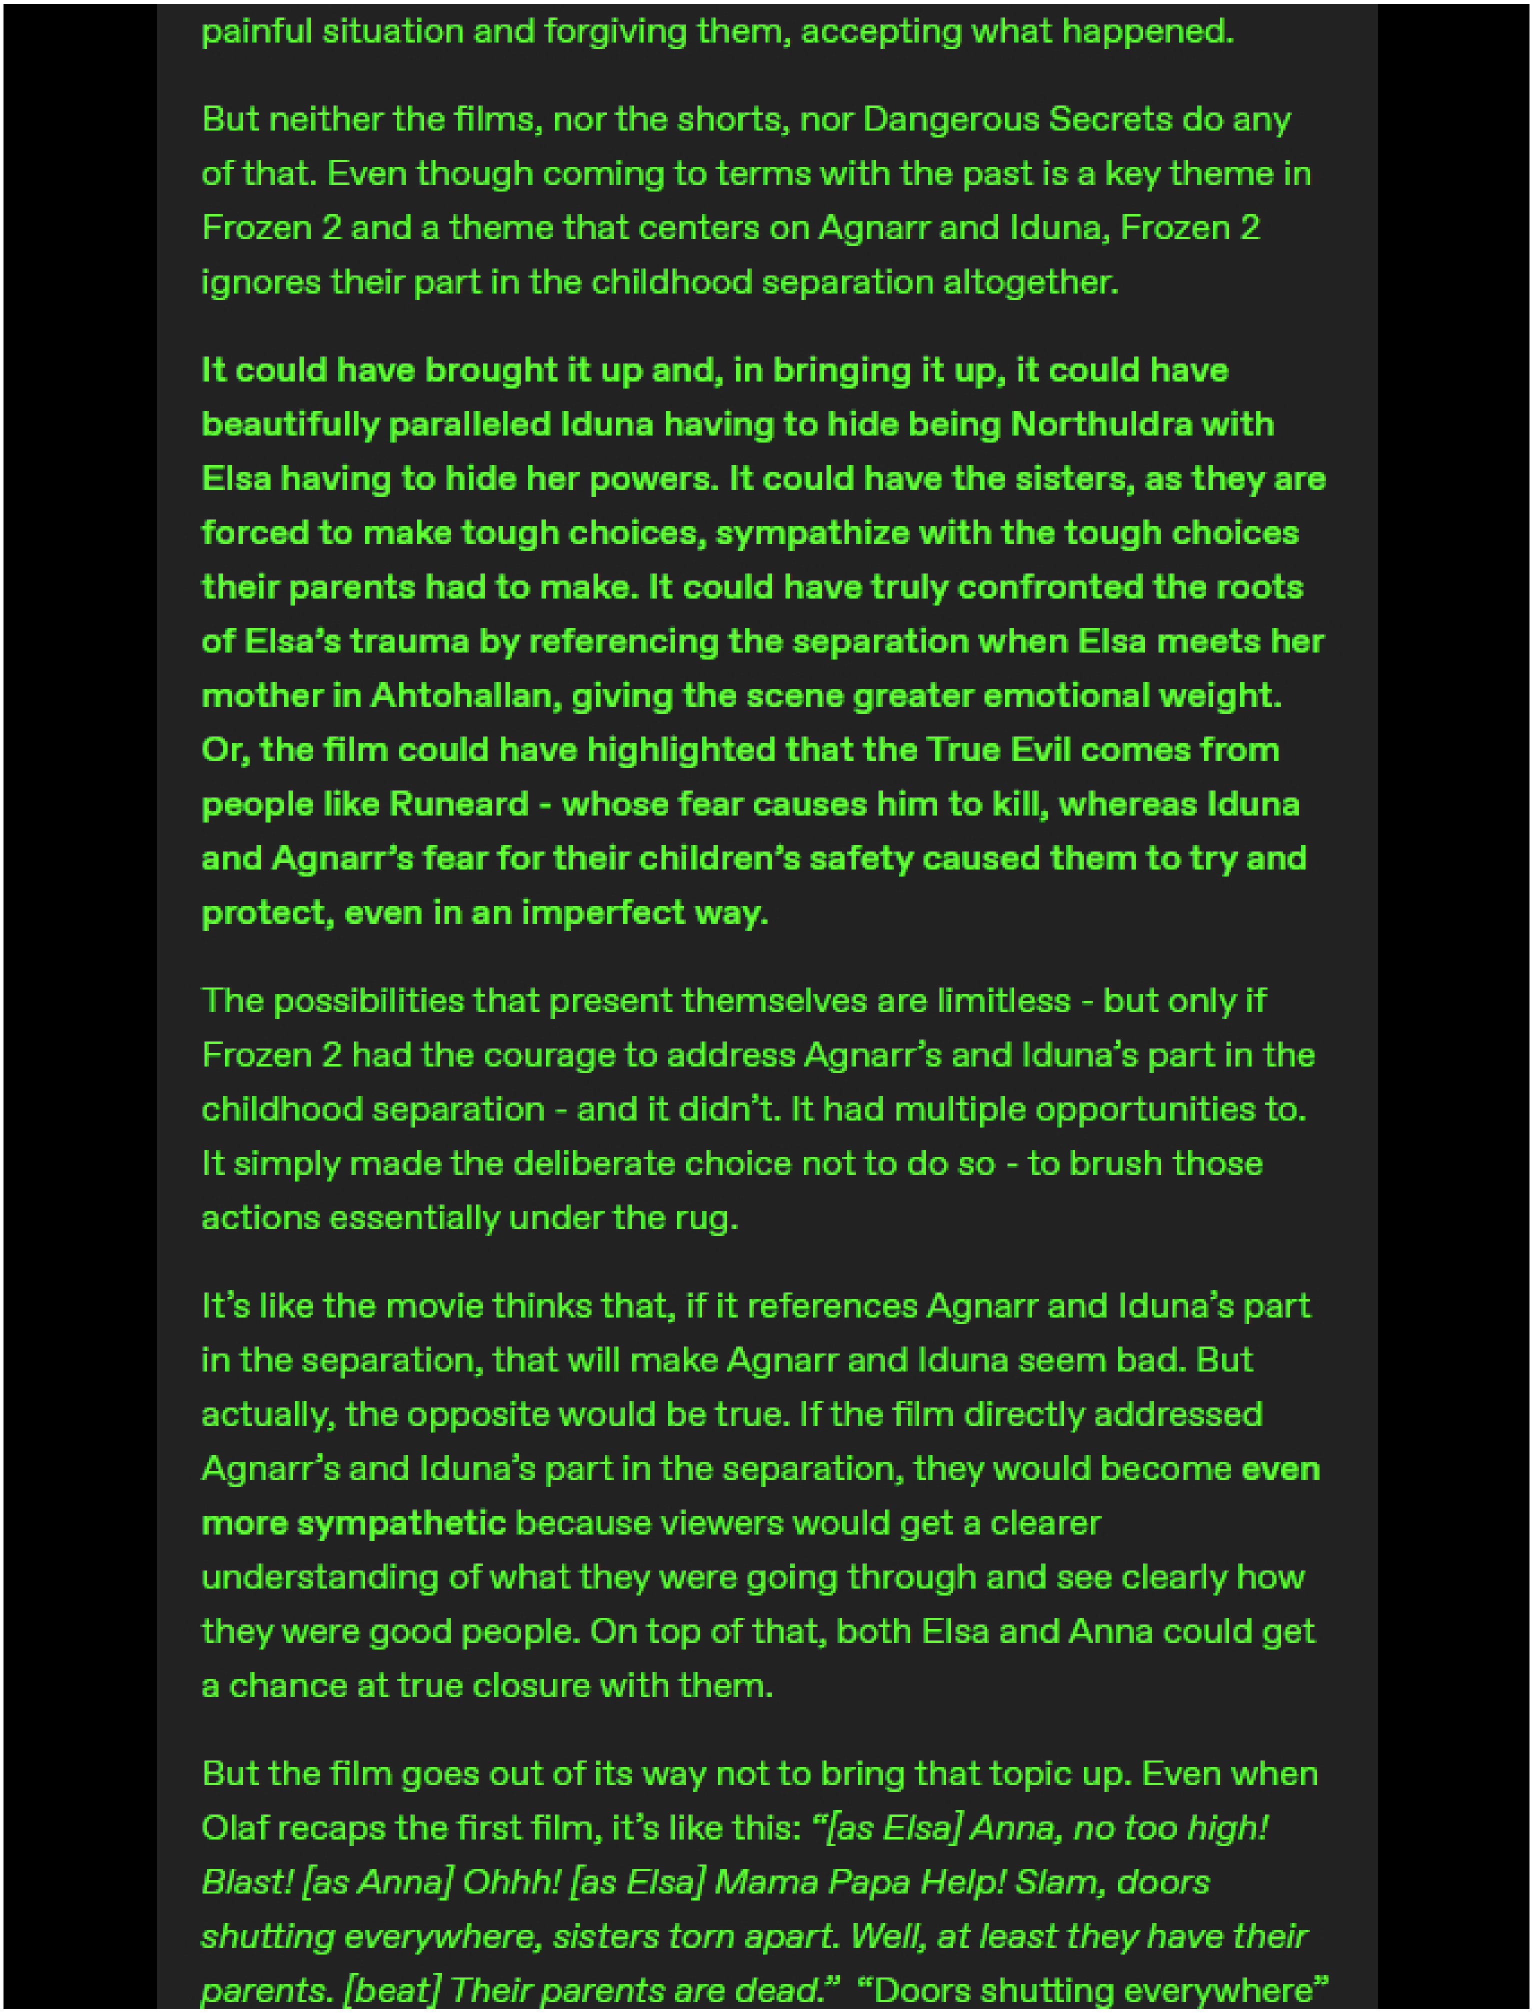


And again, as I've always said, Agnarr and Iduna are in an extreme situation too - and they are working under the guidance of the trolls. Agnarr and Iduna are **good people** - but their choices still contributed to their daughters' pain.

And neither the films nor the shorts show the sisters processing their parents' actions and how those actions hurt them.

Not even Dangerous Secrets does that - because Dangerous Secrets focuses on Iduna's and Agnarr's perspective. It's not about the sisters processing what their parents did to them.

And again, "processing" doesn't mean "condemnation." I'm not advocating that the sisters condemn or hate their parents. Processing can also mean realizing that their parents were in a



painful situation and forgiving them, accepting what happened.

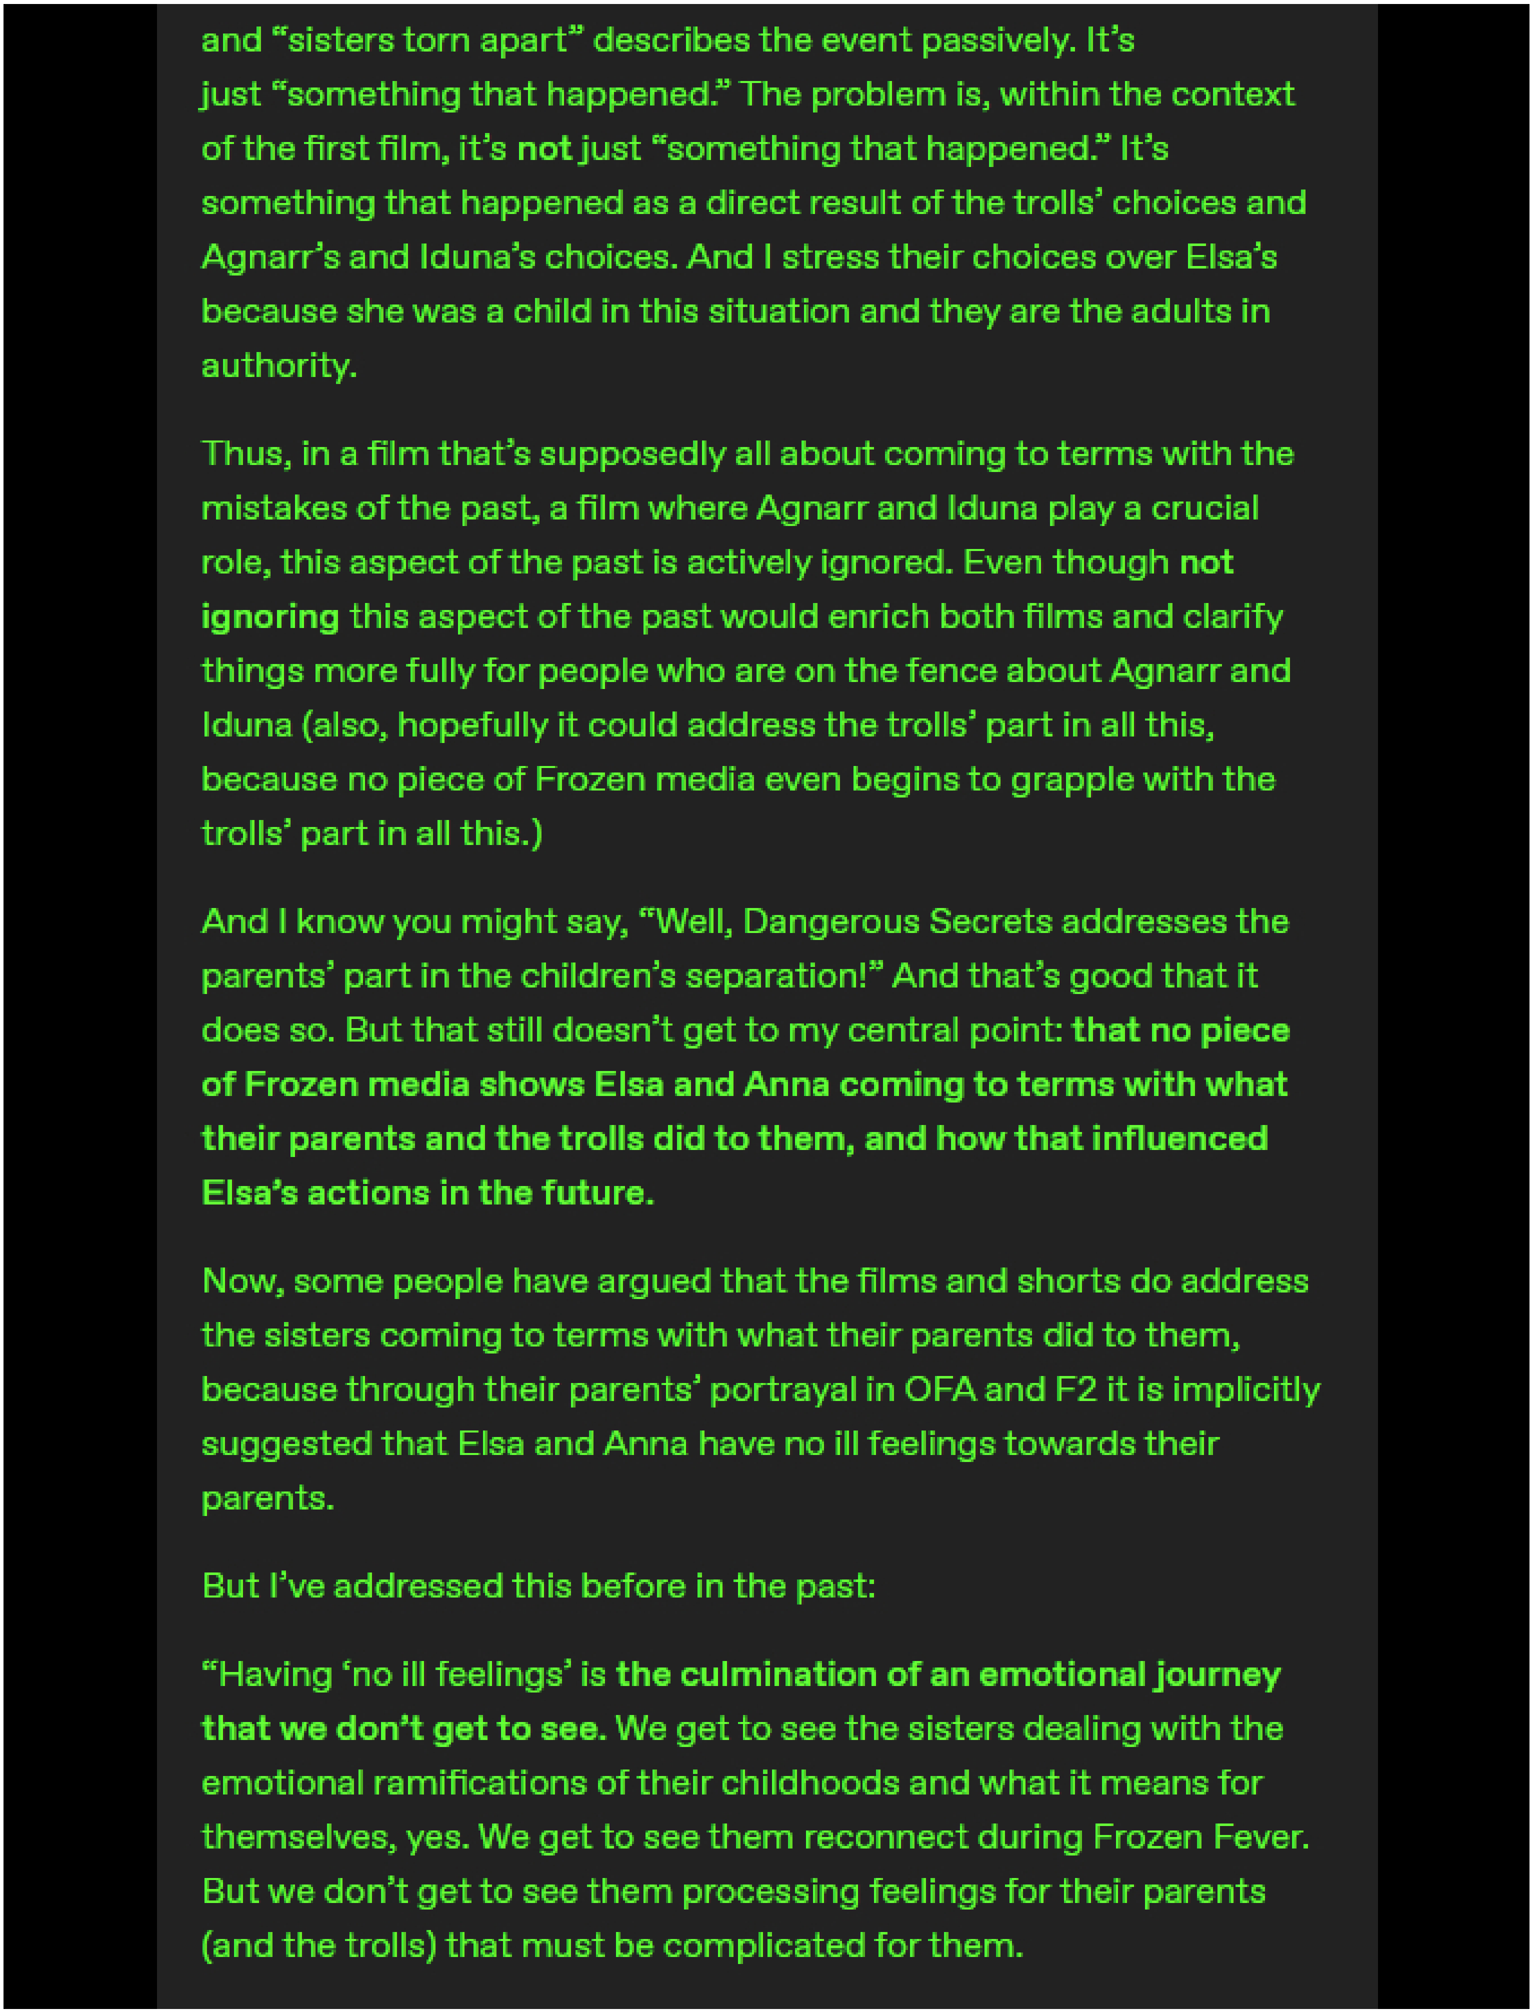
But neither the films, nor the shorts, nor Dangerous Secrets do any of that. Even though coming to terms with the past is a key theme in Frozen 2 and a theme that centers on Agnarr and Iduna, Frozen 2 ignores their part in the childhood separation altogether.

It could have brought it up and, in bringing it up, it could have beautifully paralleled Iduna having to hide being Northuldra with Elsa having to hide her powers. It could have the sisters, as they are forced to make tough choices, sympathize with the tough choices their parents had to make. It could have truly confronted the roots of Elsa's trauma by referencing the separation when Elsa meets her mother in Ahtohallan, giving the scene greater emotional weight. Or, the film could have highlighted that the True Evil comes from people like Runeard - whose fear causes him to kill, whereas Iduna and Agnarr's fear for their children's safety caused them to try and protect, even in an imperfect way.

The possibilities that present themselves are limitless - but only if Frozen 2 had the courage to address Agnarr's and Iduna's part in the childhood separation - and it didn't. It had multiple opportunities to. It simply made the deliberate choice not to do so - to brush those actions essentially under the rug.

It's like the movie thinks that, if it references Agnarr and Iduna's part in the separation, that will make Agnarr and Iduna seem bad. But actually, the opposite would be true. If the film directly addressed Agnarr's and Iduna's part in the separation, they would become **even more sympathetic** because viewers would get a clearer understanding of what they were going through and see clearly how they were good people. On top of that, both Elsa and Anna could get a chance at true closure with them.

But the film goes out of its way not to bring that topic up. Even when Olaf recaps the first film, it's like this: *"[as Elsa] Anna, no too high! Blast! [as Anna] Ohhh! [as Elsa] Mama Papa Help! Slam, doors shutting everywhere, sisters torn apart. Well, at least they have their parents. [beat] Their parents are dead."* "Doors shutting everywhere"



and “sisters torn apart” describes the event passively. It’s just “something that happened.” The problem is, within the context of the first film, it’s **not** just “something that happened.” It’s something that happened as a direct result of the trolls’ choices and Agnarr’s and Iduna’s choices. And I stress their choices over Elsa’s because she was a child in this situation and they are the adults in authority.

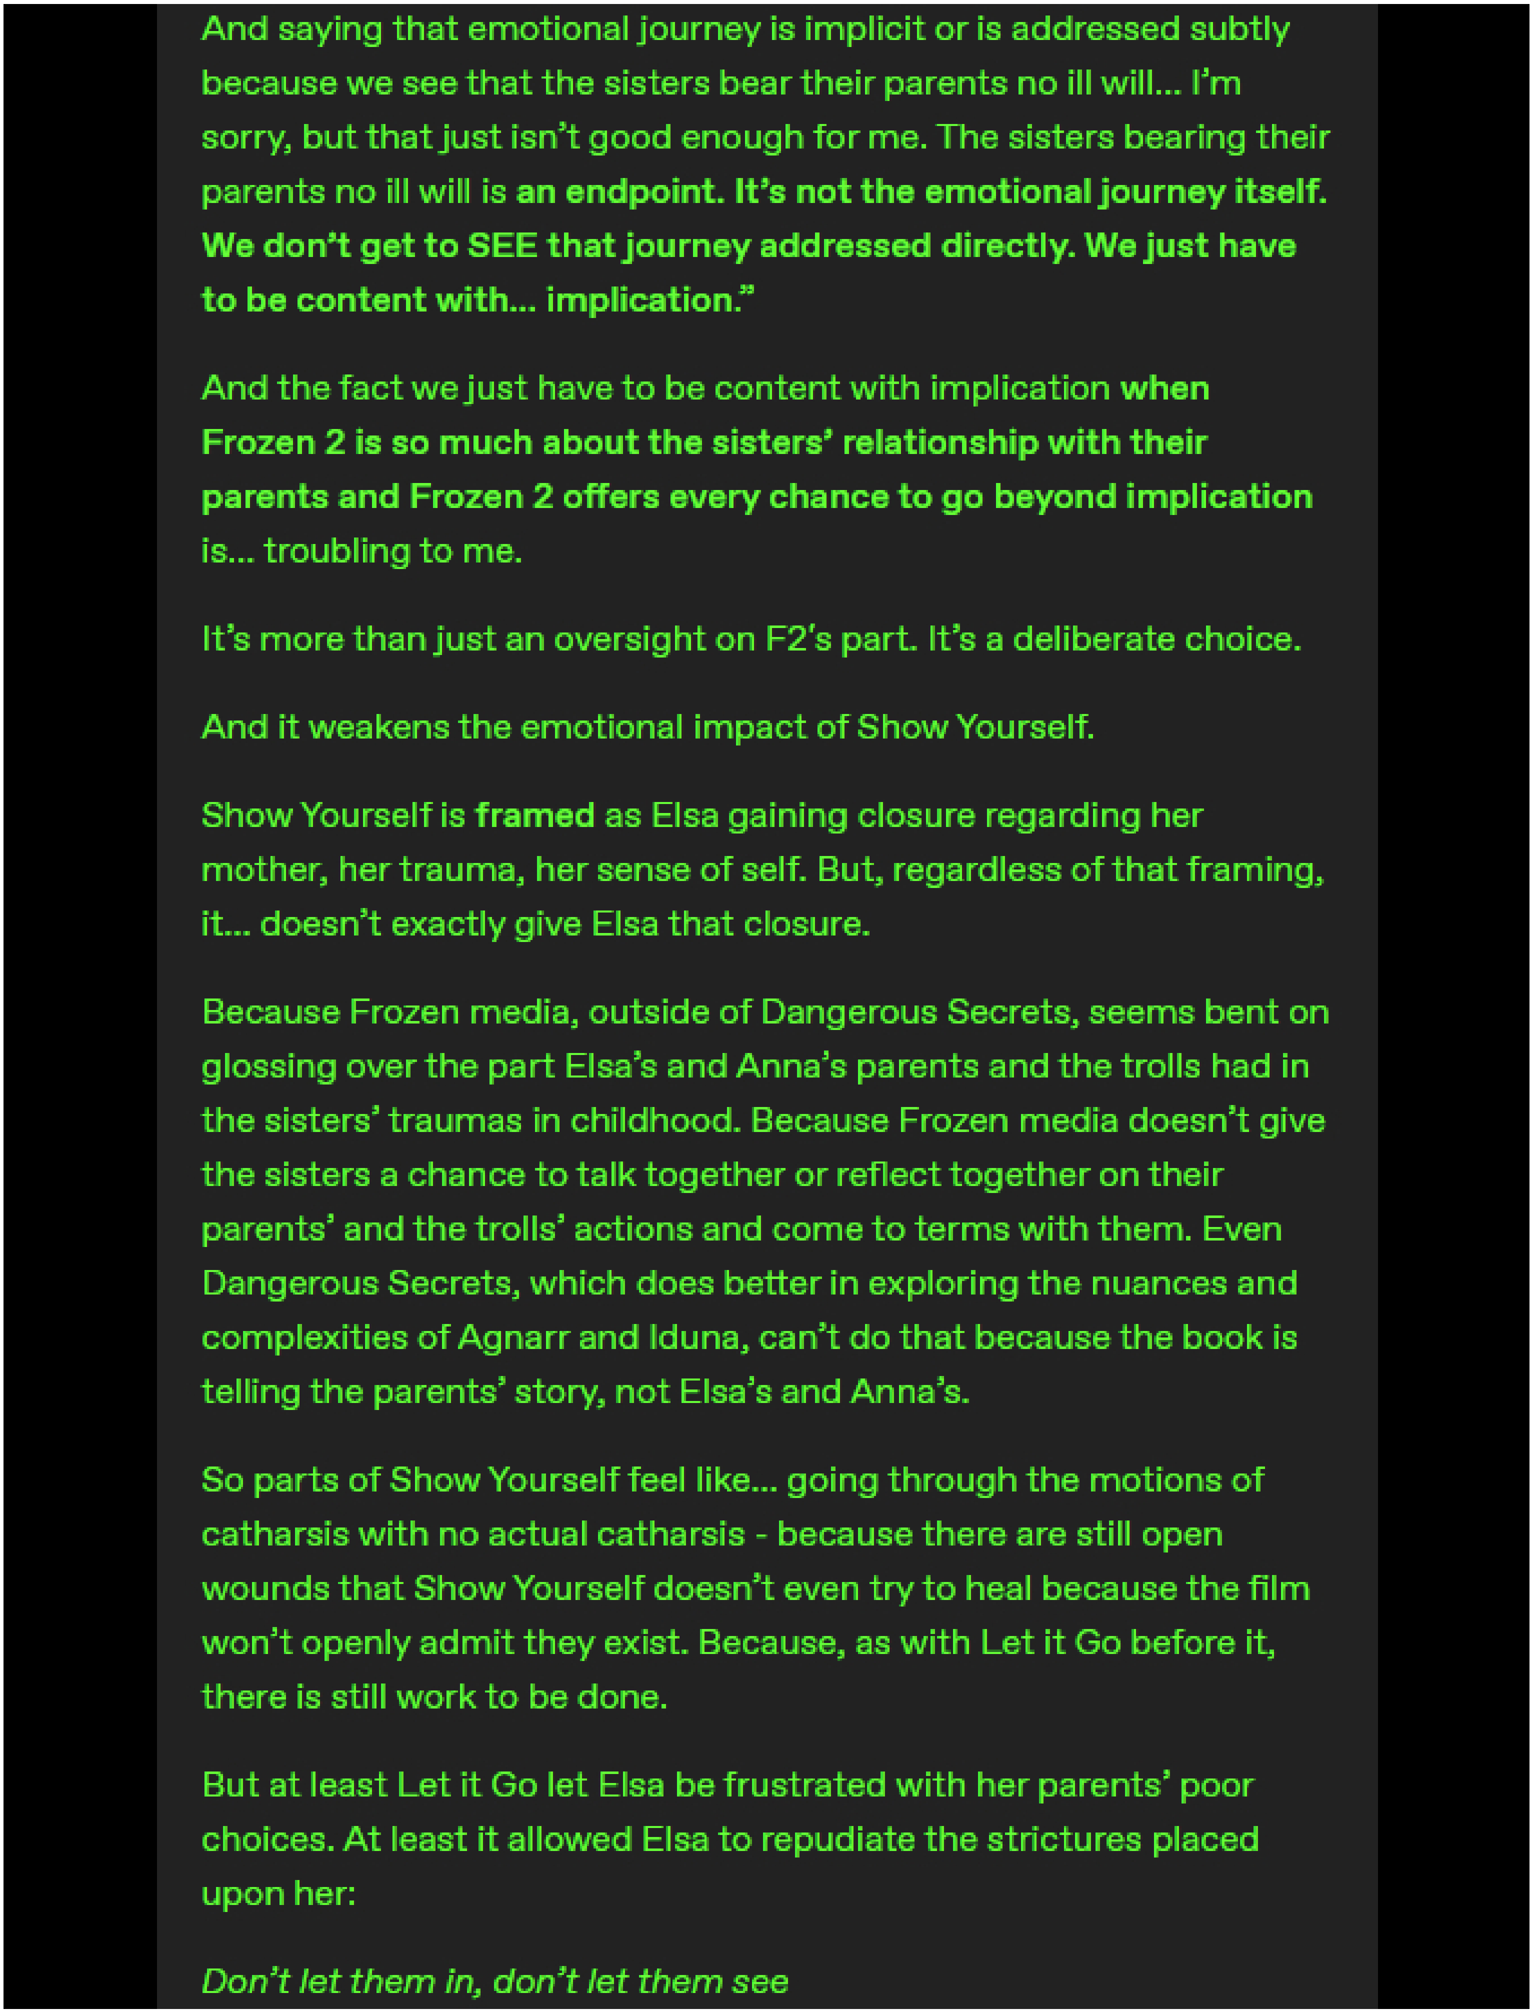
Thus, in a film that’s supposedly all about coming to terms with the mistakes of the past, a film where Agnarr and Iduna play a crucial role, this aspect of the past is actively ignored. Even though **not ignoring** this aspect of the past would enrich both films and clarify things more fully for people who are on the fence about Agnarr and Iduna (also, hopefully it could address the trolls’ part in all this, because no piece of Frozen media even begins to grapple with the trolls’ part in all this.)

And I know you might say, “Well, Dangerous Secrets addresses the parents’ part in the children’s separation!” And that’s good that it does so. But that still doesn’t get to my central point: **that no piece of Frozen media shows Elsa and Anna coming to terms with what their parents and the trolls did to them, and how that influenced Elsa’s actions in the future.**

Now, some people have argued that the films and shorts do address the sisters coming to terms with what their parents did to them, because through their parents’ portrayal in OFA and F2 it is implicitly suggested that Elsa and Anna have no ill feelings towards their parents.

But I’ve addressed this before in the past:

“Having ‘no ill feelings’ is **the culmination of an emotional journey that we don’t get to see.** We get to see the sisters dealing with the emotional ramifications of their childhoods and what it means for themselves, yes. We get to see them reconnect during Frozen Fever. But we don’t get to see them processing feelings for their parents (and the trolls) that must be complicated for them.



And saying that emotional journey is implicit or is addressed subtly because we see that the sisters bear their parents no ill will… I'm sorry, but that just isn't good enough for me. The sisters bearing their parents no ill will is **an endpoint. It's not the emotional journey itself. We don't get to SEE that journey addressed directly. We just have to be content with… implication."**

And the fact we just have to be content with implication **when Frozen 2 is so much about the sisters' relationship with their parents and Frozen 2 offers every chance to go beyond implication** is… troubling to me.

It's more than just an oversight on F2's part. It's a deliberate choice.

And it weakens the emotional impact of Show Yourself.

Show Yourself is **framed** as Elsa gaining closure regarding her mother, her trauma, her sense of self. But, regardless of that framing, it… doesn't exactly give Elsa that closure.

Because Frozen media, outside of Dangerous Secrets, seems bent on glossing over the part Elsa's and Anna's parents and the trolls had in the sisters' traumas in childhood. Because Frozen media doesn't give the sisters a chance to talk together or reflect together on their parents' and the trolls' actions and come to terms with them. Even Dangerous Secrets, which does better in exploring the nuances and complexities of Agnarr and Iduna, can't do that because the book is telling the parents' story, not Elsa's and Anna's.

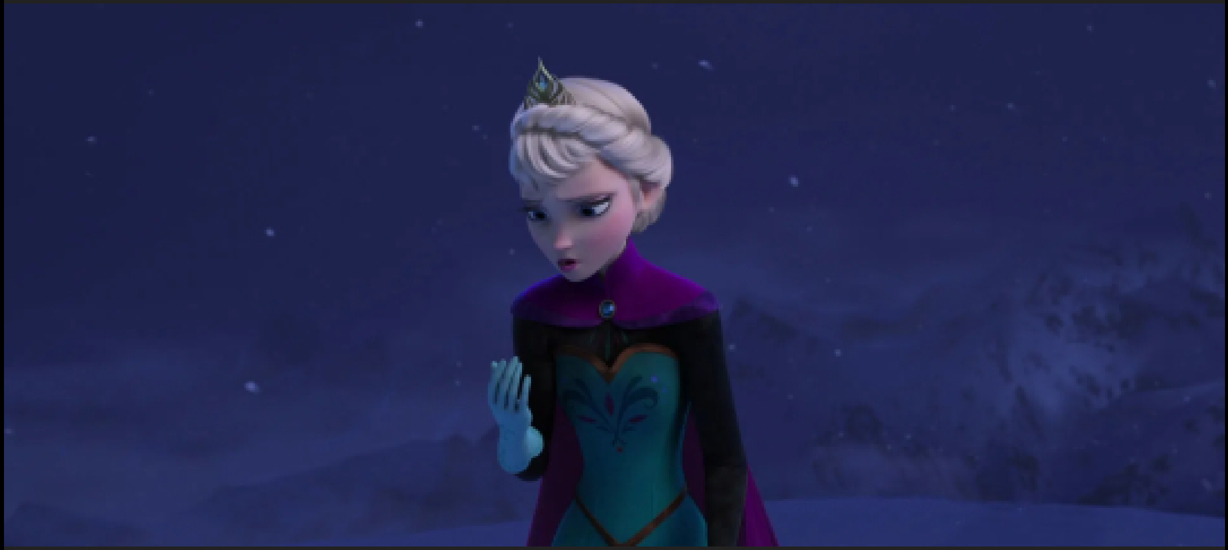
So parts of Show Yourself feel like… going through the motions of catharsis with no actual catharsis - because there are still open wounds that Show Yourself doesn't even try to heal because the film won't openly admit they exist. Because, as with Let it Go before it, there is still work to be done.

But at least Let it Go let Elsa be frustrated with her parents' poor choices. At least it allowed Elsa to repudiate the strictures placed upon her:

Don't let them in, don't let them see

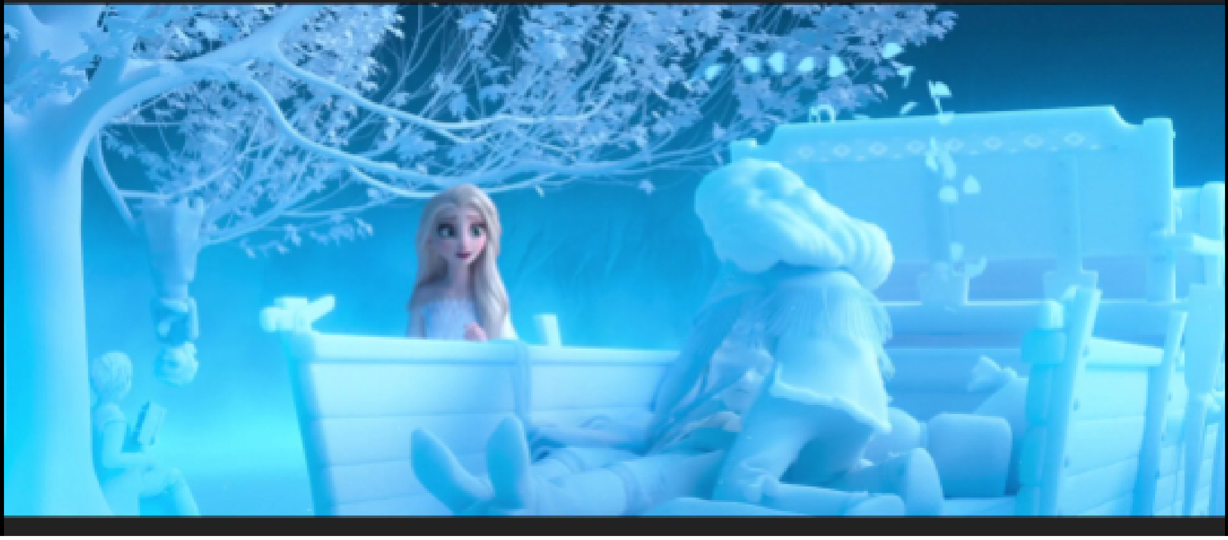
Be the good girl you always have to be
Conceal, don't feel, don't let them know
Well, now they know

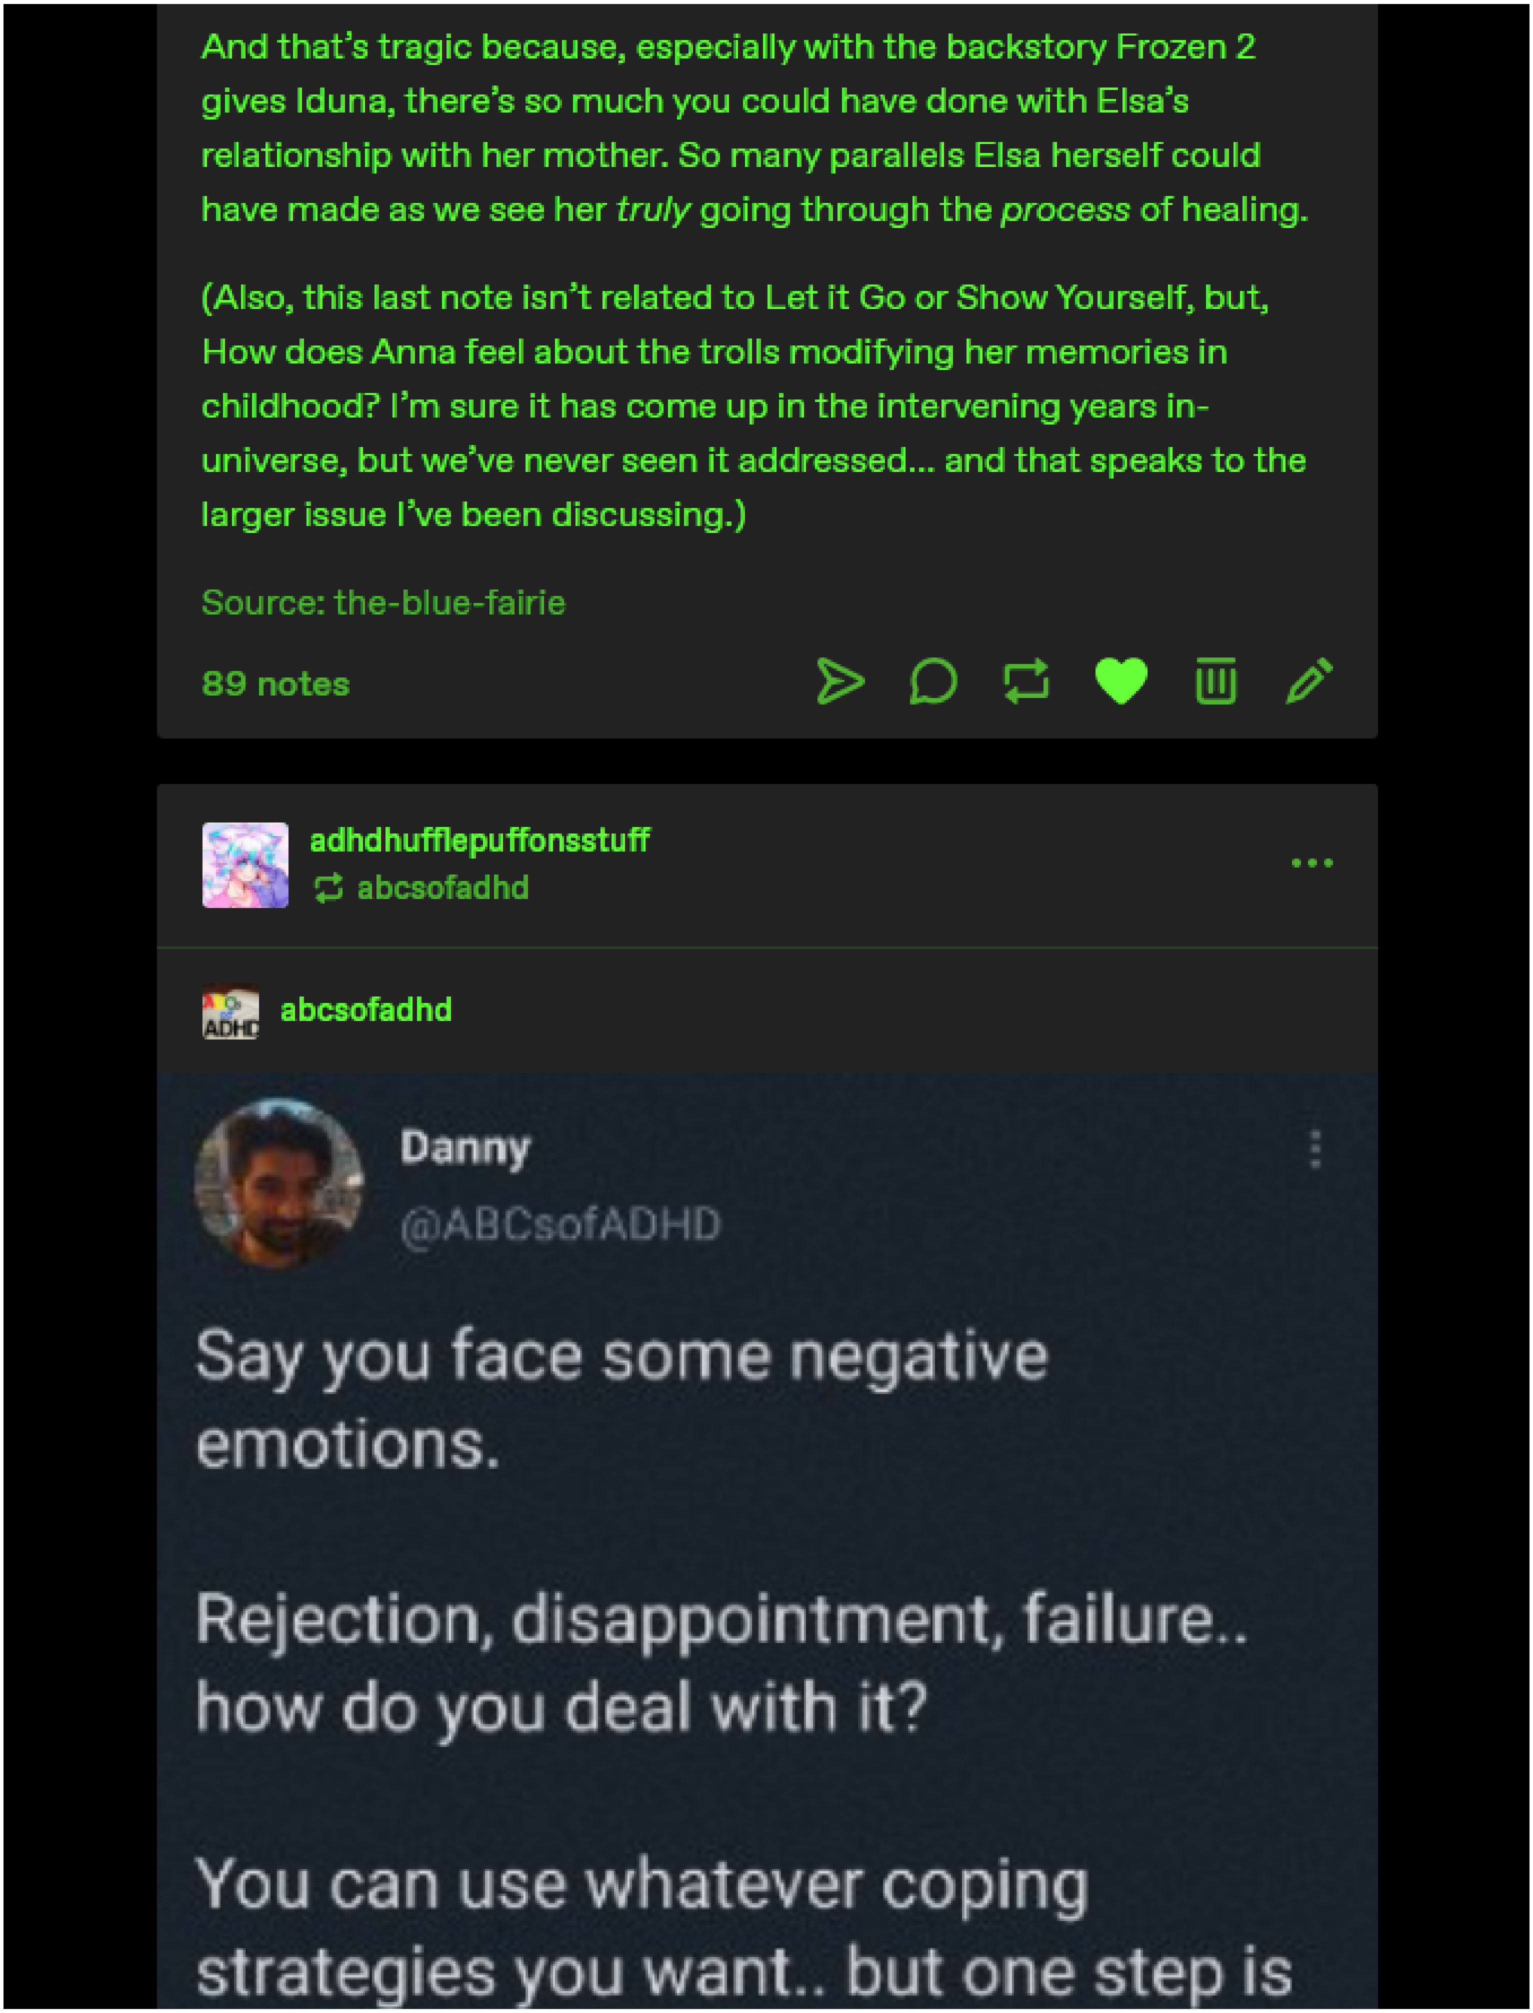
There's more reflection on her parents' part in her pain in those few lines than in the whole of Frozen 2 - even though much of Frozen 2 is directly about her parents.



I've seen people describe the transition from Let it Go to Show Yourself as a transition from reckless defiance to acceptance and peace... but this framing doesn't work with the film's portrayal of Elsa's relationship with Iduna. Because for that framing to work, we'd actually have to see Elsa's transition towards acceptance of her mother's actions. We'd actually have to see the emotional process of Elsa making peace with her parents' choices.

And we don't.





And that's tragic because, especially with the backstory Frozen 2 gives Iduna, there's so much you could have done with Elsa's relationship with her mother. So many parallels Elsa herself could have made as we see her *truly* going through the *process* of healing.

(Also, this last note isn't related to Let it Go or Show Yourself, but, How does Anna feel about the trolls modifying her memories in childhood? I'm sure it has come up in the intervening years in-universe, but we've never seen it addressed... and that speaks to the larger issue I've been discussing.)

Negative emotions suck, especially for us. Even small experiences can be very high and extra painful.

Your emotions are in the background.

Danny @ABCsofADHD · 11m

It's blurry but you can still make it out.

Our natural instinct is to blur our emotions in the background. Feeling full force guilt or sadness is hard.

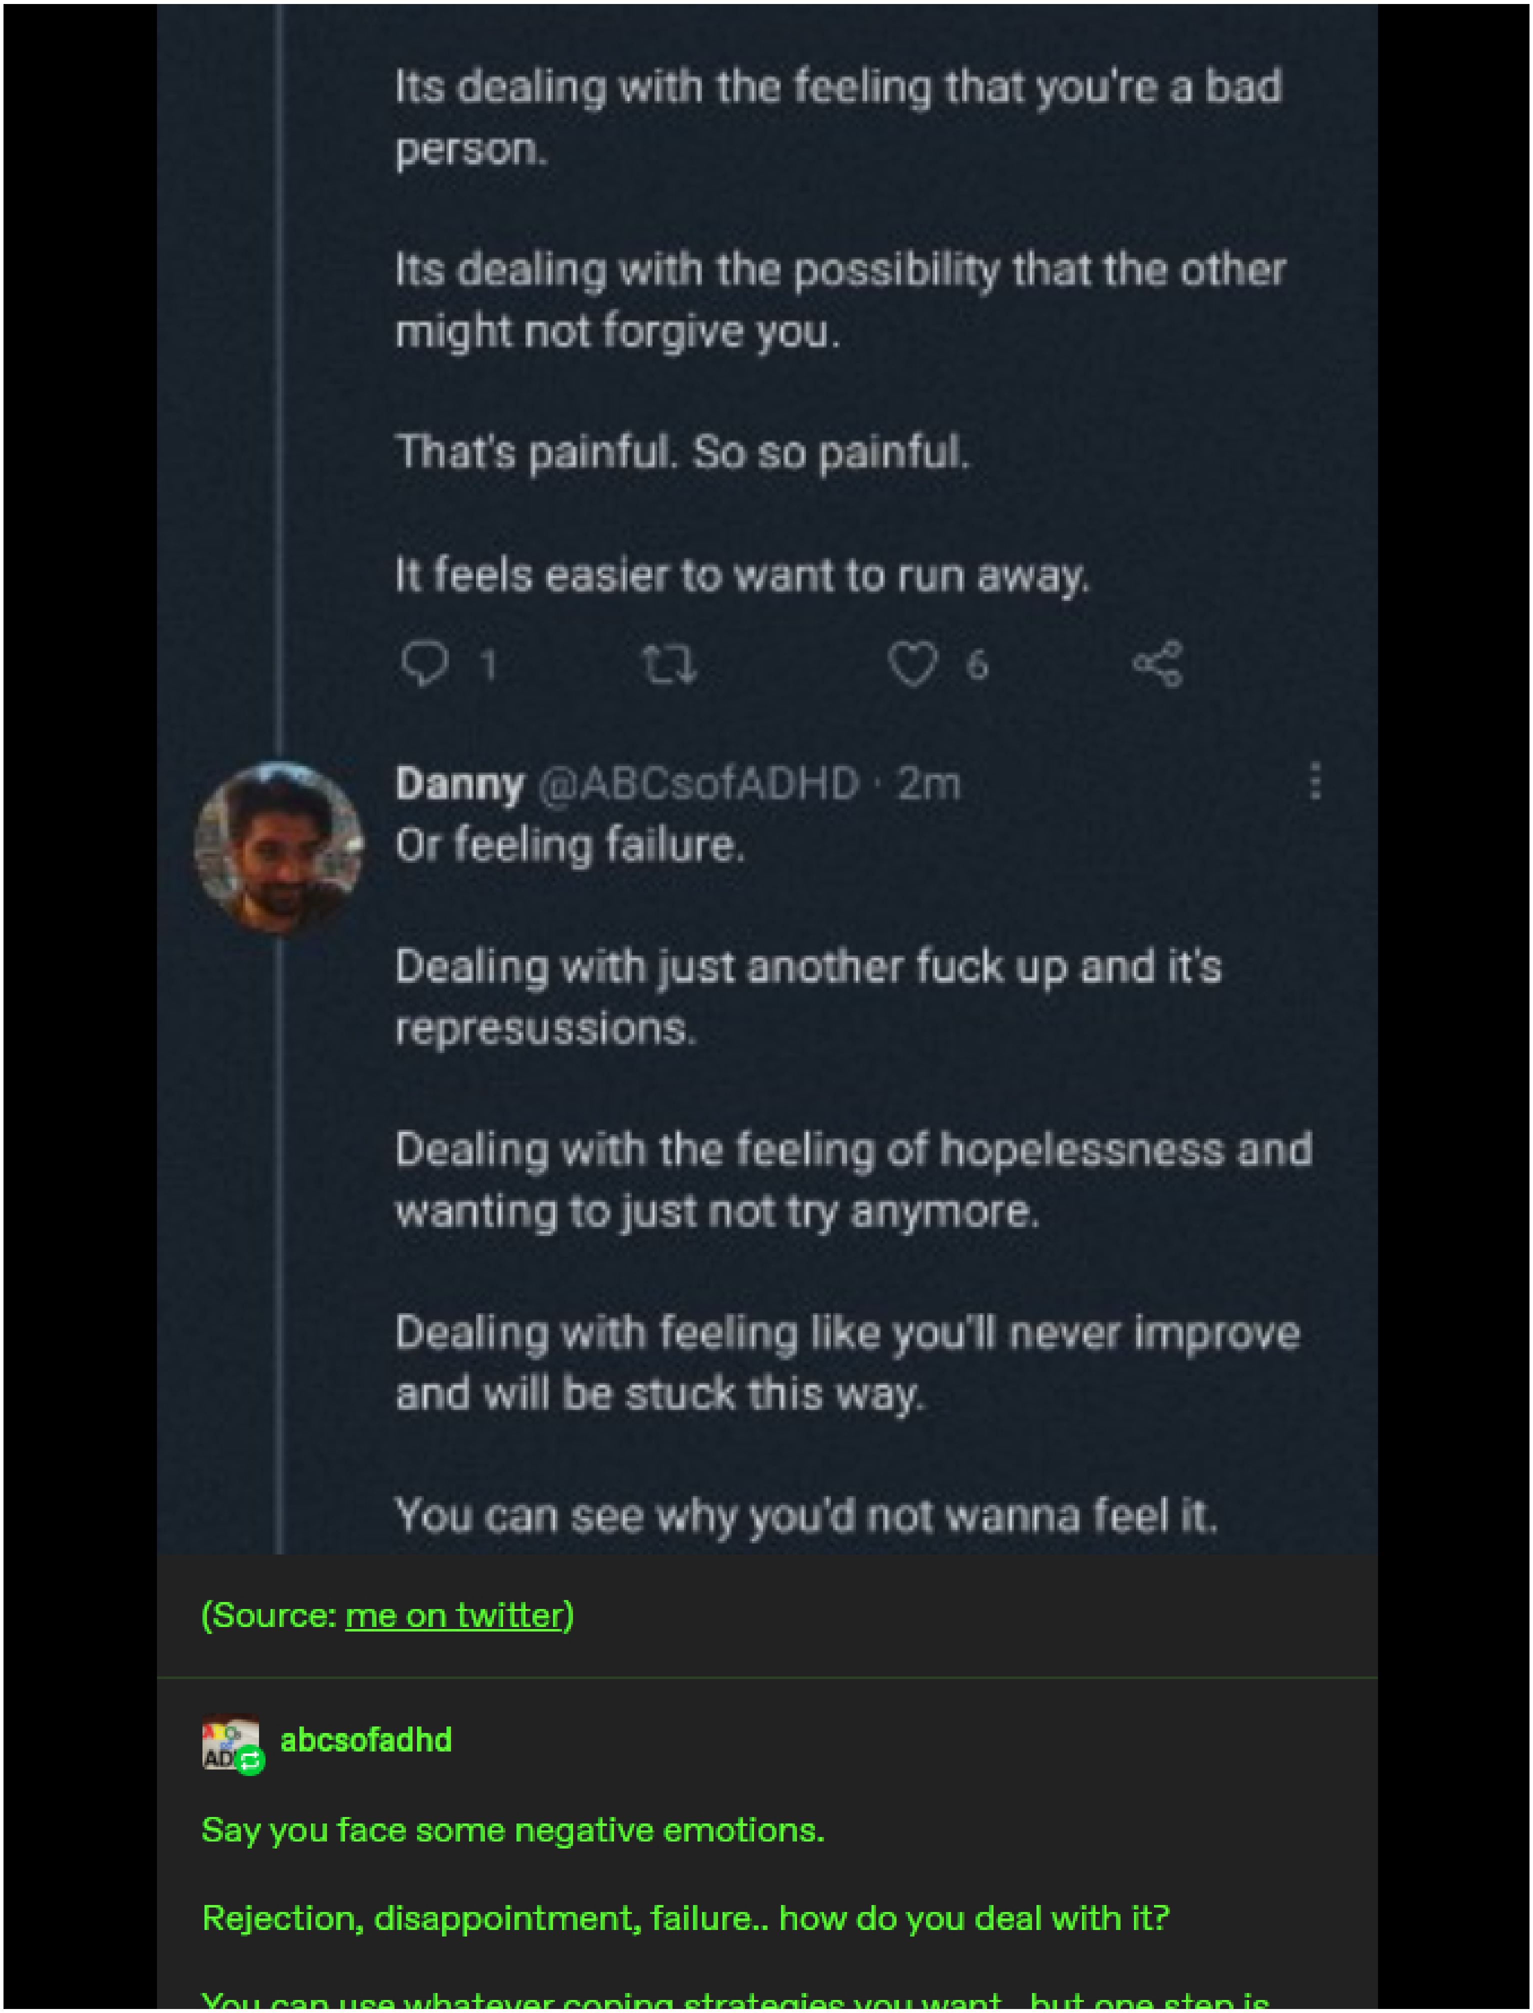
I'm not suggesting your focus on your emotion and blur everything else.

No, try unblur everything and take it all in.

Danny @ABCsofADHD · 6m

For example, what is feeling guilt?

It's acknowledging your hurt someone.



Its dealing with the feeling that you're a bad person.

Its dealing with the possibility that the other might not forgive you.

That's painful. So so painful.

It feels easier to want to run away.

Danny @ABCsofADHD · 2m

Or feeling failure.

Dealing with just another fuck up and it's represussions.

Dealing with the feeling of hopelessness and wanting to just not try anymore.

Dealing with feeling like you'll never improve and will be stuck this way.

You can see why you'd not wanna feel it.

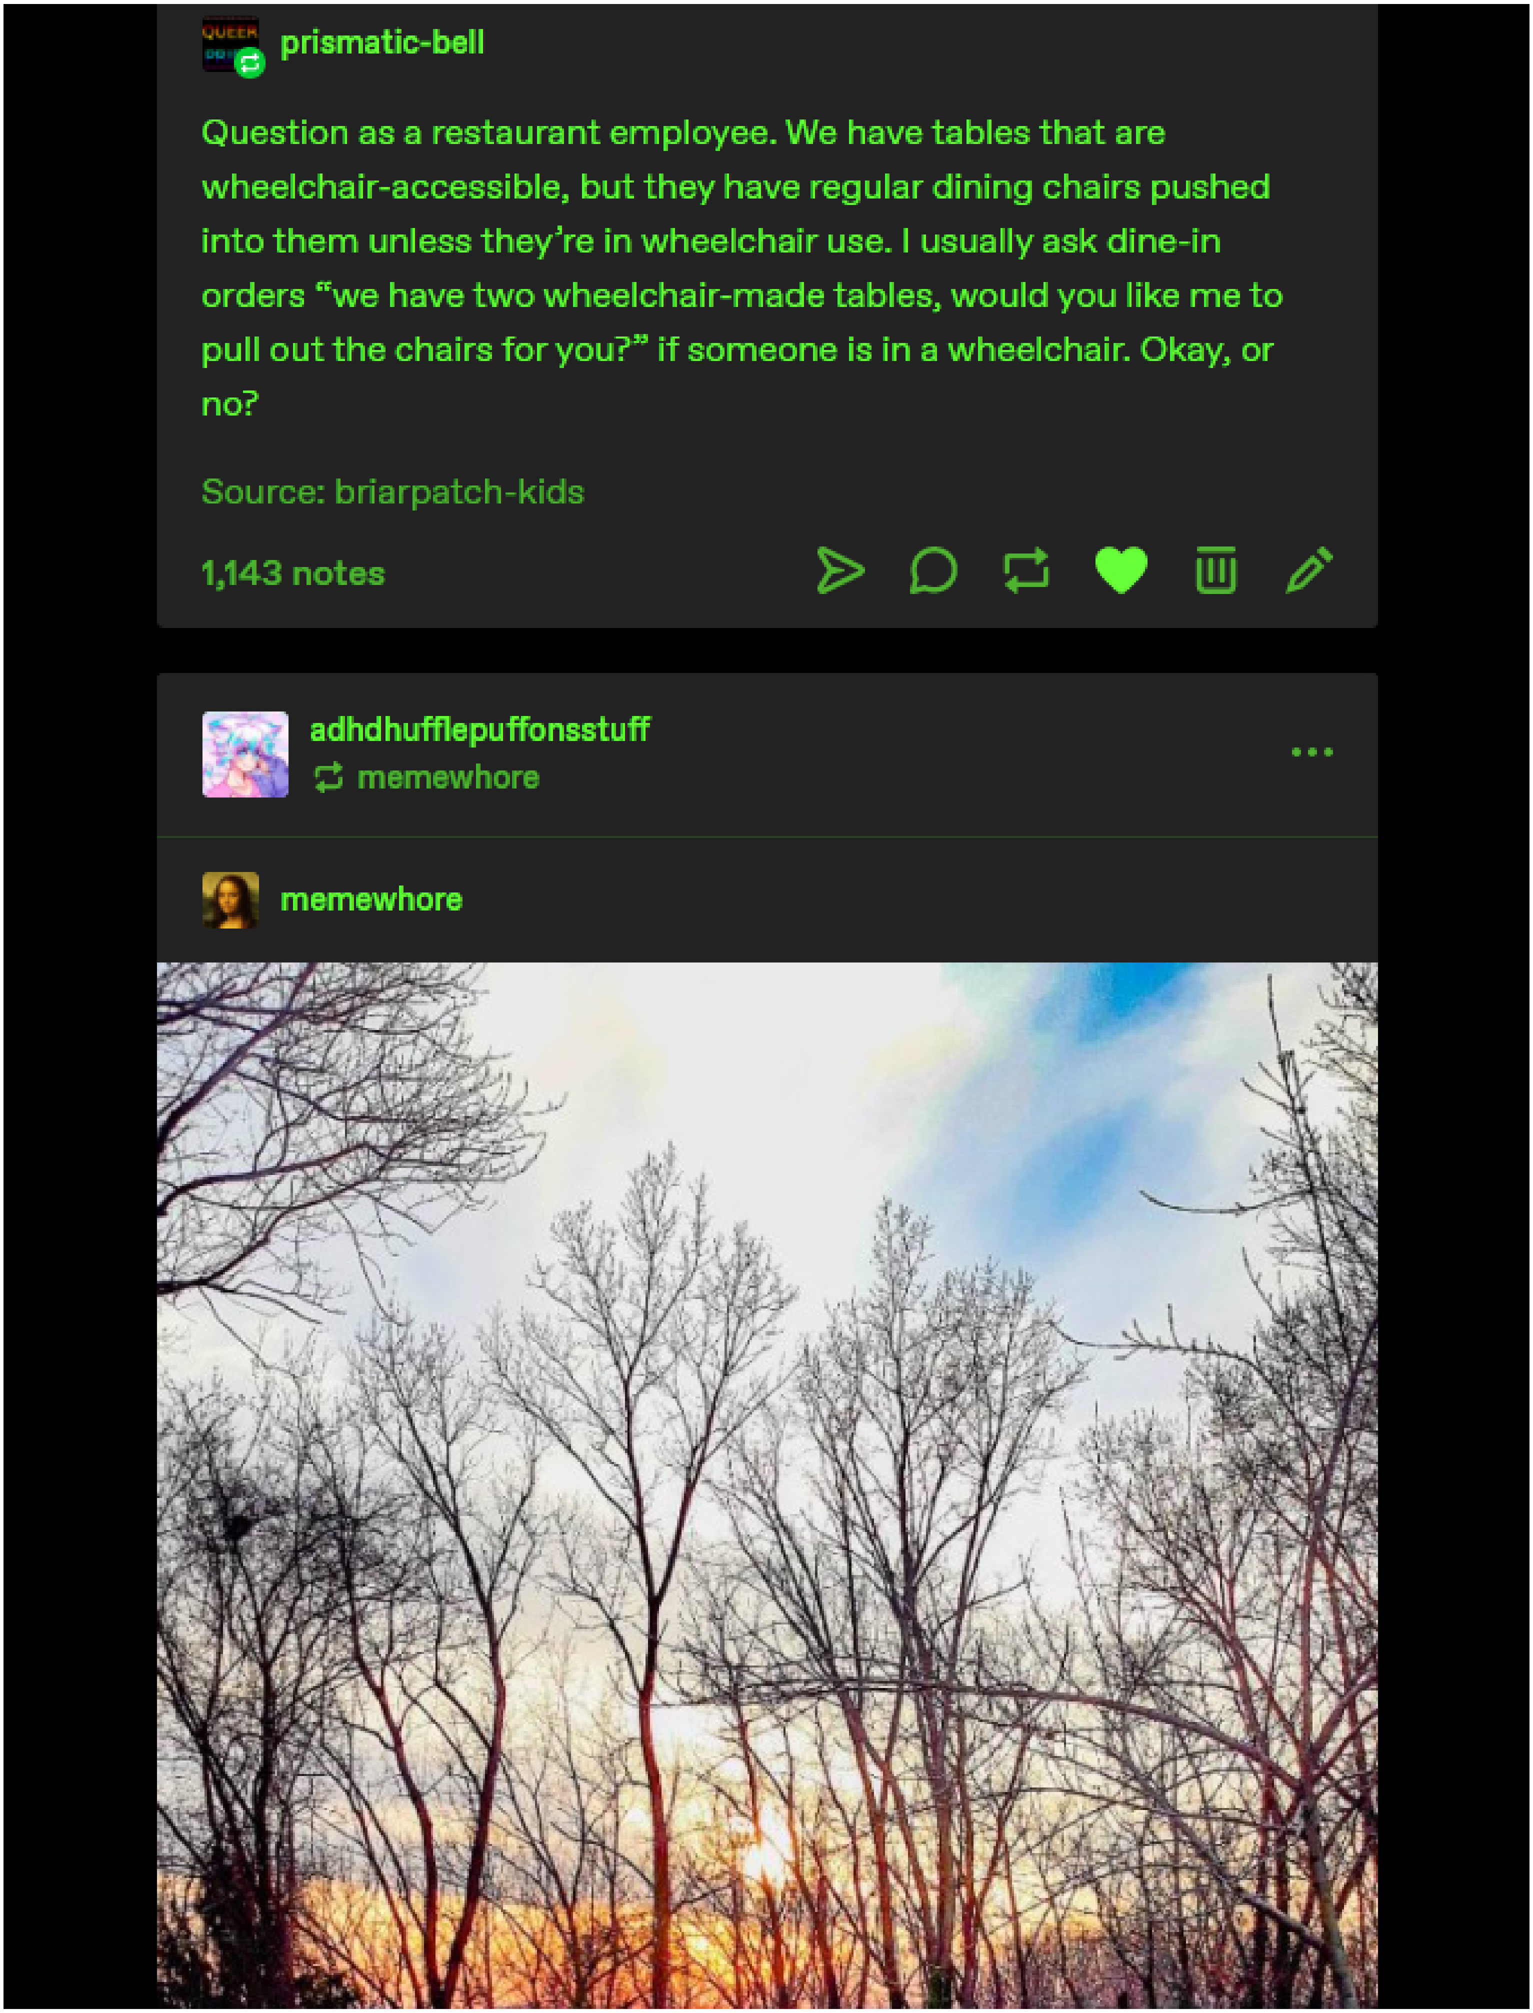
Helpful wheelchair etiquette tips, keeping in mind disability isn't a monolith and some people have different preferences:

- When talking, it's really cool and nice when people ask if they can move to a bench or seat or whatever to sit down. This is the ideal for me personally, we're on the same level and you're probably comfier. Standing is fine too though, just don't kneel or duck cause that's weird.
- Most of us can open doors just fine and are really good at it. It's a bit of an awkward pain for both of us if you try and open a door that I don't need help with. If you see someone actually struggling with it though, like if it's too heavy or whatever, you're fine to ask.
- Speaking of "help" there's actually not that many instances of using wheelchairs that requires the help of a stranger. I've needed it twice in a year and a half of full time wheelchair use. Unless someone's stuck in gravel or stuck with one caster in a flower bed or something, they probably don't need help and if they do they'll ask.
- If someone has a decorated chair, it's totally fine to say it looks cool, you like it, whatever. Most chair decorations are DIY or bought from small artists and I don't know if I've met a chair user with a decorated chair who isn't proud of their chair.
- Unless they're showing off, don't comment on their chair skills. Please just don't. When you're first learning it's such a mortifying ordeal to crash, and when you get good at it it's like praising someone for being good at walking. And the "speed demon do you have a license" jokes are really stale.
- Once you're friends with a wheelchair user, you'll generally be able to suss out what that person is okay with and what they aren't. I definitely have a different comfort level of jokes and behavior that I consider acceptable and fine from friends that I'd tell a stranger off for.



prismatic-bell

Question as a restaurant employee. We have tables that are wheelchair-accessible, but they have regular dining chairs pushed into them unless they're in wheelchair use. I usually ask dine-in orders "we have two wheelchair-made tables, would you like me to pull out the chairs for you?" if someone is in a wheelchair. Okay, or no?

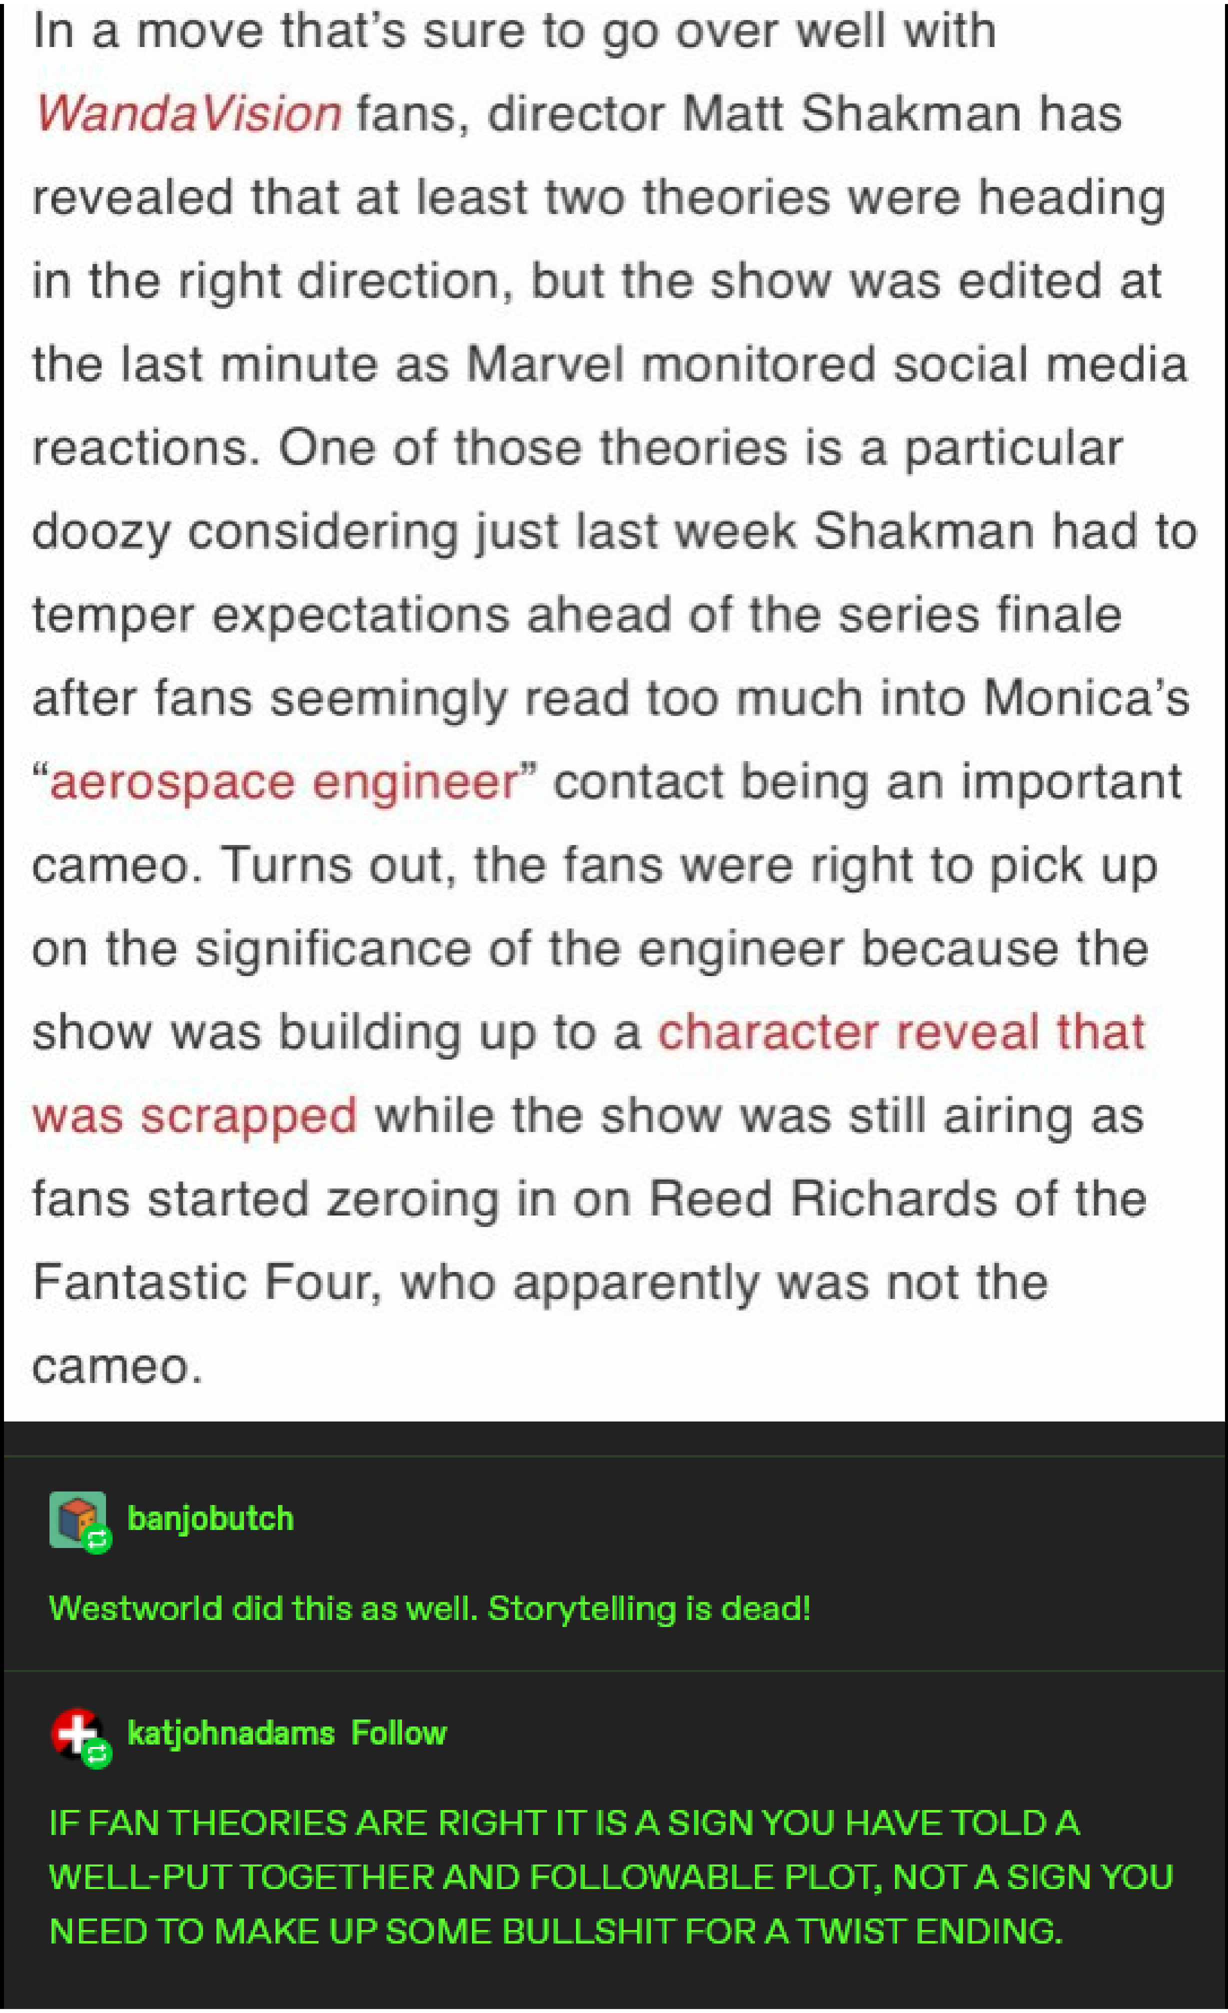
So you're telling me studios edit shit in their shows based off of what fans are saying on Twitter 😭



In a move that's sure to go over well with *WandaVision* fans, director Matt Shakman has revealed that at least two theories were heading in the right direction, but the show was edited at the last minute as Marvel monitored social media reactions. One of those theories is a particular doozy considering just last week Shakman had to temper expectations ahead of the series finale after fans seemingly read too much into Monica's "aerospace engineer" contact being an important cameo. Turns out, the fans were right to pick up on the significance of the engineer because the show was building up to a character reveal that was scrapped while the show was still airing as fans started zeroing in on Reed Richards of the Fantastic Four, who apparently was not the cameo.

No wait, I'm not done here:

If the fans get where you are going and *ARE STILL HAPPY*, you ***KEEP GOING THERE***. It shows they're invested and your story craft is setting up and paying off properly.

It is *not* a sign you need to M Night Shamaylan things until narrative is fuckin dead and "surprise endings!" reign supreme. If no one can guess what will happen, you don't have a plot, *you have deus ex machinas strung together like a child's macaroni necklace*. It might be endearing and beloved but its hardly a fuckin masterpiece.

To be utterly frank, this is where "NO SPOILERS! *NO SPOILERS EVER!* ***NO ONE IS ALLOWED TO BREATHE ABOUT THE PLOT UNTIL IT'S BEEN OUT ON DVD FOR FIVE YEARS***" attitude has left us – And the studios *ACTIVELY* encourage that shit because first week viewing numbers are their whole lifeblood.

Sure, an "oh shit" moment is great, but if you're doing it well, I should have that moment watching the show the second, fifth, or hundredth time, knowing how it will go. If being surprised were truly so important to a narrative, why even make a Shakespeare play? *Is anyone out there still hoping Romeo and Juliet still get together at the end?* Why make mystery novels into movies? *Spoiler warning: Hercules Poirot gets the bad guy.* Movies that directly follow historical events? *Clearly worthless.*

Come on, now. Sure, try not to spoil shit for people intentionally, don't be a dick, but can we calm the fuck down and can Hollywood stop pushing this shit both in social media and with business choices like this?

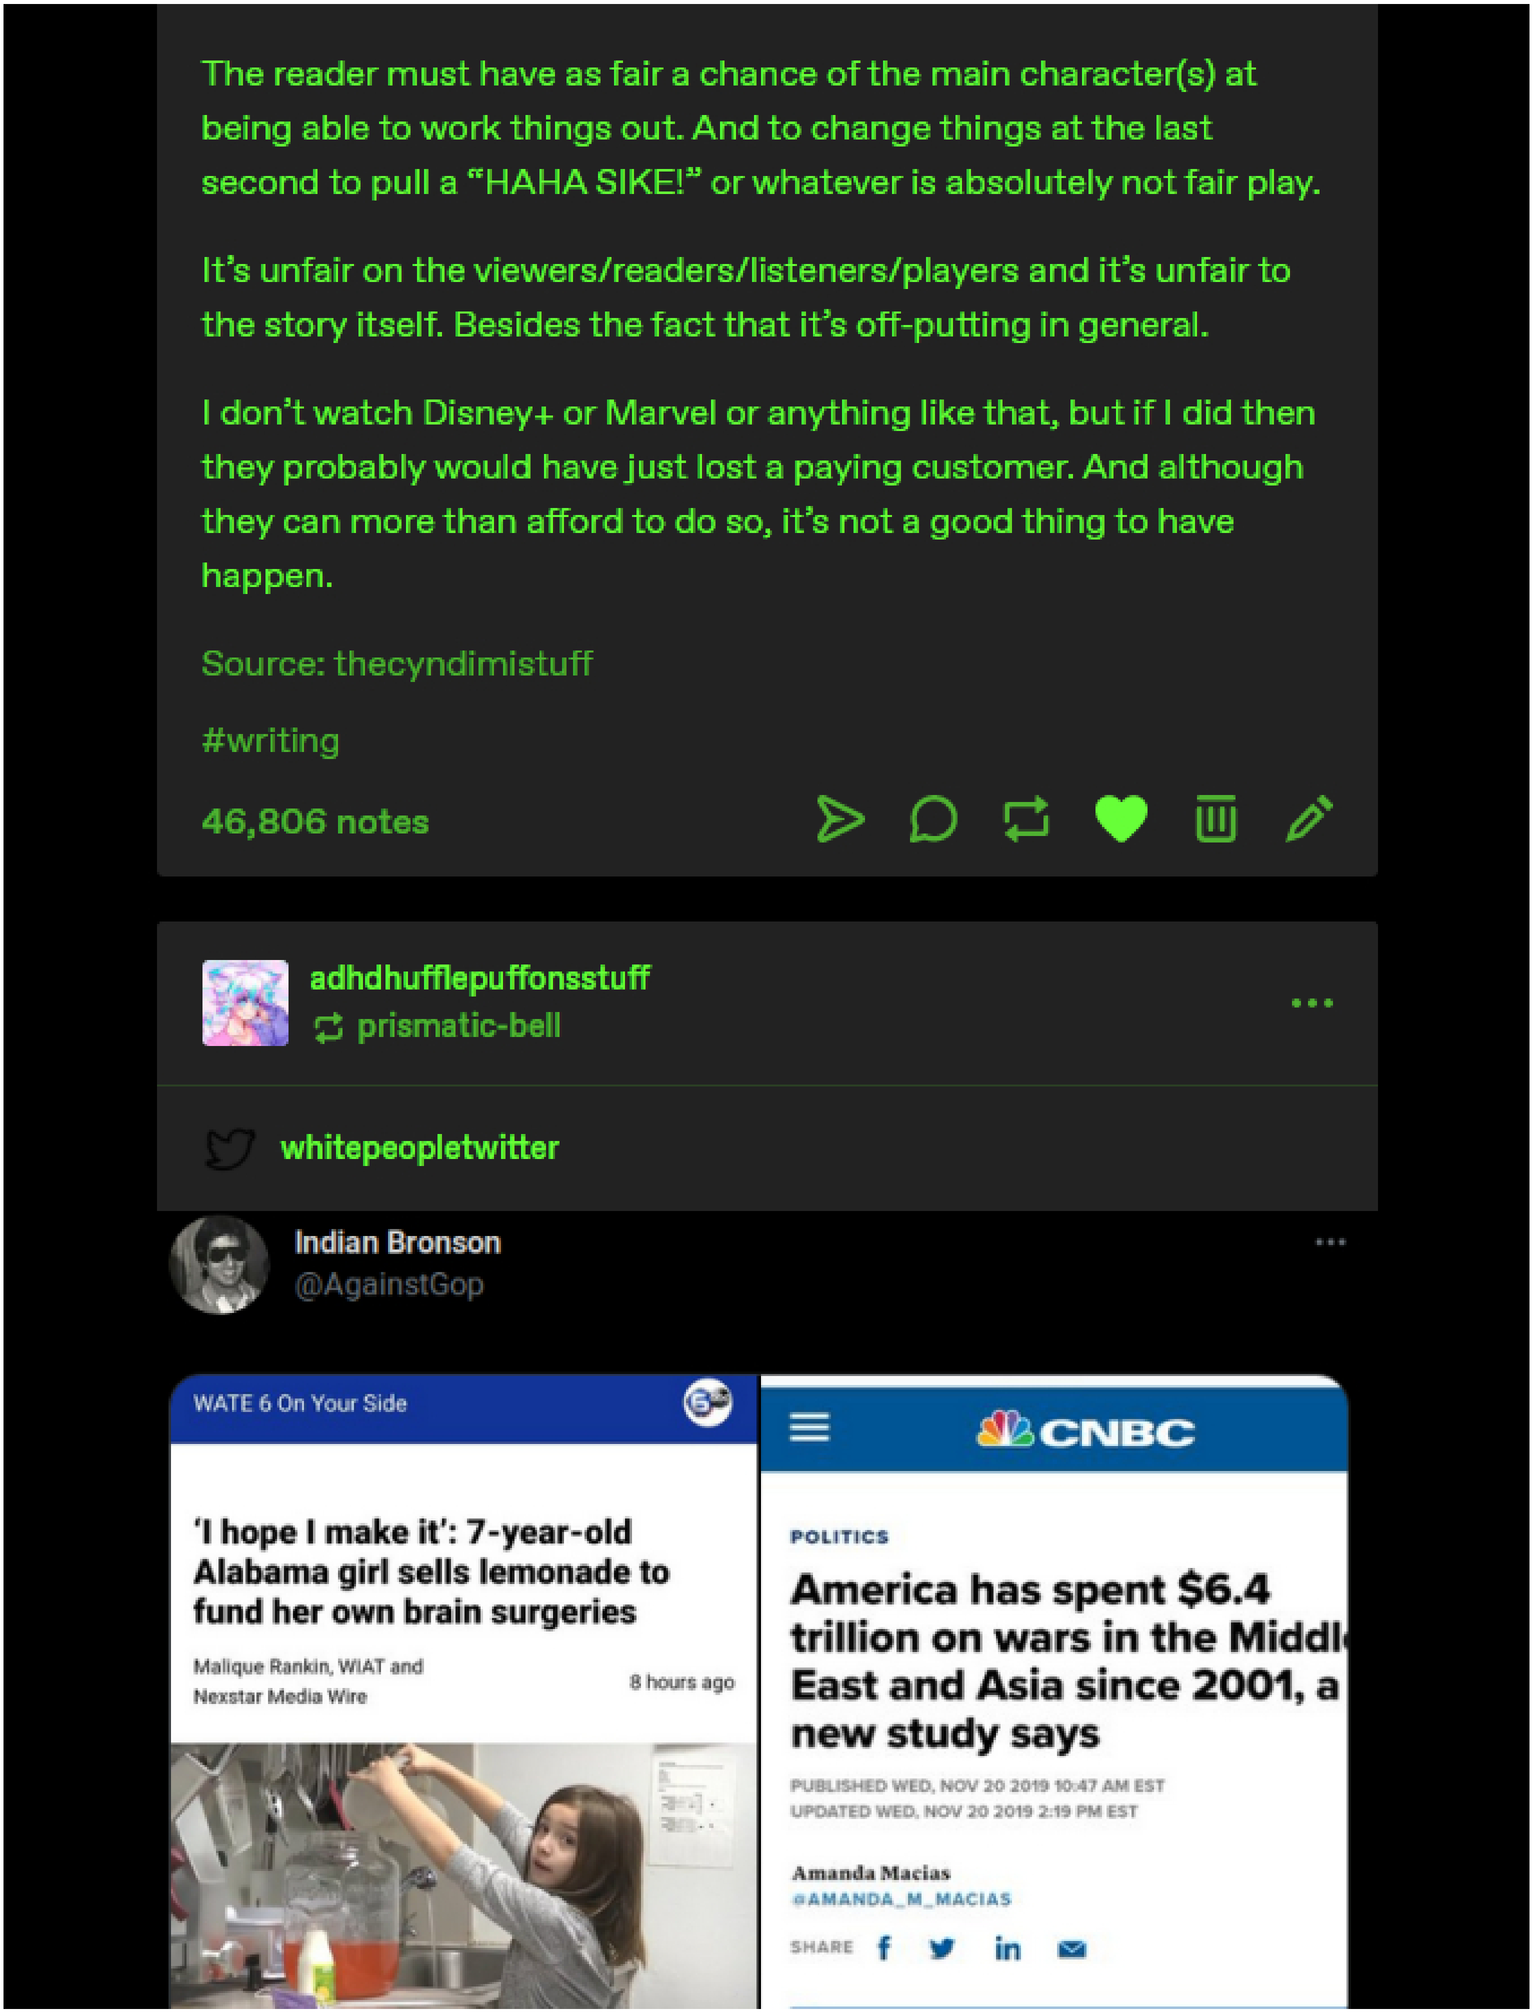
This absolutely contravenes the rules of fair play.



The reader must have as fair a chance of the main character(s) at being able to work things out. And to change things at the last second to pull a "HAHA SIKE!" or whatever is absolutely not fair play.

It's unfair on the viewers/readers/listeners/players and it's unfair to the story itself. Besides the fact that it's off-putting in general.

I don't watch Disney+ or Marvel or anything like that, but if I did then they probably would have just lost a paying customer. And although they can more than afford to do so, it's not a good thing to have happen.

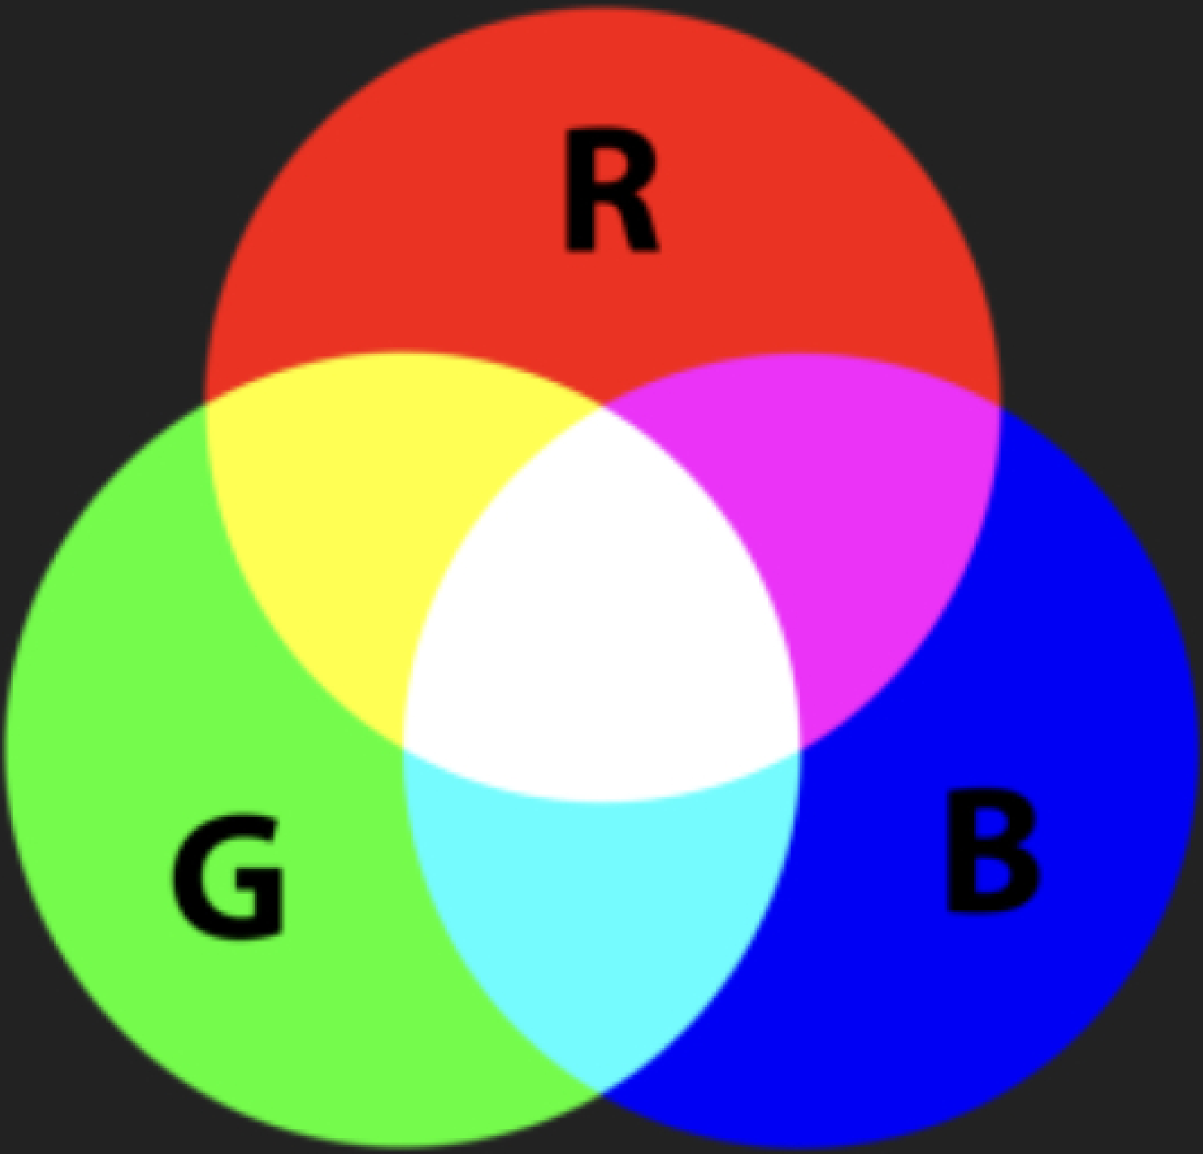
Shrimp Colors Are a Lie

Well, *lie* is a bit of a strong word, but scientists have known since 2014 that those special colors that mantis shrimp can see actually Aren't A Thing.

Mantis shrimp (which aren't a shrimp but a "stomatopod" which are more closely related to krill) have 12 types of color receptors in their eyes compared to our measly 3 receptors. We used to think this meant they could see a whole range of dazzling colors beyond our comprehension.

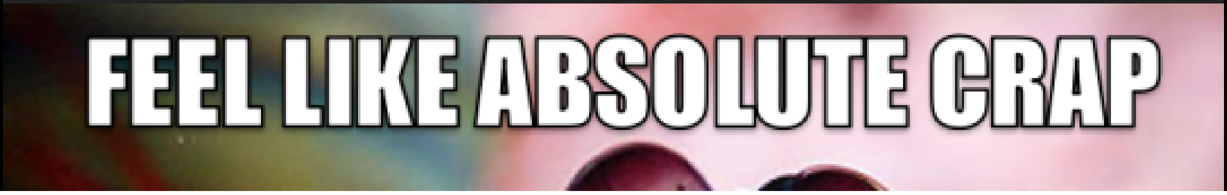
Some people were (rightfully) jealous.

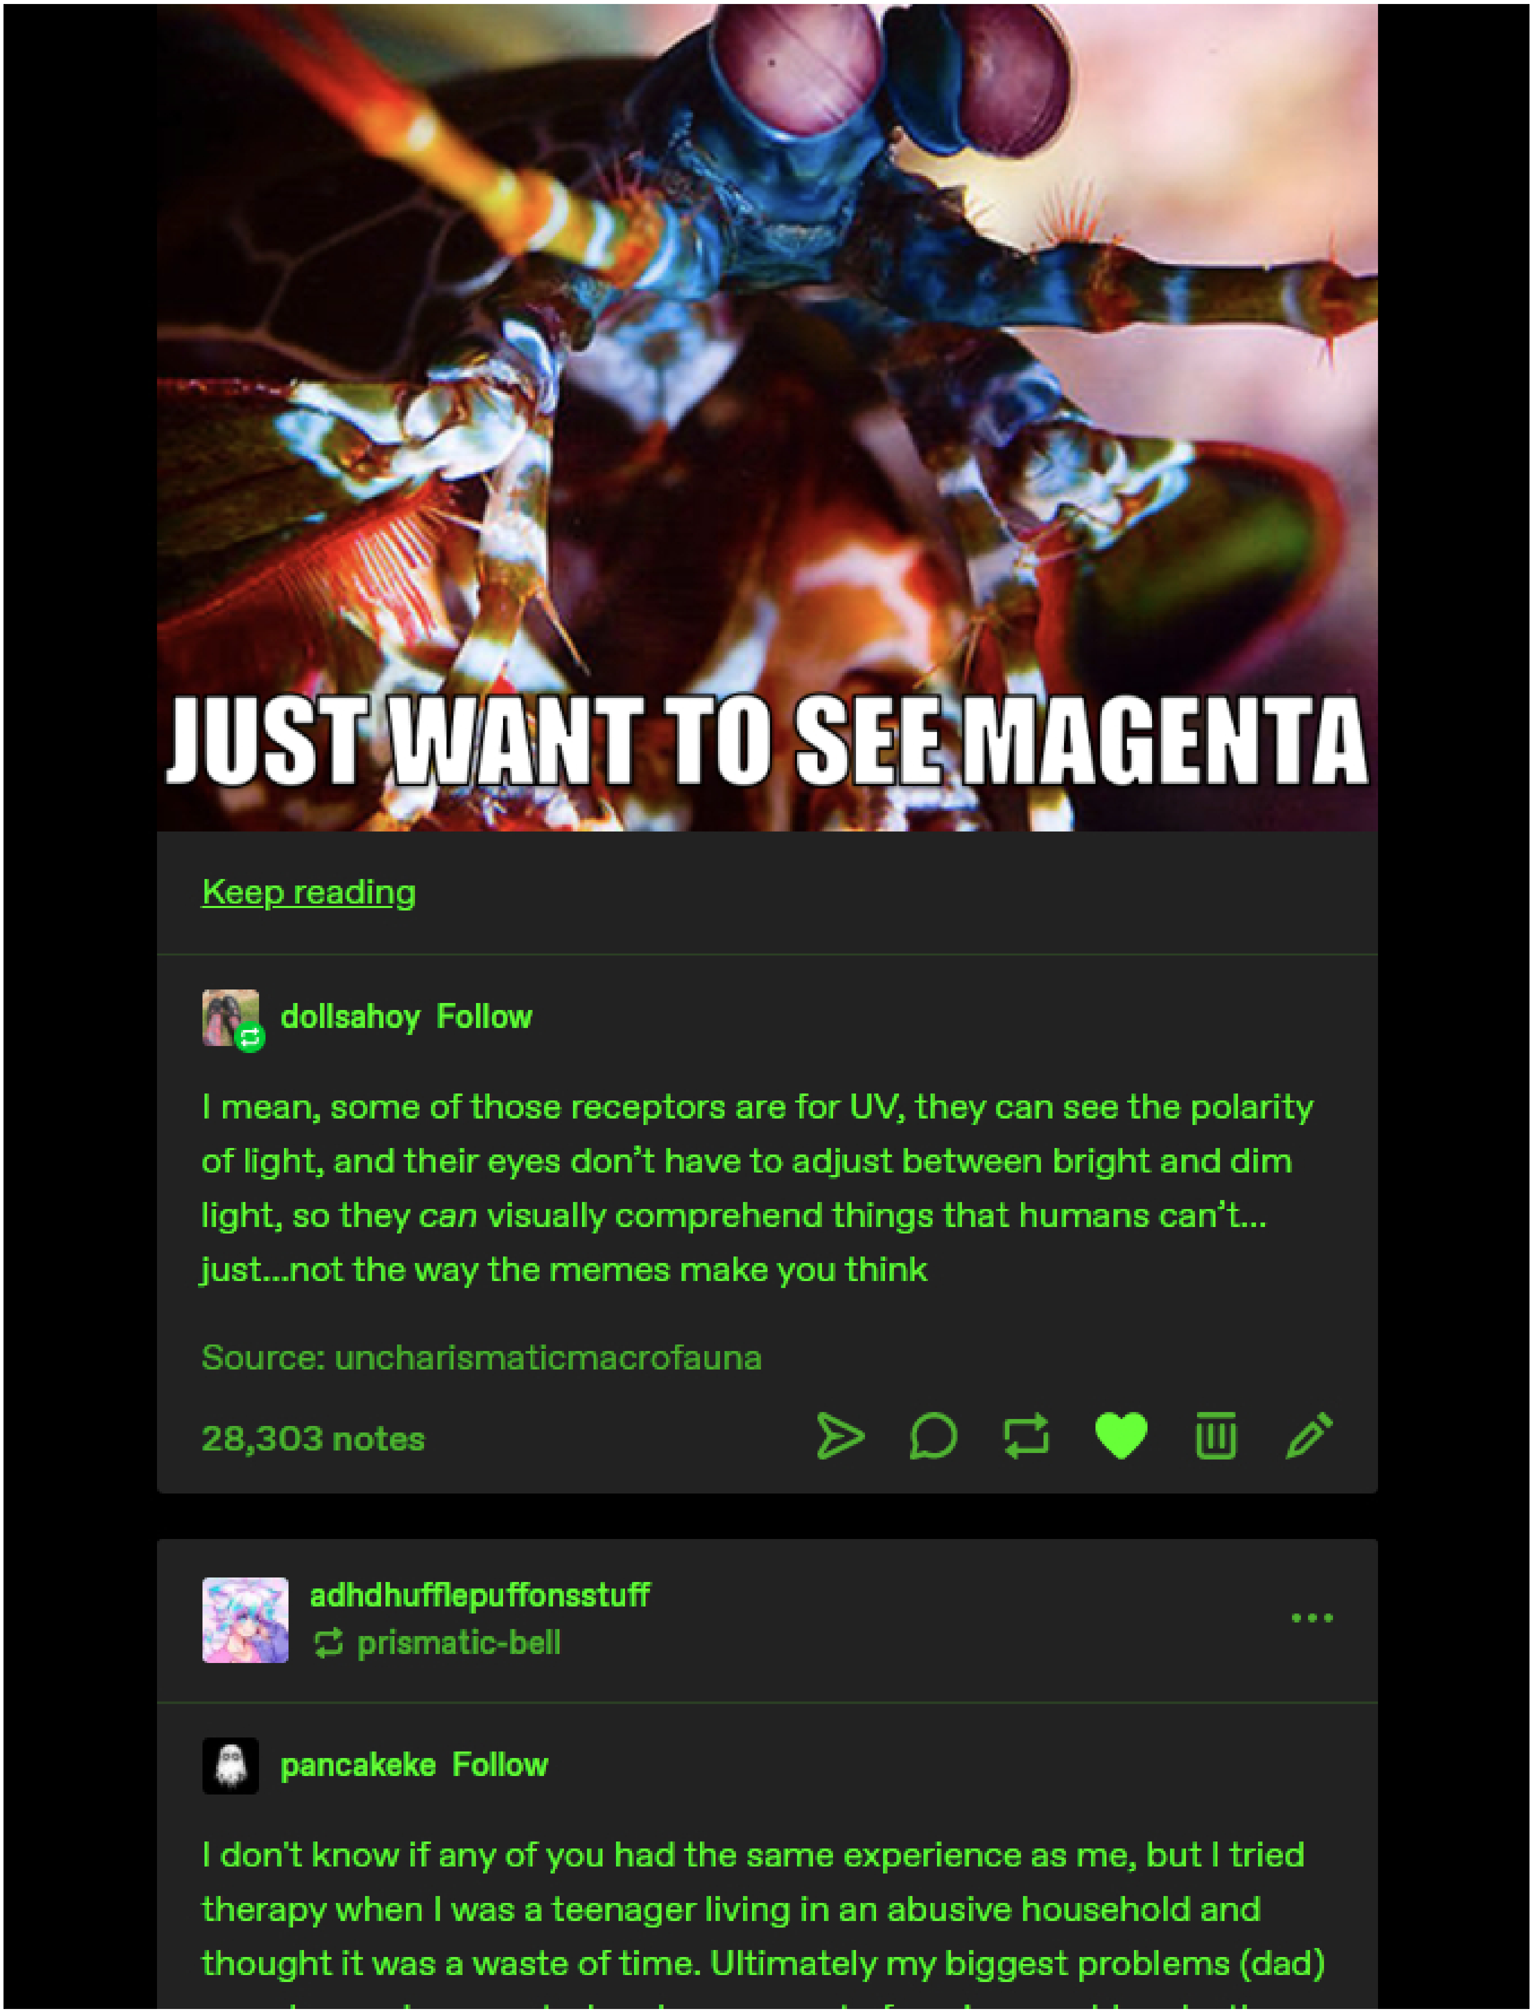
However, it turns out that mantis shrimp probably have so many color receptors because they don't blend colors the way we do. When you look at something purple, your red and blue receptors are strongly stimulated while your green receptors are not and your brain synthesizes this information into purple. When a mantis shrimp looks at something purple, they have a specific purple receptor that is stimulated.



Why this weird system? Probably because it is faster and more efficient. Mantis shrimp need to distinguish between prey species and react extremely quickly (some species can punch 50x faster than the blink of an eye), so they don't have time to do the mental calculations to blend colors.

Not only is the Forbidden Shrimp Color Knowledge a sham, but mantis shrimp can actually see *fewer* colors than we can because they can't distinguish as many shades between colors. They also can't see those cursed Imaginary Colors.





dollsahoy Follow

I mean, some of those receptors are for UV, they can see the polarity of light, and their eyes don't have to adjust between bright and dim light, so they *can* visually comprehend things that humans can't… just…not the way the memes make you think

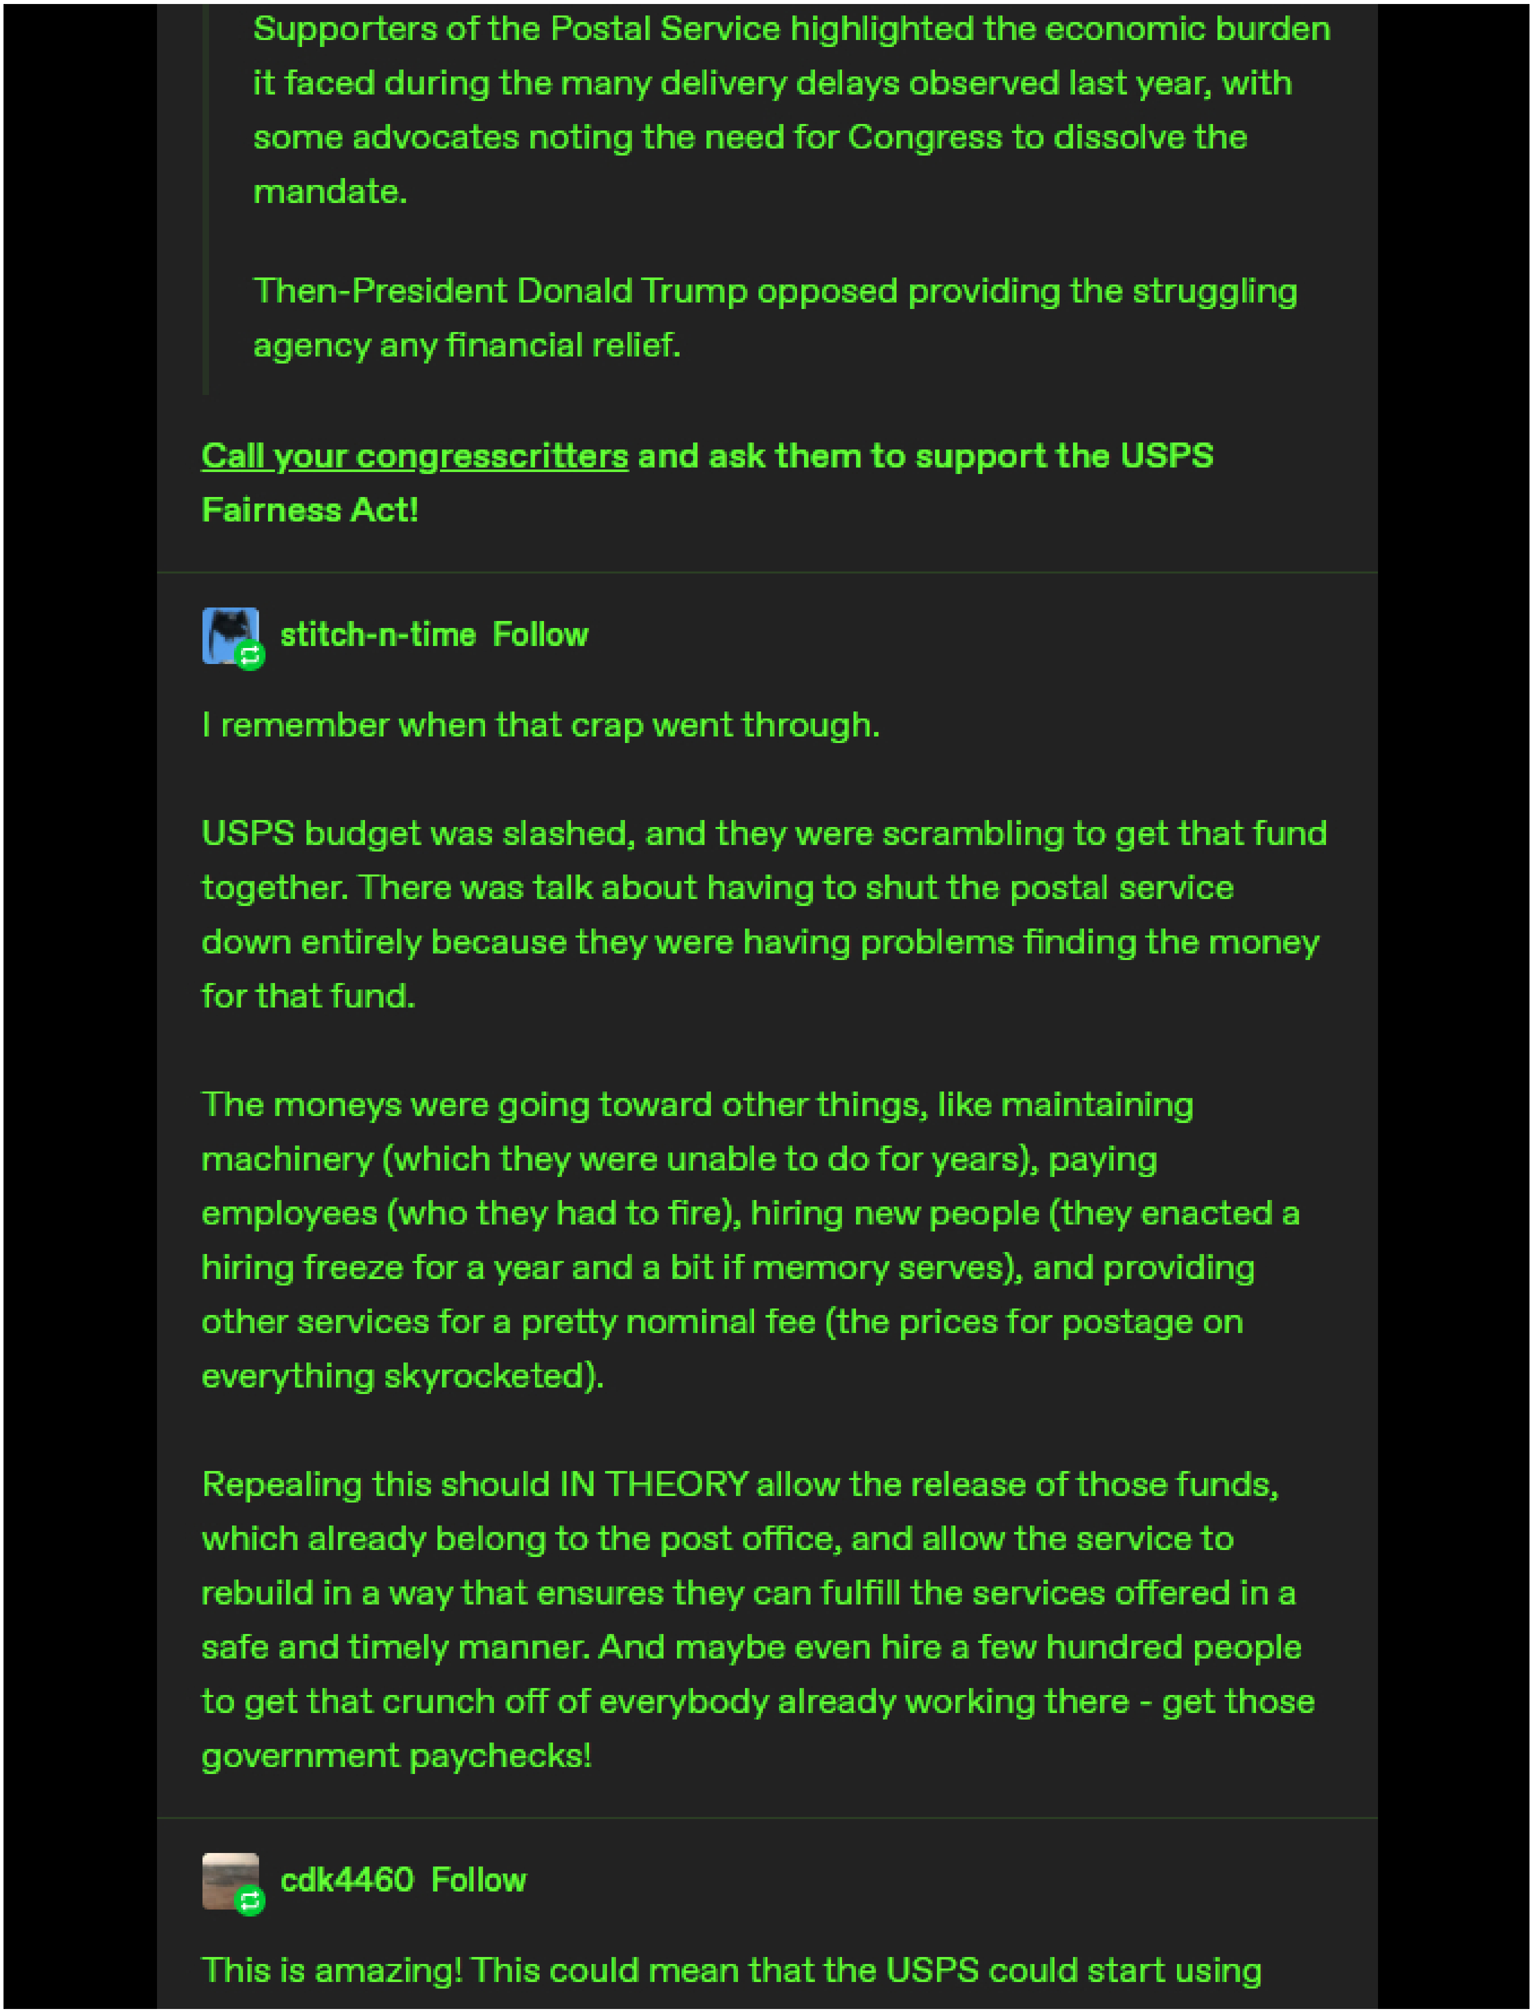
Lawmakers aim to dissolve 'draconian' law that placed heavy financial burden on Postal Service

The financial requirement has created a major economic drag on the Postal Service, causing it to appear to fall billions of dollars...

WWW.NBCNEWS.COM

mikkeneko Follow

> The issue stems from a 2006 law that required the Postal Service to create a $72 billion fund that would pay for its employees' retirement health benefits for more than 50 years into the future. This is not required by any other federal agency.
>
> The "USPS Fairness Act," introduced by Democrats and Republicans in both chambers, would do away with the requirement and comes as some lawmakers and the biggest Postal Service union have called for President Joe Biden to quickly install new leadership in the federal agency.
>
> "The unreasonable prefunding mandate has threatened the survival of the USPS and placed at risk vital services for the millions who rely on it," said Rep. Peter DeFazio, D-Ore., one of the bill's sponsors.



> Supporters of the Postal Service highlighted the economic burden it faced during the many delivery delays observed last year, with some advocates noting the need for Congress to dissolve the mandate.
>
> Then-President Donald Trump opposed providing the struggling agency any financial relief.

Call your congresscritters and ask them to support the USPS Fairness Act!

stitch-n-time **Follow**

I remember when that crap went through.

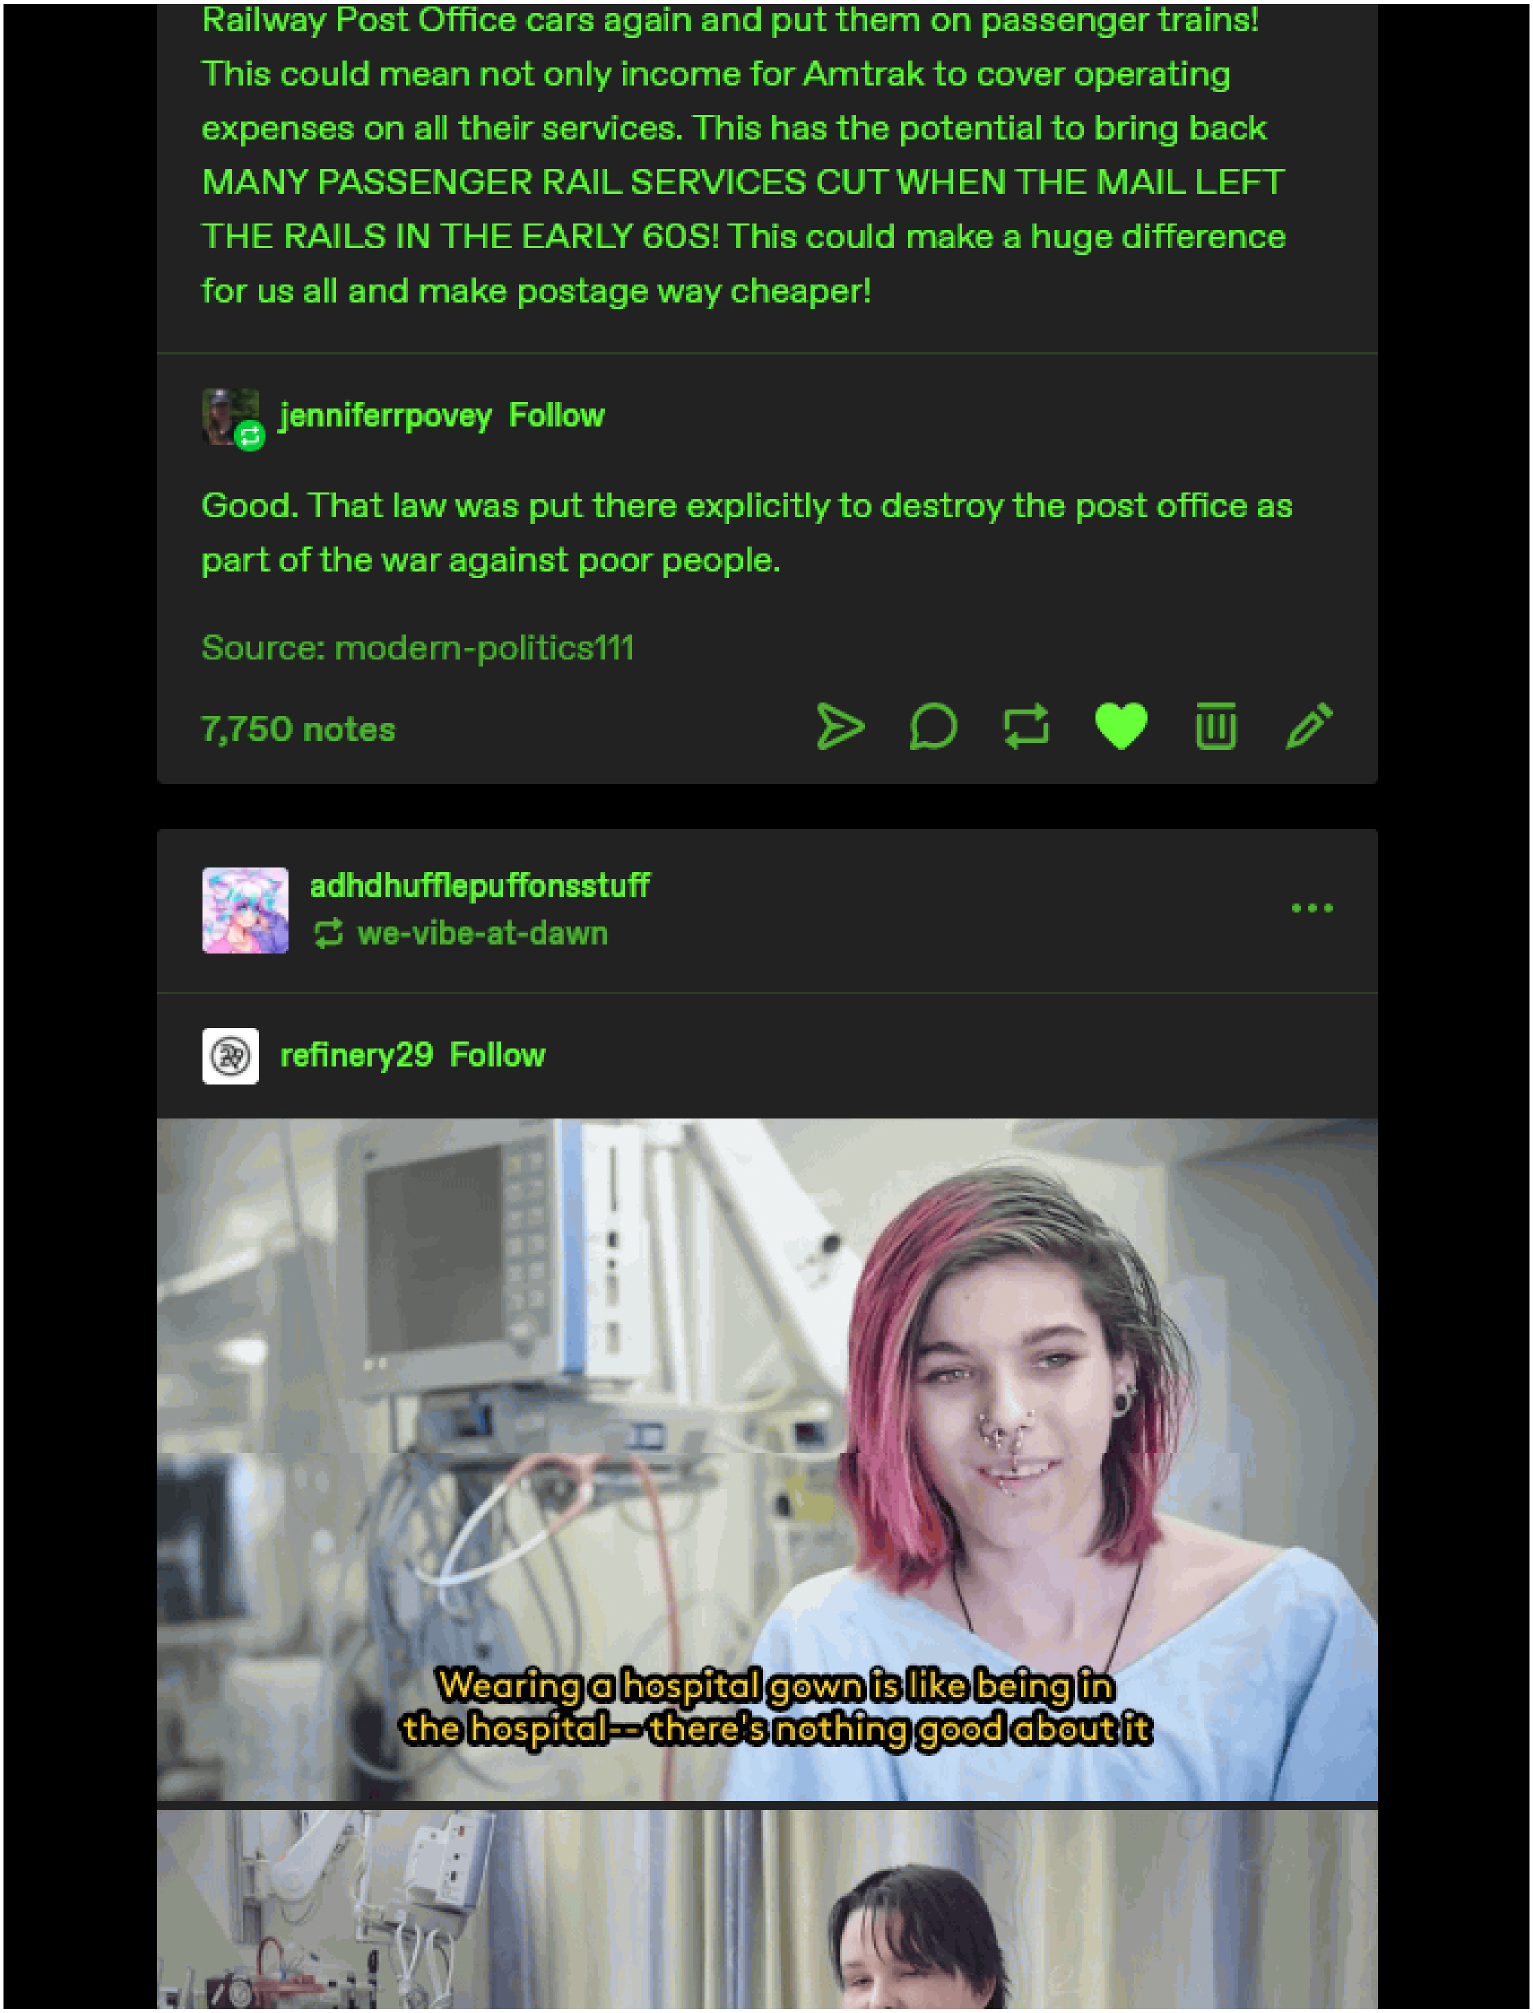
USPS budget was slashed, and they were scrambling to get that fund together. There was talk about having to shut the postal service down entirely because they were having problems finding the money for that fund.

The moneys were going toward other things, like maintaining machinery (which they were unable to do for years), paying employees (who they had to fire), hiring new people (they enacted a hiring freeze for a year and a bit if memory serves), and providing other services for a pretty nominal fee (the prices for postage on everything skyrocketed).

Repealing this should IN THEORY allow the release of those funds, which already belong to the post office, and allow the service to rebuild in a way that ensures they can fulfill the services offered in a safe and timely manner. And maybe even hire a few hundred people to get that crunch off of everybody already working there - get those government paychecks!

cdk4460 **Follow**

This is amazing! This could mean that the USPS could start using



Railway Post Office cars again and put them on passenger trains! This could mean not only income for Amtrak to cover operating expenses on all their services. This has the potential to bring back MANY PASSENGER RAIL SERVICES CUT WHEN THE MAIL LEFT THE RAILS IN THE EARLY 60S! This could make a huge difference for us all and make postage way cheaper!

jenniferrpovey Follow

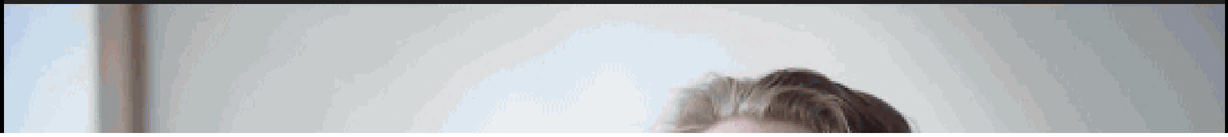
been stripped away from me



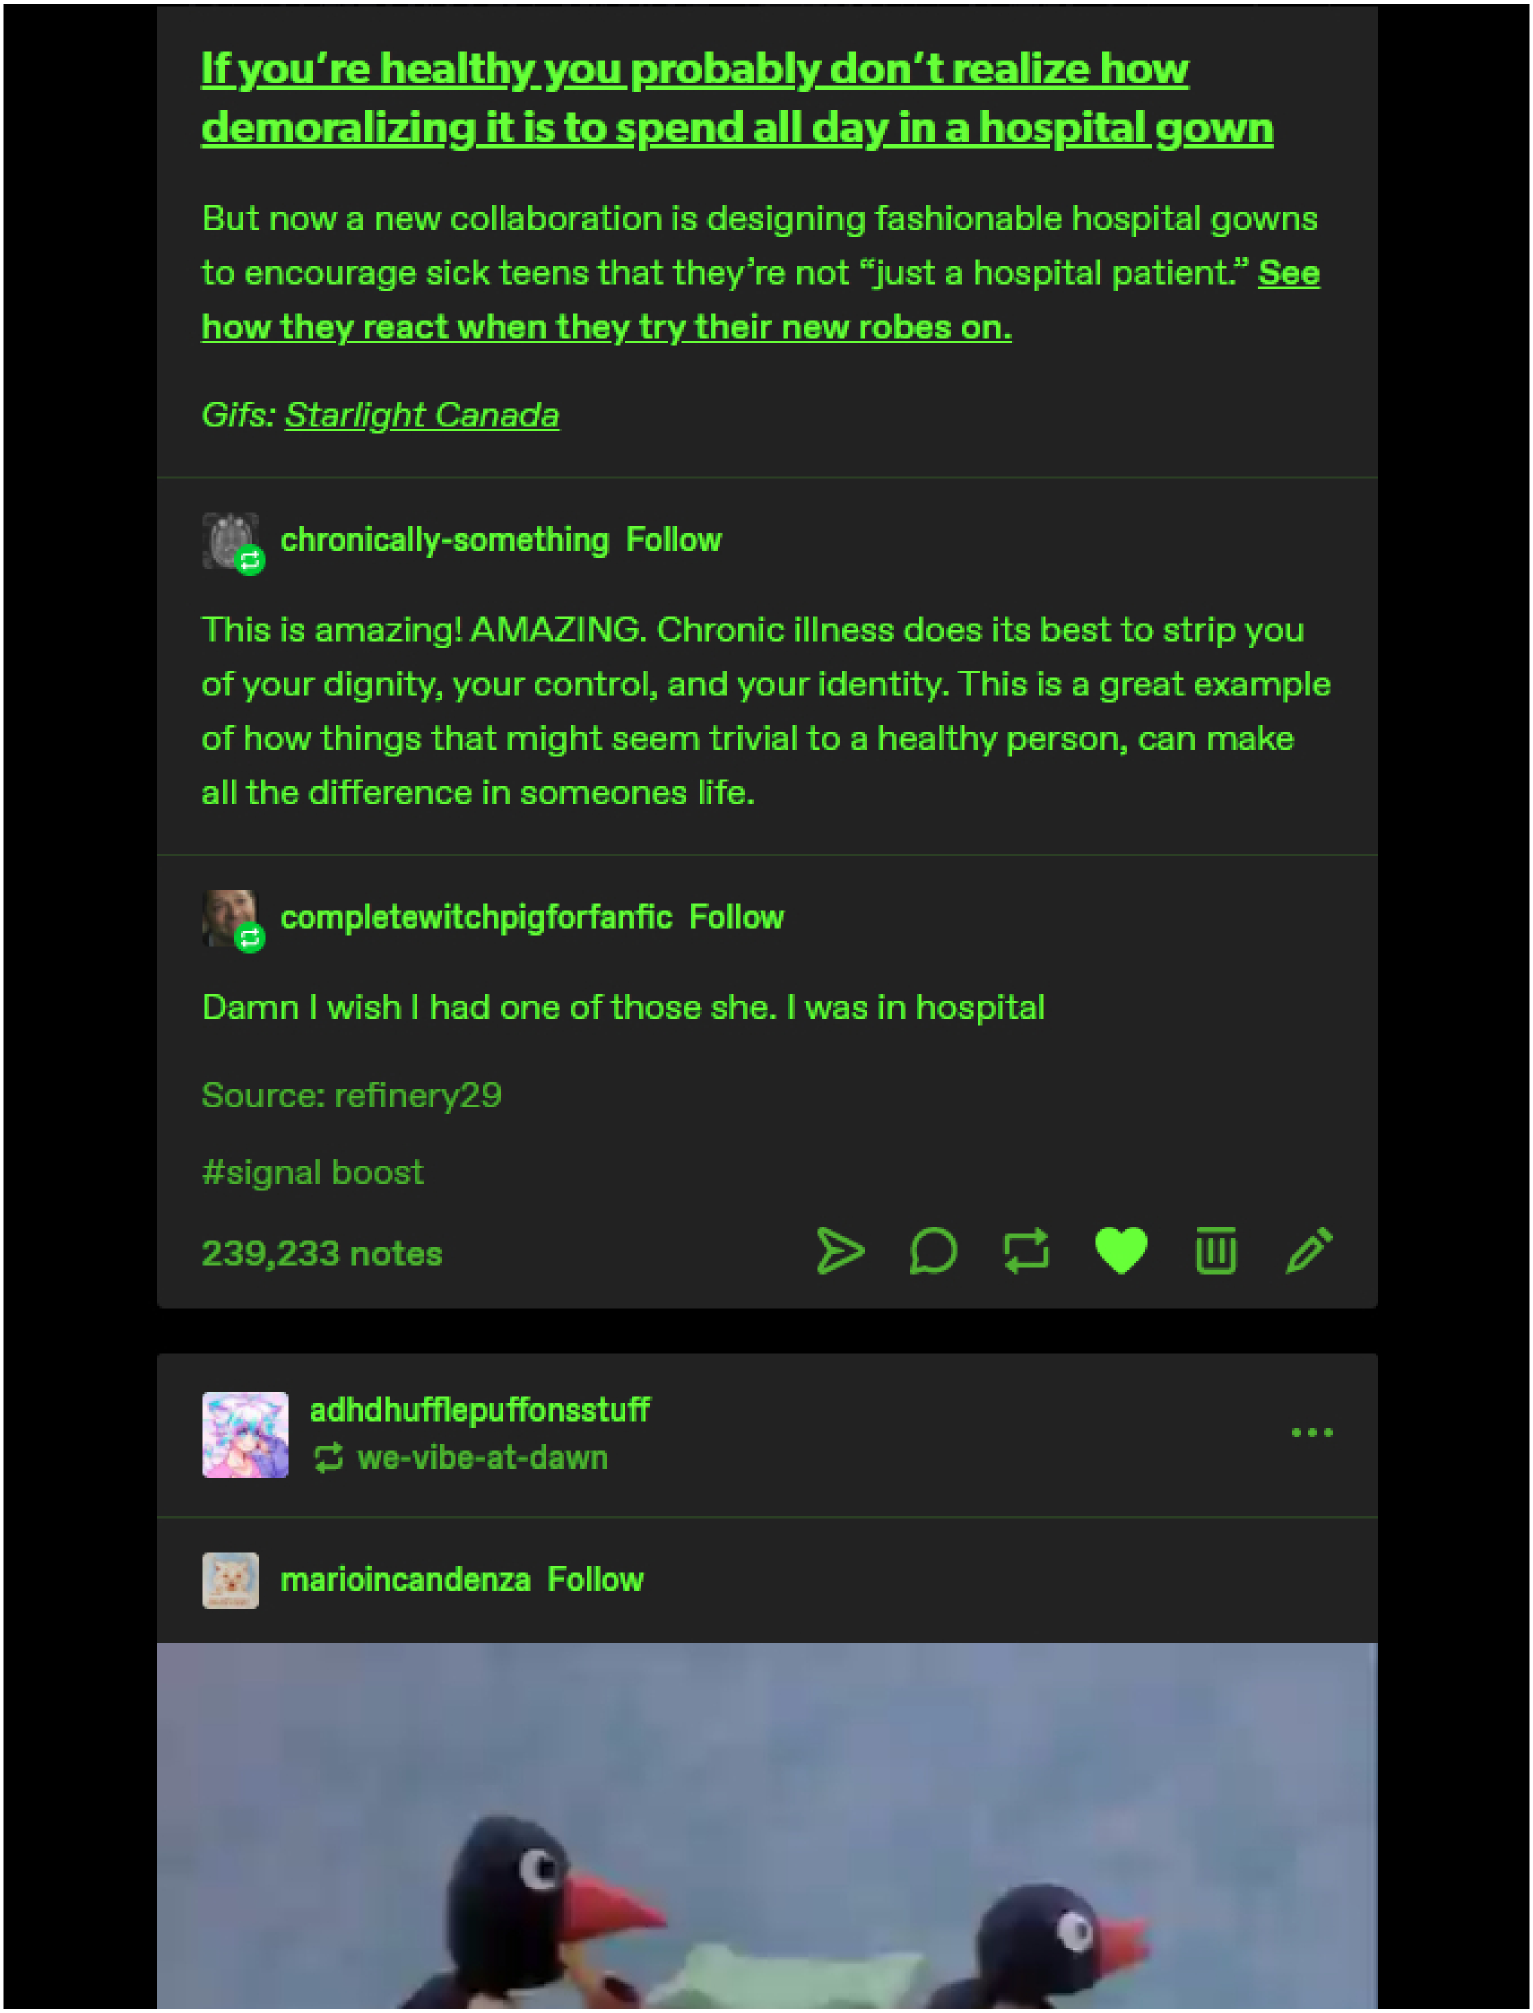
When you can't wear what you want you feel like you're not who you should be or you're just your illness or you're just a hospital patient

In the past I've designed and worked with David Bowie, Meryl Streep, but this actually means so much more than even doing that stuff

Being a teen is not an easy thing ever and being a teen with some serious health problems, I can only imagine is the most challenging thing in the world. Nothing is certain for those kids

I hope when someone puts this gown on that they feel like they're stepping into their power

Please help bring more Ward + Robes to hospitalized teens.



If you're healthy you probably don't realize how demoralizing it is to spend all day in a hospital gown

But now a new collaboration is designing fashionable hospital gowns to encourage sick teens that they're not "just a hospital patient." **See how they react when they try their new robes on.**

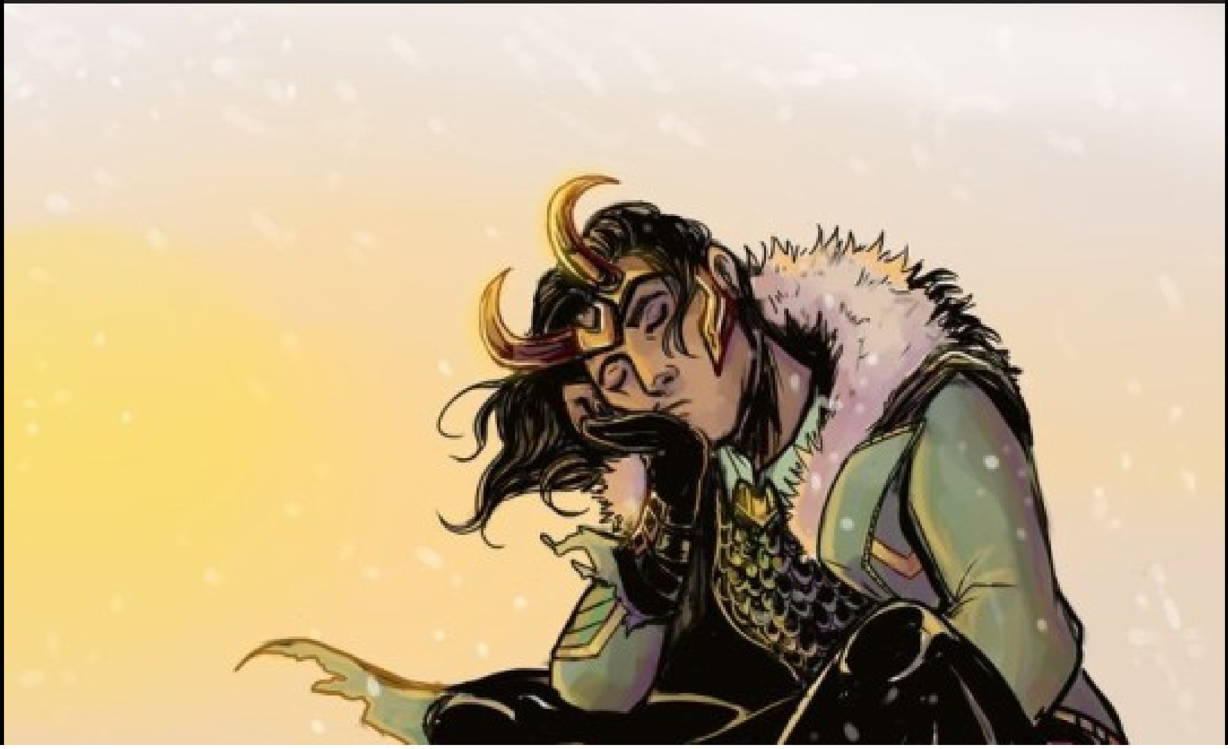
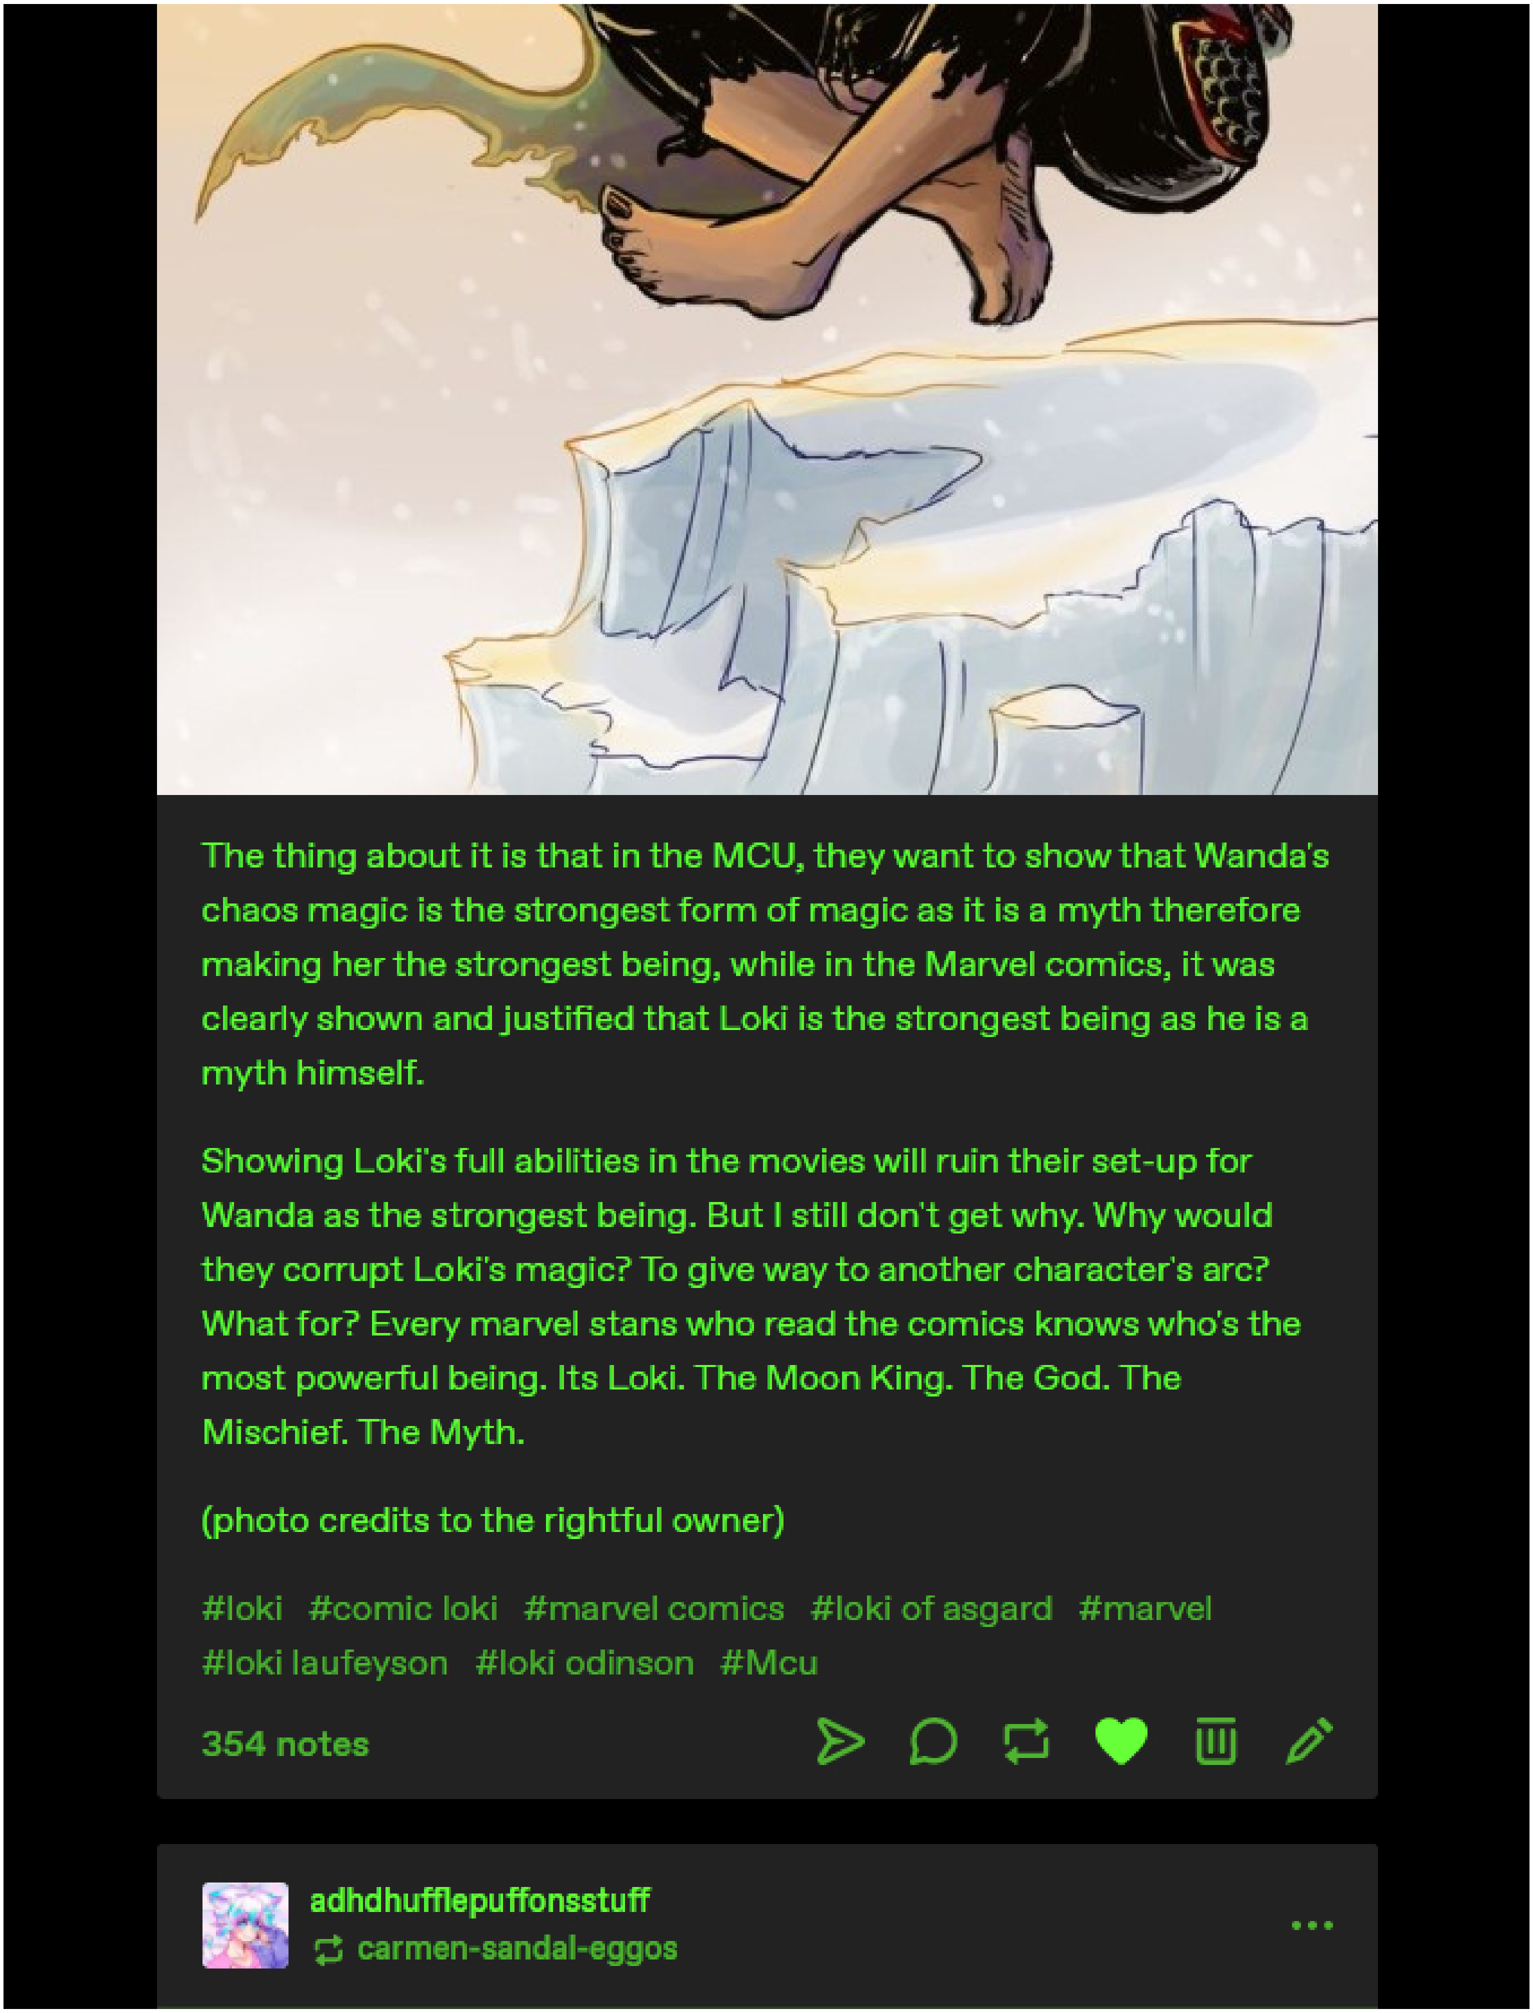
Other Marvel stans: hoping to see Doctor Strange, Wanda, and Loki team up in the movies

Me: knows it wouldn't happen because that particular panel will show how powerful Loki really is compared to Doctor Strange and Wanda





The thing about it is that in the MCU, they want to show that Wanda's chaos magic is the strongest form of magic as it is a myth therefore making her the strongest being, while in the Marvel comics, it was clearly shown and justified that Loki is the strongest being as he is a myth himself.

Showing Loki's full abilities in the movies will ruin their set-up for Wanda as the strongest being. But I still don't get why. Why would they corrupt Loki's magic? To give way to another character's arc? What for? Every marvel stans who read the comics knows who's the most powerful being. Its Loki. The Moon King. The God. The Mischief. The Myth.

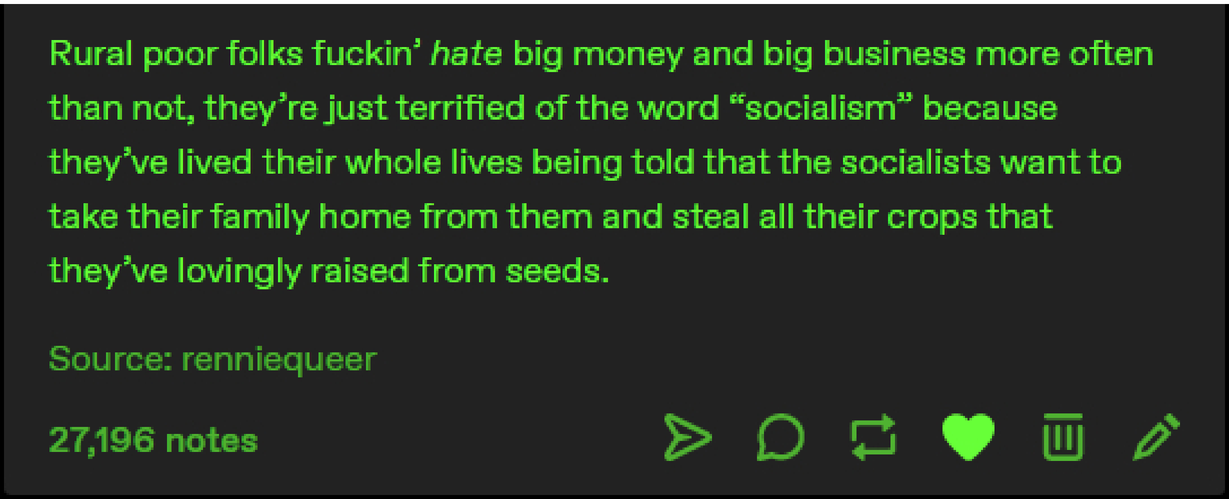
Like honestly as someone who grew up on a farm run by a man who didn’t understand why he shouldn’t fly a confederate flag off the farmhouse (even though he was from *fuckin’ MAINE)*, I can tell you that rural conservatives are more eager to listen to socialist ideas than you think. They’ve just been extremely conditioned to think of “socialism” as a dirty word.

If you talk to folks about how their bosses are dickheads and makin’ good friends with their neighbors to get their proper due from the boss and the government, they’ll overwhelmingly want to listen to you.



Rural poor folks fuckin’ *hate* big money and big business more often than not, they’re just terrified of the word “socialism” because they’ve lived their whole lives being told that the socialists want to take their family home from them and steal all their crops that they’ve lovingly raised from seeds.

the-barefoot-hatter Follow

The **Signal for Help** (or the **Violence at Home Signal for Help**) is a single-handed gesture that can be used by an individual to alert others that they feel threatened and need help over a video call, or in-person. It was originally created as a tool to combat the rise in domestic violence cases around the world as a result of the self-isolation measures related to the COVID-19 pandemic…

The Signal for Help was first introduced in **Canada** by the Canadian Women's Foundation on **April 14, 2020**, and on **April 28, 2020** in the **United States** by the Women's Funding Network (WFN). It received widespread praise from local, national, and international news organizations for helping provide a modern solution to the issue of a rise in domestic violence cases.

The signal has been recognized by over 40 organizations across Canada and the United States as a useful tool to help combat domestic violence.

Addressing concerns that abusers may become aware of such a widespread online initiative, the Canadian Women's Foundation and other organizations clarified that this signal is not "something that's going to save the day," but rather a tool someone could use to get help.

A GUY PROPOSING TO A GUY?

YOU MEAN A BOY MARRYING A BOY?

THAT'S JUST WRONG. ANYONE SHOULD BE ABLE TO MARRY ANYONE.

KIDS REACT FACT:

On June 26th, 2013, the Supreme Court struck down Section 3 of the Defense of Marriage Act that restricted U.S. federal interpretation of "marriage" and "spouse" to apply only to heterosexual unions. The court also dismissed California's Proposition 8 case, clearing the way for California to issue marriage licenses to same-sex couples.

IF YOU WANT TO MARRY THE SAME SEX, THAT'S OK. LIKE MACKLEMORE SAID, "I CAN'T CHANGE EVEN IF I TRIED."

THAT WAS SO CUTE! AND LIKE IT DOESN'T MATTER IF THEY'RE GAY.

THEY'RE DEPRIVED OF ONE THING WHICH IS SORT OF A MAJOR MILESTONE.
THEY'RE DEPRIVED OF ONE THING WHICH IS SORT OF A MAJOR MILESTONE.
IF A PERSON WANTS TO DO SOMETHING AND THEY CAN'T, THAT MEANS SOMETHING IN YOUR LIFE IS LIKE IMPOSSIBLE.

This is how kids reacted when they were shown same-sex marriage proposal videos. Kids these days.

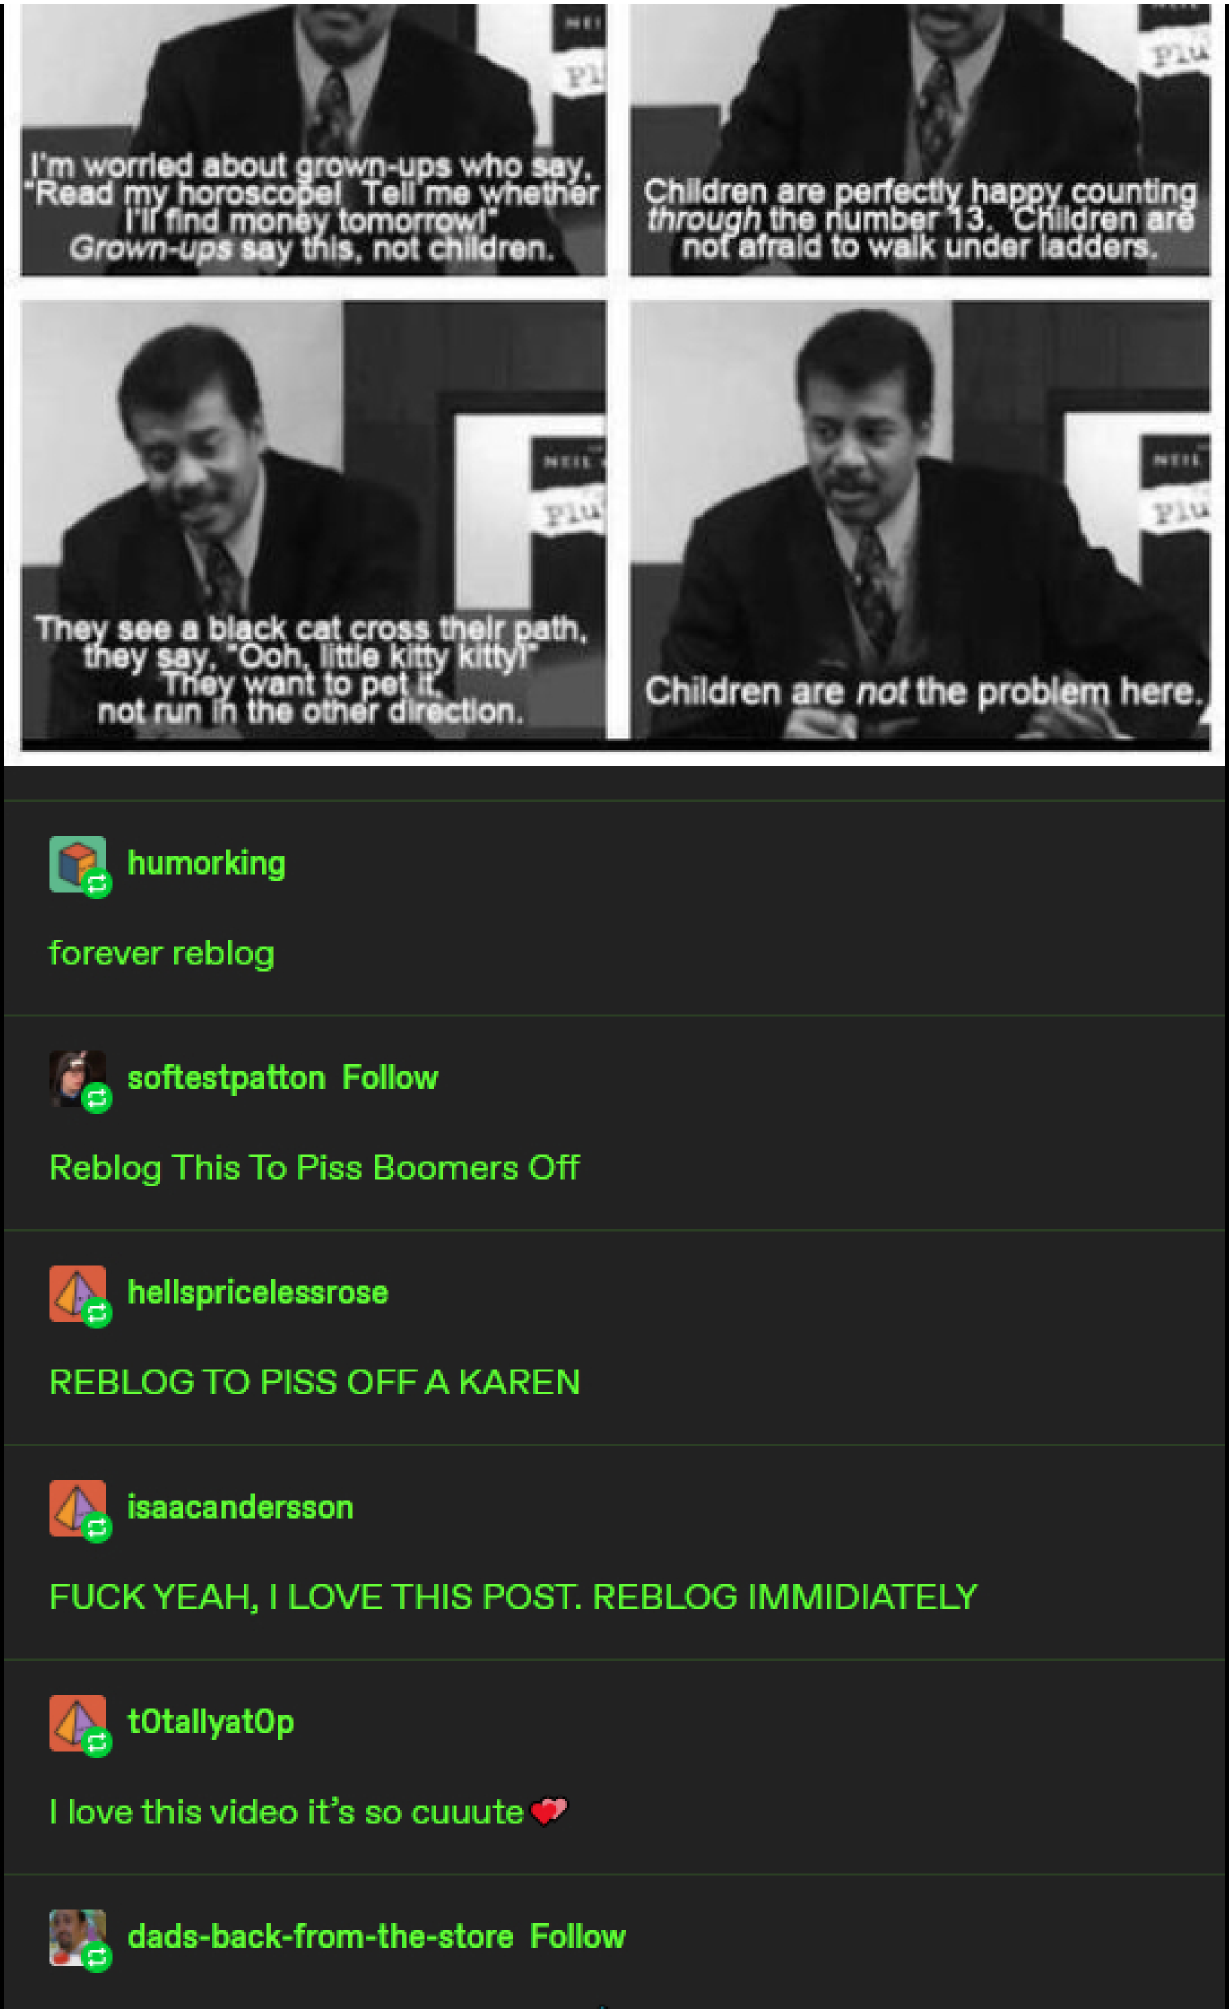
Kids don't say that, *grown-ups* do.



I'm worried about grown-ups who say, "Read my horoscope! Tell me whether I'll find money tomorrow!" *Grown-ups* say this, not children.

Children are perfectly happy counting *through* the number 13. Children are not afraid to walk under ladders.

They see a black cat cross their path, they say, "Ooh, little kitty kitty!" They want to pet it, not run in the other direction.

Children are *not* the problem here.

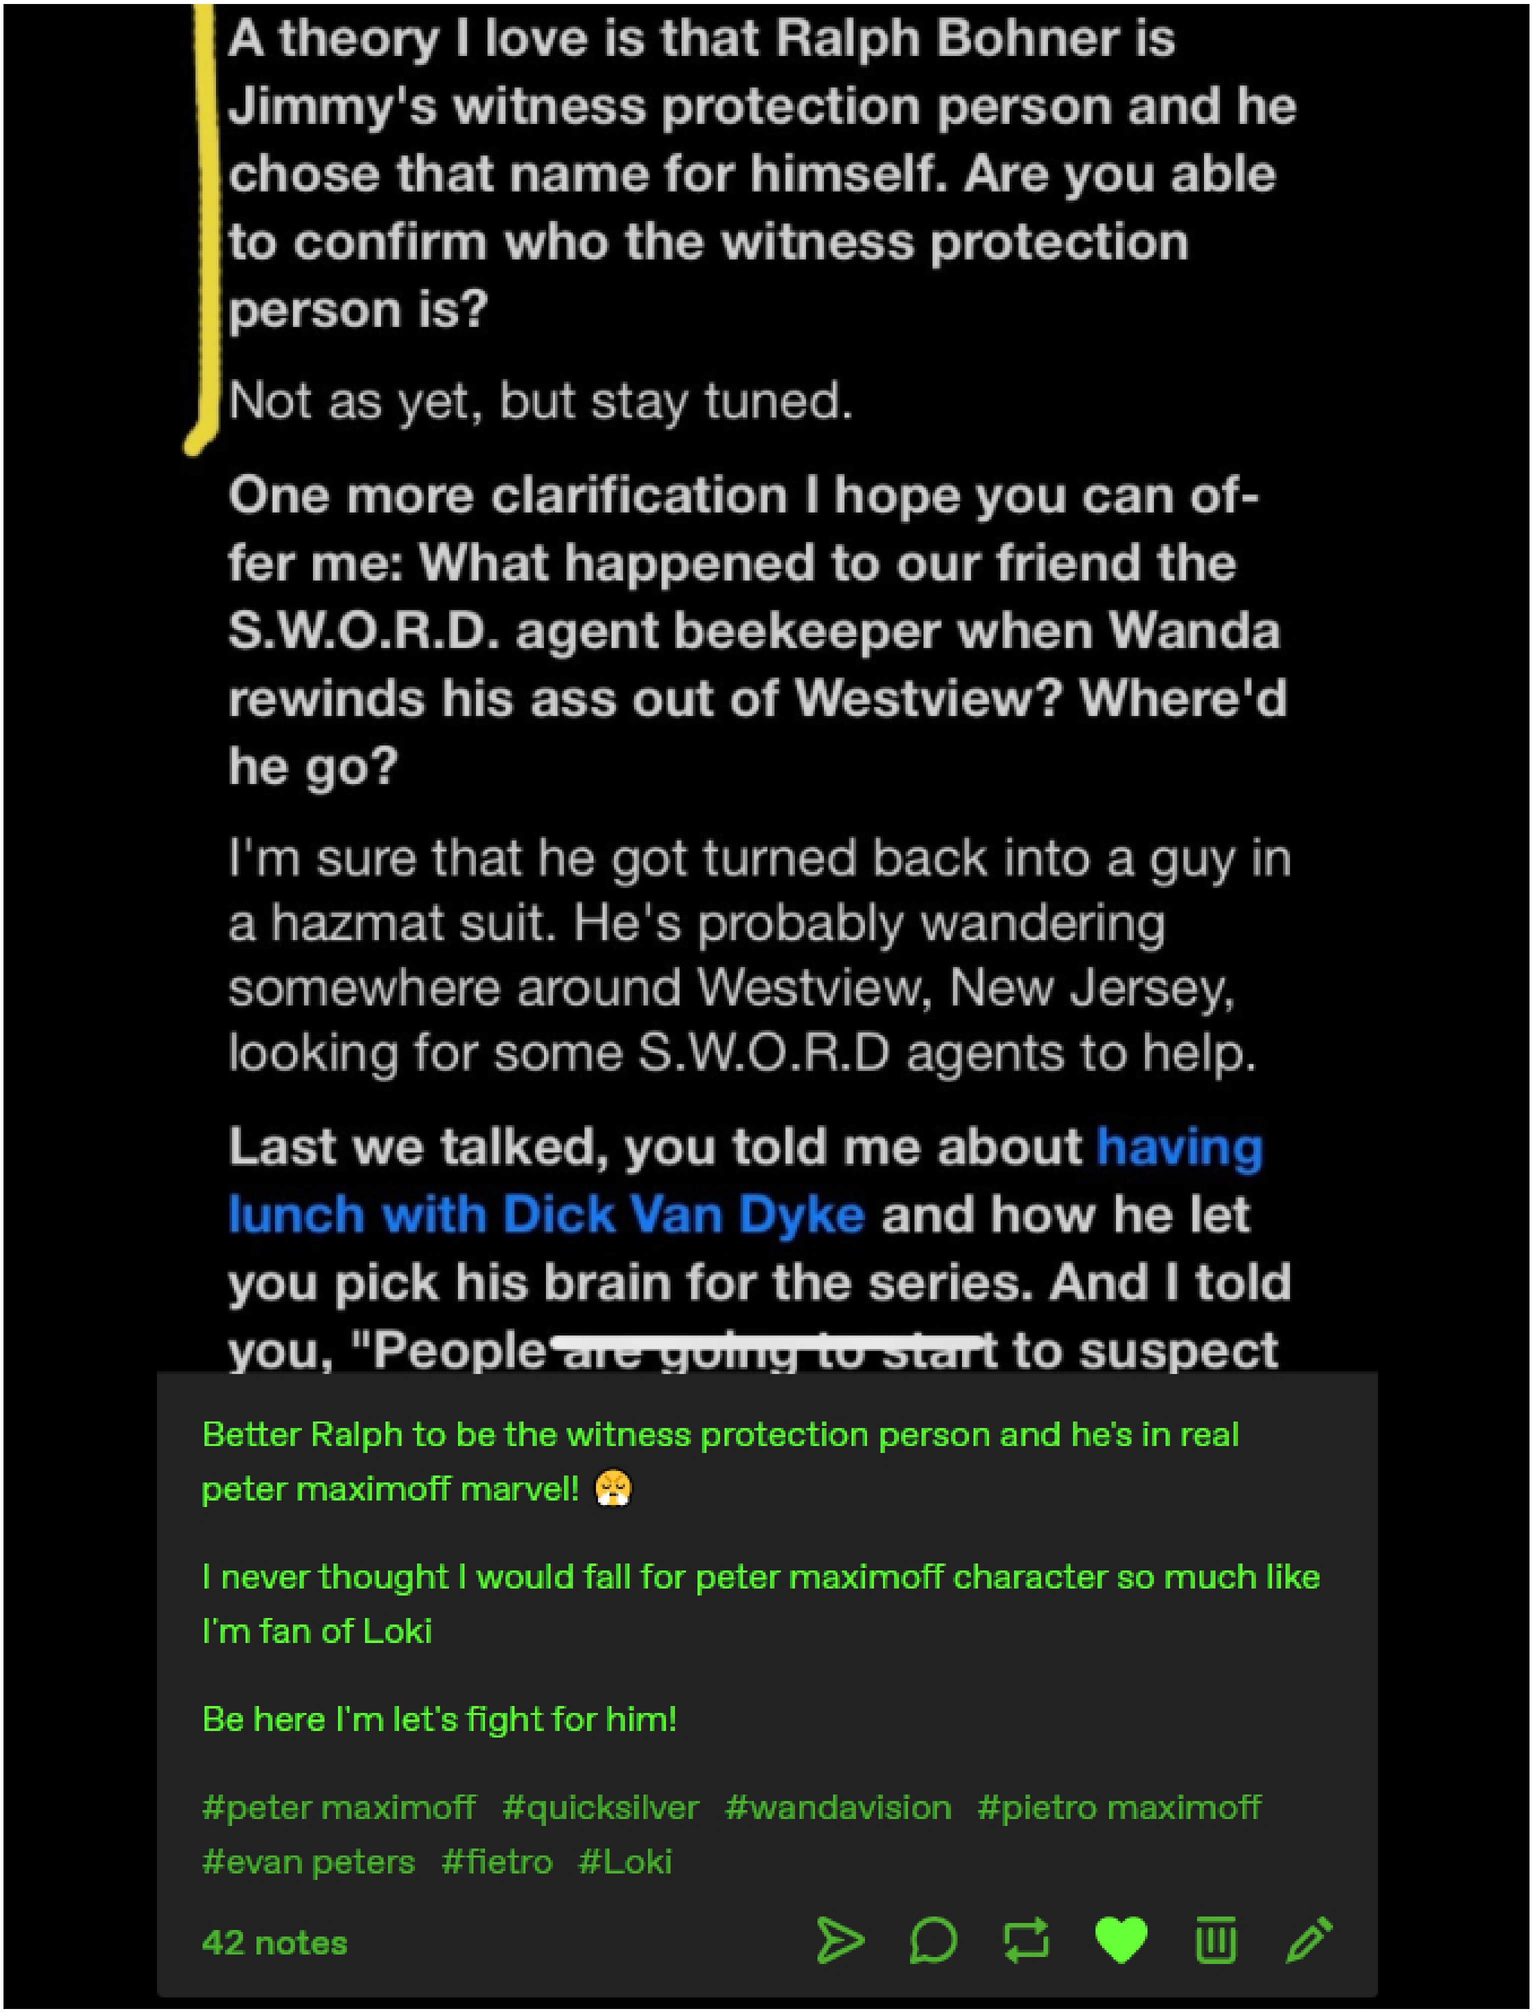
So, the fact that it's not the Pietro that we'd met before works on so many different levels. I think if we hand't answered "Who was Ralph?", there would have been an upper as well, so you got to meet Ralph. He's been living in that house and Agatha moved in and life changed dramatically for him. Plus, as a show that was playing with meta, there's been a lot of sit-com recasting, and we were having a good time with that idea of the second Darrin. For the fans that were disappointed, I'm just going to say: you know that those things are coming, right? The multiverse is coming. Mutants are coming. So, there you go.



A theory I love is that Ralph Bohner is Jimmy's witness protection person and he chose that name for himself. Are you able to confirm who the witness protection person is?

Not as yet, but stay tuned.

One more clarification I hope you can offer me: What happened to our friend the S.W.O.R.D. agent beekeeper when Wanda rewinds his ass out of Westview? Where'd he go?

I'm sure that he got turned back into a guy in a hazmat suit. He's probably wandering somewhere around Westview, New Jersey, looking for some S.W.O.R.D agents to help.

Last we talked, you told me about having lunch with Dick Van Dyke and how he let you pick his brain for the series. And I told you, "People are going to start to suspect

Better Ralph to be the witness protection person and he's in real peter maximoff marvel! 😤

I never thought I would fall for peter maximoff character so much like I'm fan of Loki

Death to the Monster of Nature

There are many examples of terrible parents in MCU; Howard, Odin, Ego, Thanos etc. The newest member of this club is Evanora. I believe there is a certain kind of cruelty and prejudice in a parent who condemns their child to death. Specially when the said child begs them for help over and over again.

Evanora, the head of Agatha's coven accuses her of betraying the coven by stealing knowledge above her age and station and practicing the darkest of magic. Agatha answers that "*I did not break your rules. They simply bent to my power*". This implies to me that she has found loopholes in the rules and used them and/or she was so powerful that the magical rules didn't work for her.

After this admission, the witches start chanting and Agatha recognizes what they're doing and panics and starts begging to them. Interestingly the first thing she says isn't begging for her life. It's a warning for the coven's safety.

> ***"No, I can't control it!*** *If only you would teach me! Help me! Please!"*

Then she turns to her mother and begs her, pleads with her. But Evanora starts chanting with other witches too.

> *"Mors monstrum natura"*

Which if I have translated it correctly(I don't know Latin. I used Wikitionary to find the meaning), means *"death to the monster of nature"*. Agatha's expression is so heartbreaking when she realizes her own mother condemns her to death.

her own mother condemns her to death.

When the coven try to execute Agatha, at first she screams in pain, but as she had warned them and to her own surprise, her power which she could not control, reacts and starts taking the coven's power from them.

Then Evanora joins the execution. But Agatha still has enough compassion to not let her mother be affected.

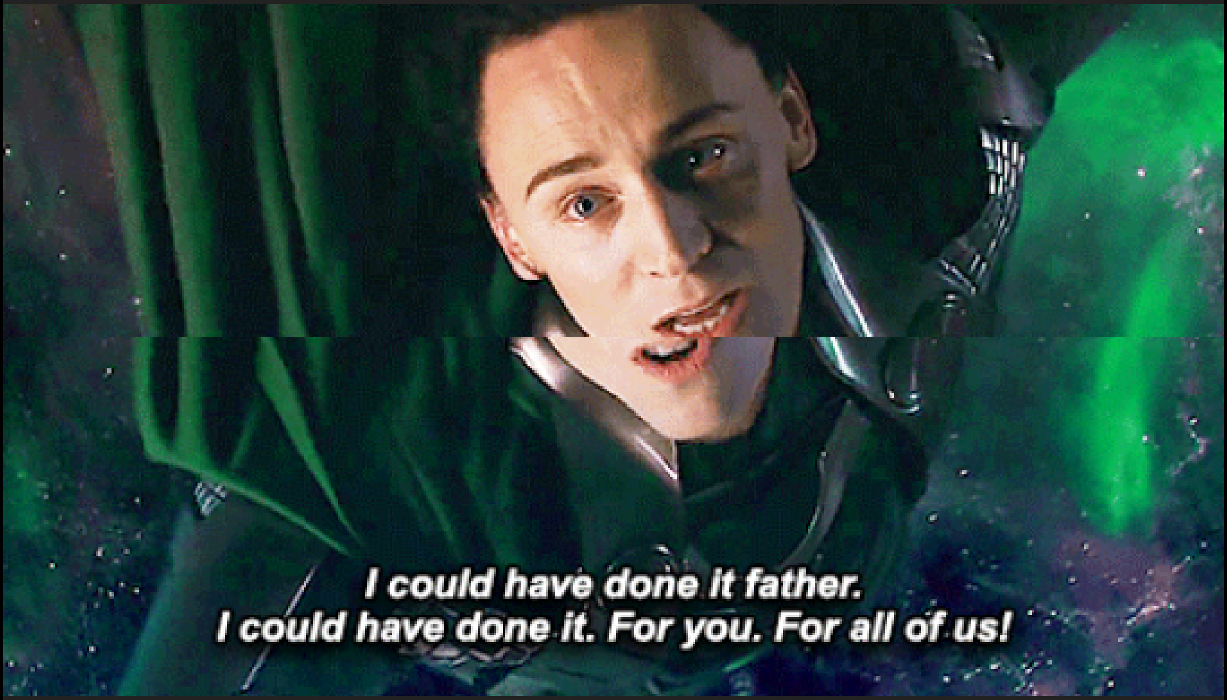
[Source of the gifs]

Again she begs her mother that she can be good. But Evanora rejects her.

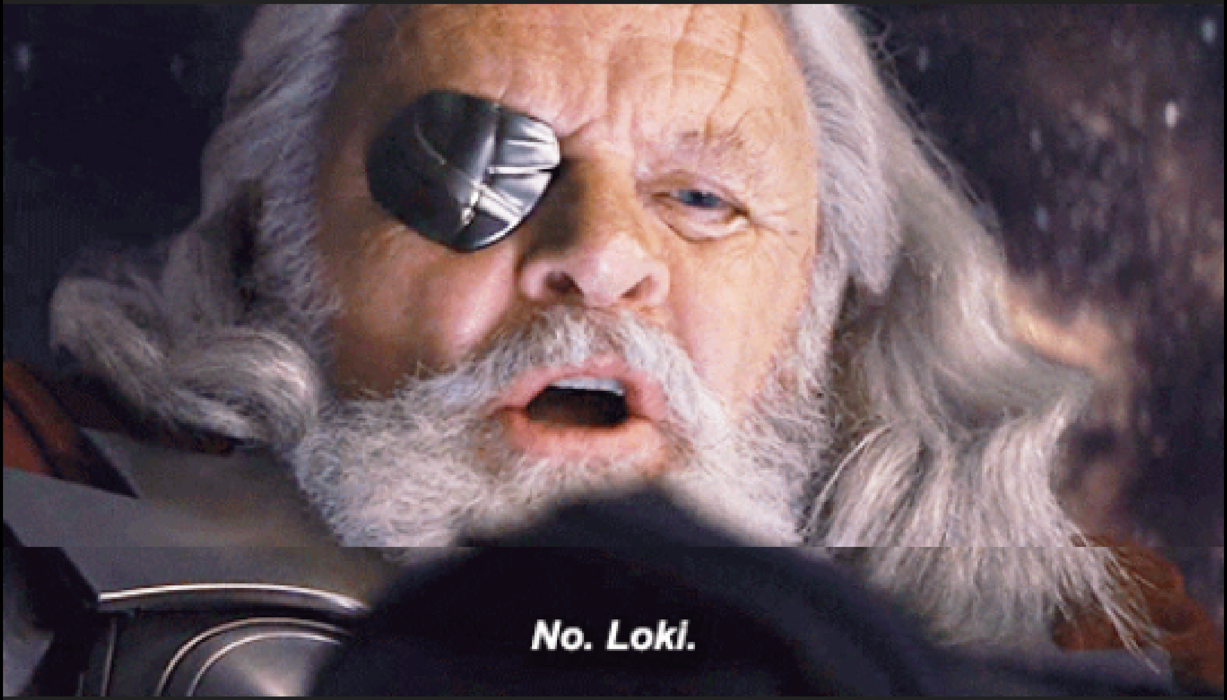
Please!, I can be good!

No. You can not.

As some fans has noticed, this moment is a parallel to the scene where Odin rejects Loki and denies his love and approval from him, when Loki physically and mentally is hanging on the edge of an abyss. This causes Loki to commit suicide.



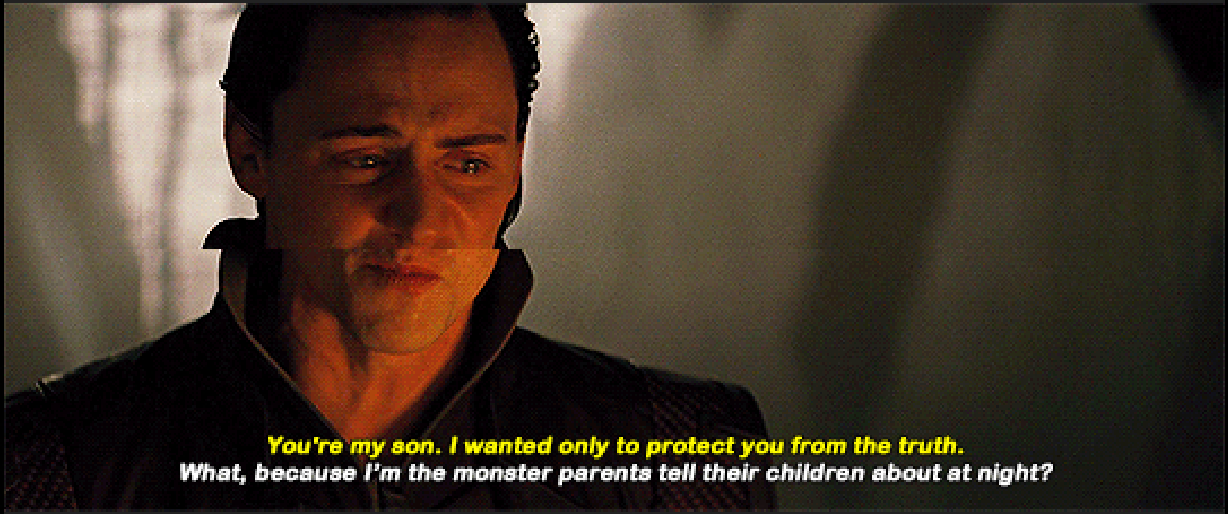
I could have done it father.
I could have done it. For you. For all of us!



[Source of the gifs]

But there are other similarities that Odin and Evanora share.

Odin raised his children with the belief that Jotuns were monsters, while one of his children was adopted from that race. He hid the truth while one of his children was adopted from that race. He hid the truth about Loki's race from him, claiming he wanted to protect Loki from the truth. Meaning the truth, which was Loki being Jotun, in Odin's mind was so horrible that Loki needed protecting from!



You're my son. I wanted only to protect you from the truth.
What, because I'm the monster parents tell their children about at night?

In TDW, Odin doesn't give Loki a fair trial. Because he has already made up his mind about him. He calls Loki a *creature* he doesn't recognize and "*Laufeyson*" based on the canonical tie-in comic. Odin tells Loki that *his birth right was to die as a child, cast out onto a frozen rock*.

Your birthright... was to die!

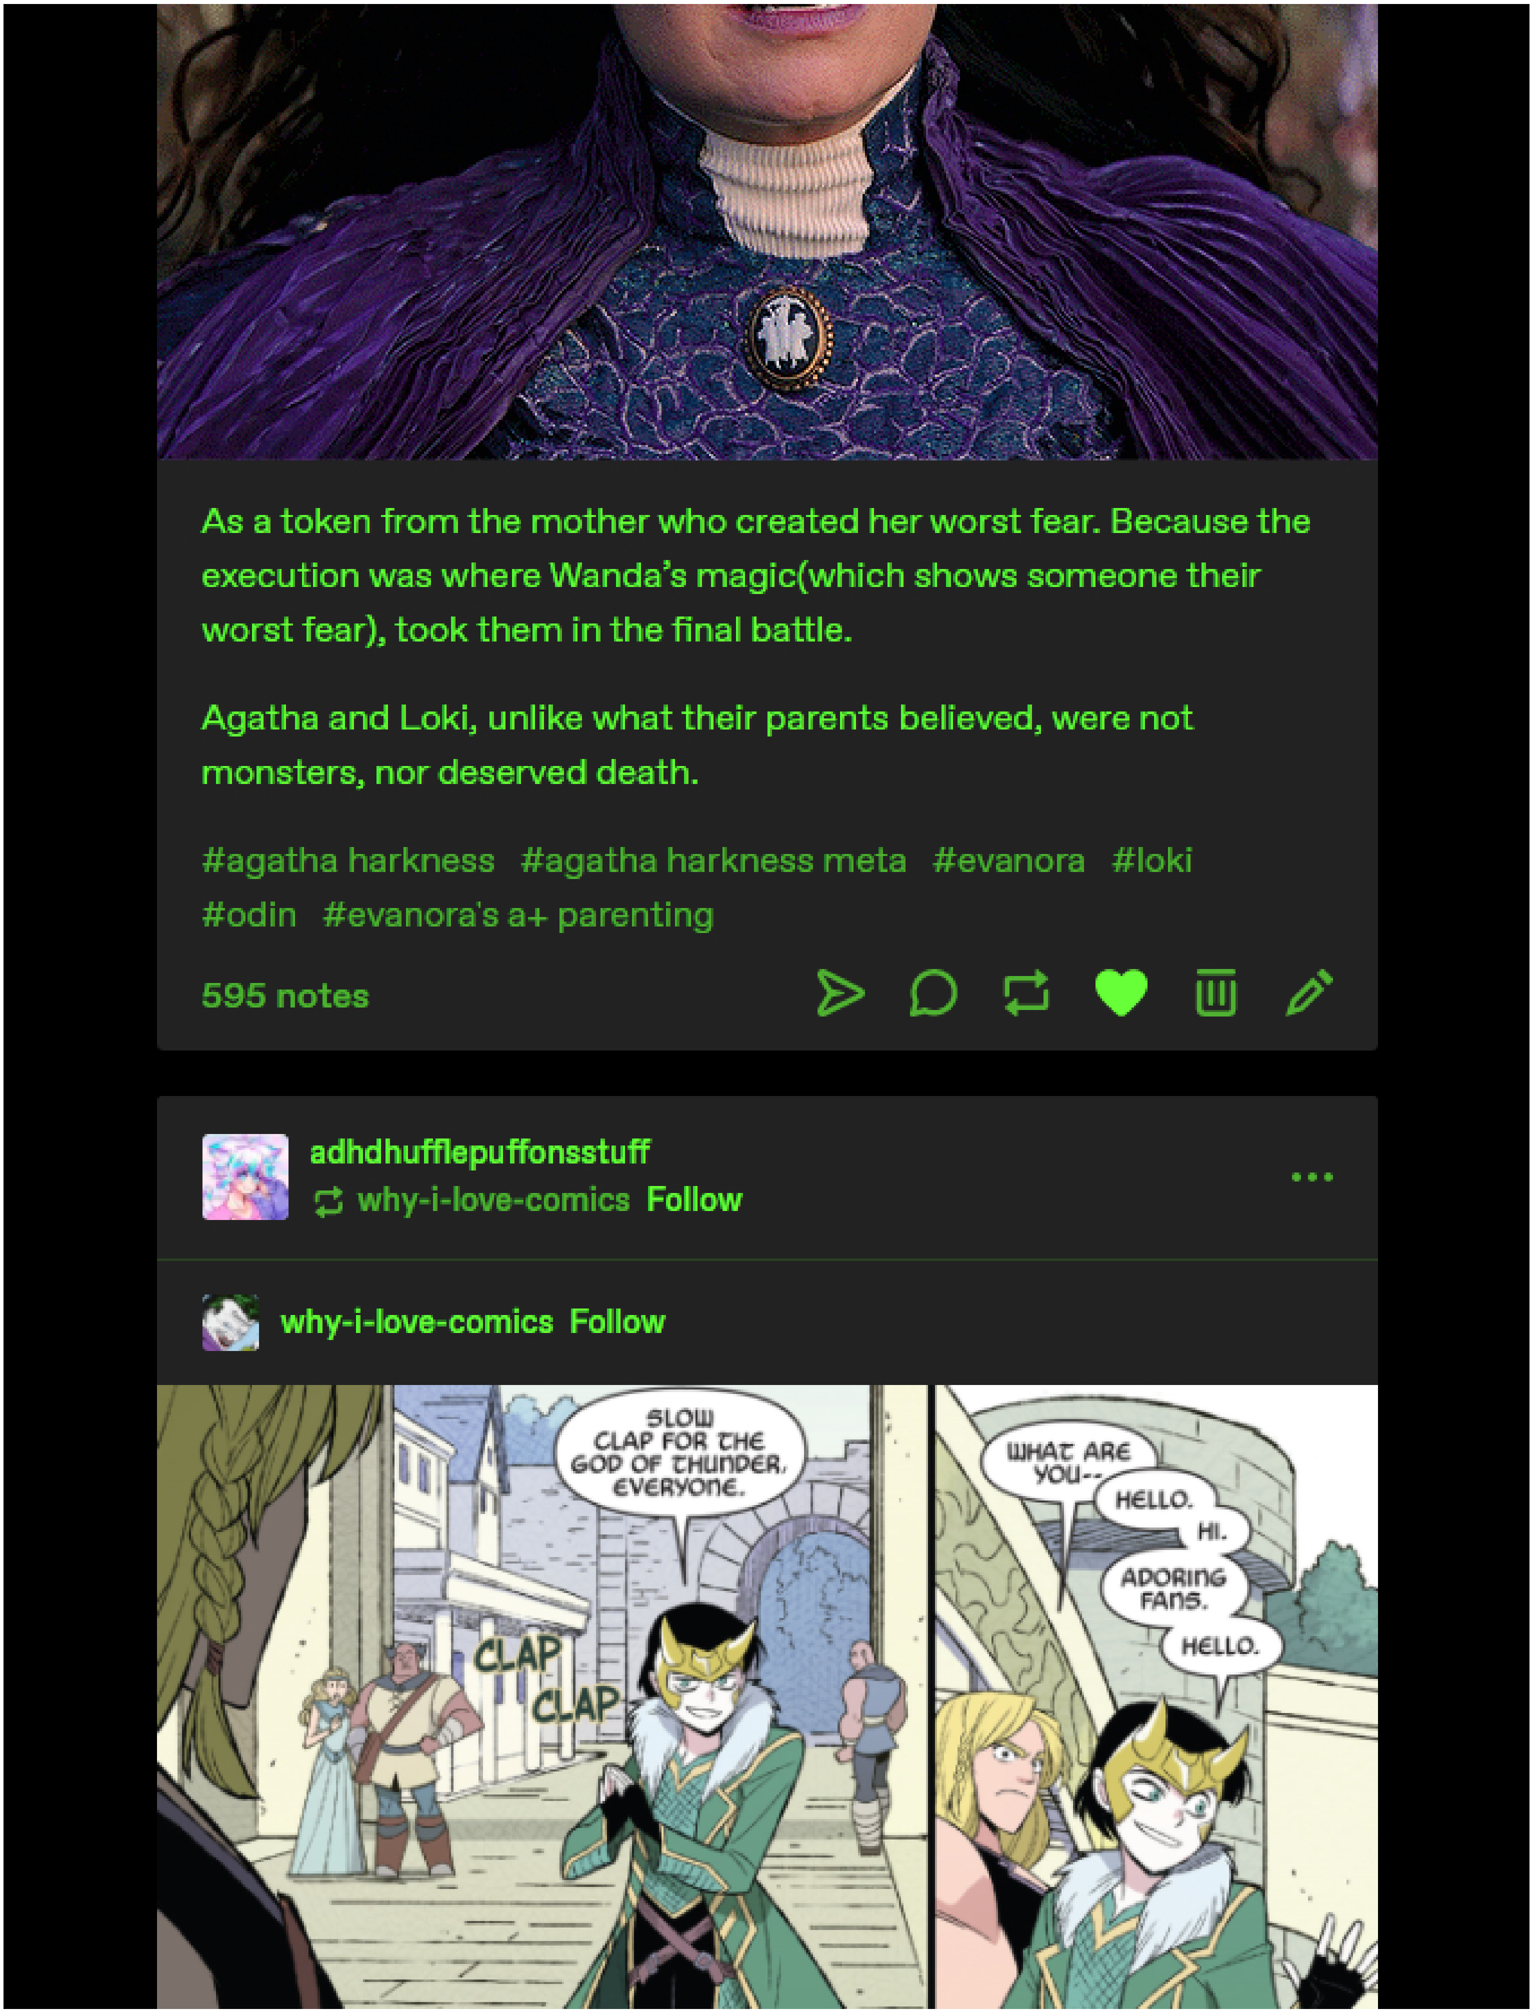
He tells Loki that the reason he won't execute him is Frigga and sentences Loki to never seeing his mother again and solitary sentences Loki to never seeing his mother again and solitary confinement for life. This for a crime Odin himself committed in a worse way in the past. A crime which was done when Loki's mind was under the influence of the mind stone and he was under duress and threat of torture.

Evanora doeas the same to Agatha. Agatha in that scene, seemed like a young and curious witch who is a little arrogant because of her amount of power. She probably sought knowledge and experimented with dark magic because of these characteristics and her thirst for knowledge. But she was not evil. As she warns the coven that she can't control her power and repeatedly begs them and her mother for help and teaching. But Evanora has already made up her mind about her. She doesn't ask Agatha for her reasons, or what exactly happened. What they brought Agatha to, wasn't a trial, it was a planned execution. Evanora sees her child as a monster and probably fears her because of how powerful Agatha is, and condemns her to death.

Still after all their parents done to them, Agatha and Loki still feel some kind of affection for them.

Loki, after erasing Odin's memory brings him to a retirement home so he can be comfortable and you can clearly see how sad he was after Odin's death.

And Agatha takes her mother's pendant hesitantly, and wears it all the time afterward.



As a token from the mother who created her worst fear. Because the execution was where Wanda's magic(which shows someone their worst fear), took them in the final battle.

Agatha and Loki, unlike what their parents believed, were not monsters, nor deserved death.

Create a cosmic level enemy whose attack damages the players, not just on a surface level, but "on all layers of reality"

If it successfully hits a character, just punch that character's player in the face IRL.

The video, described by @holyfunnyhistoryherring, is a captioned tik tok by @thatrobinhood, showing a white guy with short brown hair and a longer beard, wearing a bathrobe, holding a drink and talking to the camera. He says, “So I was at a tractor-pull one time (yes, I am *exactly* the kind of redneck that goes to tractor-pulls) and this guy showed up, I guess with his boyfriend, um, I’m not a 100% sure. But he was wearing, uh, pink cowboy boots. He had homemade cut-of jean shorts, he had a, uh, flannel crop top, and he had a *pink* John Deer trucker hat.Anyway, one of the rednecks behind me was looking at this guy and he’s like ‘I don’t know why anybody would come to a tractor-pull dressed like that’ and the **other** redneck who’s behind me goes ’**listen**, if he wants to come to a tractor pull dressed like *that*, it’s his **God given right**. What the **fuck** do you think freedom, **Earl?’** and now I really want a pride bumper sticker that says ‘What the **fuck** do you think *freedom means*, **Earl?’”**
